Fundamentals of Automotive Technology: Principles and Practice covers crucial material for career and technical education, secondary/post-secondary, and community college students and provides both rationales and step-by-step instructions for virtually every non-diagnosis NATEF task. Each section provides a comprehensive overview of a key topic area, with real-life problem scenarios that encourage students to develop connections between different skill and knowledge components. Customer service, safety, and math, science, and literary principles are demonstrated throughout the text to build student skill levels. Chapters are linked via cross-reference tools that support skill retention, critical thinking, and problem-solving. Students are regularly reminded that people skills are as important as technical skills in customer service fields.

An engaging guide to excelling in today's venture capital arena Beginning in 2005, Brad Feld and Jason Mendelson, managing directors at Foundry Group, wrote a long series of blog posts describing all the parts of a typical venture capital Term Sheet: a document which outlines key financial and other terms of a proposed investment. Since this time, they've seen the series used as the basis for a number of college courses, and have been thanked by thousands of people who have used the information to gain a better understanding of the venture capital field. Drawn from the past work Feld and Mendelson have written about in their blog and augmented with newer material, **Venture Capital Financings** puts this discipline in perspective and lays out the strategies that allow entrepreneurs to excel in their start-up companies. Page by page, this book discusses all facets of the venture capital fundraising process. Along the way, Feld and Mendelson touch on everything from how valuations are set to what externalities venture capitalists face that factor into entrepreneurs' businesses. Includes a breakdown analysis of the mechanics of a Term Sheet and the tactics needed to negotiate Details the different stages of the venture capital process, from starting a venture and seeing it through to the later stages Explores the entire venture capital ecosystem including those who invest in venture capitalist Contain standard documents that are used in these transactions Written by two highly regarded experts in the world of venture capital The venture capital arena is a complex and competitive place, but with this book as your guide, you'll discover what it takes to make your way through it.

The purpose of this research is to investigate the state of ferry transit operations in North America and to develop practitioner guidance for the planning, marketing, operation, and management of ferry transportation systems. The research is intended to present a uniform understanding of the status of ferries as well as options for how to approach planning and operational activities. This guidebook is intended for use by operators large and small, in publicly or privately owned operations, for the development of ferry operations as a solution to a transportation need. This research was developed through literature searches of previous studies, reviews of existing government and state documents, telephone interviews with a broad selection of ferry operators, in depth case studies of eight ferry operators and ferry systems geographically dispersed across the North American continent, and peer review of the interim documents. The main body of this report contains the case studies and a guidebook. Two appendices provide additional information to support the work documented within the main body of the report. Appendix A provides a listing of literature review sources, and Appendix B documents the results of a survey of ferry operators that was developed and implemented in this research.

How ordinary forms of writing—including manuals, petitions, almanacs, and magazines—shaped the way colonial subjects understood their place in empire In **Required Reading**, Priyasha Mukhopadhyay offers a new and provocative history of reading that centers archives of everyday writing from the British empire. Mukhopadhyay rummages in the drawers of bureaucratic offices and the cupboards of publishers in search of how historical readers in colonial South Asia responded to texts ranging from licenses to manuals, how they made sense of them, and what this can tell us about their experiences living in the

shadow of a vast imperial power. Taking these engagements seriously, she argues, is the first step to challenging conventional notions of what it means to read. Mukhopadhyay's account is populated by a cast of characters that spans the ranks of colonial society, from bored soldiers to frustrated bureaucrats. These readers formed close, even intimate relationships with everyday texts. She presents four case studies: a soldier's manual, a cache of bureaucratic documents, a collection of astrological almanacs, and a women's literary magazine. Tracking moments in which readers refused to read, were unable to read, and read in part, she uncovers the dizzying array of material, textual, and aural practices these texts elicited. Even selectively read almanacs and impenetrable account books, she finds, were springboards for personal, world-shaping readerly relationships. Untethered from the constraints of conventional literacy, *Required Reading* reimagines how texts work in the world and how we understand the very idea of reading.

Wildlife management specialists and landscape ecologists offer a new perspective on the important intersection of these fields in the twenty-first century. It's been clear for decades that landscape-level patterns and processes, along with the tenets and tools of landscape ecology, are vitally important in understanding wildlife-habitat relationships and sustaining wildlife populations. Today, significant shifts in the spatial scale of extractive, agricultural, ranching, and urban land uses are upon us, making it more important than ever before to connect wildlife management and landscape ecology. Landscape ecologists must understand the constraints that wildlife managers face and be able to use that knowledge to translate their work into more practical applications. Wildlife managers, for their part, can benefit greatly from becoming comfortable with the vocabulary, conceptual processes, and perspectives of landscape ecologists. In *Wildlife Management and Landscapes*, the foremost landscape ecology experts and wildlife management specialists come together to discuss the emerging role of landscape concepts in habitat management. Their contributions • make the case that a landscape perspective is necessary to address management questions • translate concepts in landscape ecology to wildlife management • explain why studying some important habitat-wildlife relationships is still inherently difficult • explore the dynamic and heterogeneous structure of natural systems • reveal why factors such as soil, hydrology, fire, grazing, and timber harvest lead to uncertainty in management decisions • explain matching scale between population processes and management • discuss limitations to management across jurisdictional boundaries and balancing

objectives of private landowners and management agencies • offer practical ideas for improving communication between professionals • outline the impediments that limit a full union of landscape ecology and wildlife management Using concrete examples of modern conservation challenges that range from oil and gas development to agriculture and urbanization, the volume posits that shifts in conservation funding from a hunter constituent base to other sources will bring a dramatic change in the way we manage wildlife. Explicating the foundational similarity of wildlife management and landscape ecology, *Wildlife and Landscapes* builds crucial bridges between theoretical and practical applications. Project finance is a fast-growing area of capital investment for major infrastructure and other large projects. Financing such projects as EuroDisney, airports, highways, tunnels, schools, hospitals, and other large projects presents a complex and interesting challenge that the specialty of project finance takes on wholeheartedly, combining financial engineering with legal and contractual expertise to develop various financing options. In this book, Stefano Gatti of Bocconi University describes the theory that underpins this cutting-edge industry, and then provides illustrations and examples from actual practice to illustrate that theory. At key points in the book, Gatti brings in other project finance experts who share their specialized knowledge on the legal issues and the role of advisors in project finance deals. - Foreword by William Megginson, Professor and Rainbolt Chair in Finance, Price College of Business, The University of Oklahoma - Comprehensive coverage of theory and practice of project finance as it is practiced today in Europe and North America
