Alevi in Europe ABRAMS

The Alevi are a significant minority in Turkey, and now also in the countries of Western Europe. Over the past century, many of them have migrated from rural enclaves on the Anatolian plateau to the great cities of Istanbul and Ankara, and from there to the countries of the European Union. This book asks who are they? How do they construct their identities – now and in the past; in Turkey and in Europe? A range of scholars, writing from sociological, historical, socio-psychological and political perspectives, present analysis and research that shows the Alevi

communities grouping and regrouping, defining and redefining – sometimes as an ethnic minority, sometimes as religious groups, sometimes around a political philosophy - contingently responding to circumstances of the Turkish Republic ' s political position and to the immigration policies of Western Europe. Contributors consider Alevi roots and cultural practices in their villages of origin; the changes in identity following the migration to the gecekondu shanty towns surrounding the cities of Turkey; the changes consequent on their second diaspora to Germany, the UK, Sweden and other European

countries; and the implications of European citizenship for their identity. This collection offers a new and significant contribution to the study of migration and minorities in the wider European context.

The Routledge Handbook of Asian Music:

Cultural Intersections introduces Asian music as a way to ask questions about what happens when cultures converge and how readers may evaluate cultural junctures through expressive forms. The volume's thirteen original chapters cover musical practices in historical and modern contexts from Central Asia, East Asia, South Asia, and Southeast Asia, including art music traditions, folk music and composition, religious and ritual music, as well as popular music. These chapters showcase the diversity of Asian music, requiring readers to constantly reconsider their understanding of this vibrant and complex area. It is divided into three sections: Locating Meanings Boundaries and Difference Cultural Flows Contributors to the handbook offer a multi-

disciplinary portfolio of methods, ranging from archival research and field ethnography, to biographical studies and music analysis. In addition to rich illustrations, numerous samples of notation and sheet music are featured as insightful study resources. Readers are invited to study individuals, music-makers, listeners, and viewers to learn about their concerns, their musical choices, and their lives through a combination of humanistic and social-scientific approaches. Demonstrating how transformative cultural differences can become in intercultural encounters, this handbook will appeal to students and scholars of musicology, ethnomusicology, and anthropology.

Johnny Got His Gun Routledge

The Searing Portrayal Of War That Has Stunned And Galvanized Generations Of Readers An immediate bestseller upon its original publication in 1939, Dalton Trumbo's stark, profoundly troubling masterpiece about the horrors of World War I brilliantly crystallized the uncompromising brutality of war and became the most influential protest novel of the Vietnam era. Johnny Got His Gun is an undisputed classic of antiwar literature that's as timely as ever. A terrifying book, of an

extraordinary emotional intensity.--The Washington Post "Powerful. . . an eye-opener." --Michael Moore "Mr. Trumbo sets this story down almost without pause or punctuation and with a fury amounting to eloquence."--The New York Times "A book that can never be forgotten by anyone who reads it."--Saturday Review

a shared 'Alevi Cultural Heritage'. In these processes, the actors have to negotiate standardisation and plurality cutting across the manifold ethnic and socio-religious differences among Alevis.

Local Religion in North China in the Twentieth Century Princeton University Press

A serious and original study of the beginnings and development of modernism in which the pictorial aspects are designed to aid in the communication of the author's closely reasoned formulations. Let it be said at once that the format of this work is richly handsome: it is a two-volume boxed set comprising 844 pages and well over 1,000 high-quality illustrations, and it reflects throughout its publisher's conviction that good design is an essential, not superficial, part of bookmaking. Beyond that, it should be emphasized that this work is not

another facile cultural tour of modern architecture. It is a serious and original study of the beginnings and development of modernism in which the pictorial aspects are designed to aid in the communication of the author's closely reasoned formulations, rather than to gloss over a lack of substantive content. The book is a translation of the third Italian edition, published in 1966. Benevolo, who is on the faculty of architecture in Venice, has earned an international reputation as a historian of architecture and town planning, and his publications embrace the span of time from the Renaissance to the foreseeable future. One such publication, *The Origins of Modern Town Planning* (The MIT Press, 1967), may be read as a prelude to the present work as well as an independent contribution. Perhaps more than any other architectural historian in our time,

Benevolo has made a determined effort to place developments in design and planning in their proper social and political settings. Indeed, the author argues that the development of the modern movement in architecture was determined, not by aesthetic formalisms, but largely by the social changes that have occurred since about 1760: "After the middle of the eighteenth century, without the continuity of formal activity being in any way broken, indeed while architectural language seems to be acquiring a particular coherence, the relations between architect and society began to change radically.... New material and spiritual needs, new ideas and modes of procedure arise both within and beyond the traditional limits, and finally they run together to form a new architectural synthesis that is completely different from the old one. In this way it is

possible to explain the birth of modern architecture, which otherwise would seem completely incomprehensible...." This second volume is concerned with the modern movement proper, from 1914 to 1966. The author emphasizes the unity of the movement, rejecting the usual treatment that allots to the individual architects separate and unconnected biographical accounts. Benevolo remarks at one point, "When one talks about modern architecture one must bear in mind the fact that it implies not only a new range of forms, but also a new way of thinking, whose consequences have not yet all been calculated." His main concern is to provide a more exact calculation of those consequences.

Transnational Italian Studies is specifically targeted at a student audience and is designed to be used as a key text when approaching the disciplinary field

of Italian studies. It allows the study of Italian culture to be construed and practised not simply as the inquiry into a national tradition but as the study of the interaction of cultural practices both within Italy itself and in those parts of the world that have witnessed the extent of Italian mobility. The text argues that Italian culture needs to be considered in a transnational/transcultural perspective and that an understanding of linguistic and cultural translation underlies all approaches to the study of Italian culture in a global context. Contributions deploy a range of methodological approaches to understand and illustrate how language operates, how culture inhabits and constitutes public and private space, how notions of time operate within people's lives, and the multiple ways in which people experience a sense of personhood. Chapters stretch from the medieval period to the present and demonstrate how transnational Italian culture can be critically addressed through the examination of carefully chosen examples. Gerald Graff argues that our schools and colleges make the intellectual life seem more opaque, narrowly specialized, and beyond normal learning capacities than it is or needs to be. Left clueless in the academic world, many students view the life of the mind as a secret society for which only an elite few qualify. In a refreshing departure from standard diatribes against academia, Graff shows how academic unintelligibility is unwittingly reinforced not only by academic jargon and obscure writing, but by the disconnection of the curriculum and the failure to exploit the many connections between

academia and popular culture. Finally, Graff offers a wealth of practical suggestions for making the culture of ideas and arguments more accessible to students, showing how students can enter the public debates that permeate their lives.

Feminism has dramatically influenced the way literary texts are read, taught and evaluated. Feminist literary theory has deliberately transgressed traditional boundaries between literature, philosophy and the social sciences in order to understand how gender has been constructed and represented through language. This lively and thought-provoking Companion presents a range of approaches to the field.

Some of the essays demonstrate feminist critical principles at work in analysing texts, while others take a step back to trace the development of a particular feminist literary method. The essays draw on a range of primary material from the medieval period to postmodernism and from several countries, disciplines and genres. Each essay suggests further reading to explore this field further. This is the most accessible guide available both for students of literature new to this developing field, and for students of gender studies and readers interested in the interactions of feminism, literary criticism and literature.

This is the first comprehensive English-language introduction to Taoist ritual both for the scholar and the general reader. In this splendid account, Taoism is presented as a system of religious symbol and action deeply rooted in centuries of Chinese social

life. In vivid detail, Lagerwey describes the intricacies of Taoist rituals as performed by a single Taoist priest in present-day Taiwan. With the methodology of a literary critic, he explains what the Taoist priests have done, and continue to do, as intercessors acting to protect their communities, and what these beliefs and practices mean to the followers.

This book includes twenty chapters reviewing a total of sixty-four books in Chinese in the two series: “Studies in

Chinese Ritual, Theatre and Folklore” and “Traditional Hakka Society,” edited respectively by Wang Ch'iu-kuei and John Lagerwey. It is intended to inform the wider world of scholarship of this new research, which provides the most detailed information ever available about Chinese local culture, drama and religion. Together with the excellent studies of this dimension of culture by scholars in Taiwan, and with a revived interest in this area by other China mainland scholars, it represents a resumption of the folklore studies movement of the 1920s and 1930s that was interrupted by the war with Japan. These new reports may also be seen as a complement to the work of anthropologists, who until recently have not been able to conduct many field

studies in China. As such, this research provides fresh information for an understanding of the culture of the majority of the Chinese people, an understanding based on their lived experiences and values. *History of Modern Architecture* John Benjamins Publishing

This ground-breaking book is the first-ever study of the role played in musical history by song collectors. This is the first-ever book about song collectors, music's unsung heroes. They include the Armenian priest who sacrificed his life to preserve the folk music which the Turks were trying to erase in the 1915 Genocide; the prisoner in a Nazi concentration camp who secretly noted down the songs of doomed Jewish inmates; the British singer who went veiled into Afghanistan to learn, record and perform the music the Taliban wanted to silence. Some collectors have been fired by political idealism - Bartok championing Hungarian

peasant music, the Lomaxes bringing the blues out of Mississippi penitentiaries, and transmitting them to the world. Many collectors have been priests - French Jesuits noting down labyrinthine forms in eighteenth-century Beijing, English vicars tracking songs in nineteenth-century Somerset. Others have been wonderfully colourful oddballs. Today's collectors are striving heroically to preserve endangered musics, whether rare forms of Balinese gamelan, the wind-band music of Chinese villages, or the sophisticated polyphony of Central African Pygmies. With globalisation, urbanisation and Westernisation causing an irreversible erosion of the world's musical diversity, Michael Church suggests we may be seeing folk music's "end of history". Old forms are dying as the conditions for their survival - or replacement - disappear; the death of villages means the death of village musical culture. This ground-breaking book is the sequel to the author's award-winning *The Other Classical Musics*, and it concludes with an inventory of the

"Precious volumes," or pao-chüan, were produced by popular sects in the Ming and early Qing dynasties. These scriptures were believed to have been divinely revealed to sect leaders and contain teachings and ritual instructions that provide valuable information about a lively and widespread religious tradition outside mainstream Confucianism, Taoism, and Buddhism.

Largely neglected until now, they testify to the imagination and devotion of popular religious leaders. This book, the most detailed and comprehensive study of pao-chüan in any language, studies 34 early examples of this literature in order to understand the origins and development of this textual tradition. Although the work focuses on content and structure, it also treats the social context of these works as well as their transmission and ritual use. **The Cambridge Companion to Feminist Literary Theory** Cengage Learning
The rich local traditions of musical life in rural China are still little known. Music-making in village society is largely ceremonial, and shawm bands account for a significant part of such music. This is the first major ethnographic

study of Chinese shawm bands in their ceremonial and social context. Based in a poor county in Shanxi province in northwestern China, Stephen Jones describes the painful maintenance of ceremonial and its music there under Maoism, its revival with the market reforms of the 1980s and its modification under the assault of pop music since the 1990s. Part One of the text explains the social and historical background by outlining the lives of shawm band musicians in modern times. Part Two looks at the main performing contexts of funerals and temple fairs, whilst Part Three discusses musical features such as instruments, scales, and repertoires. The downloadable resources consist of a 47-minute film in two parts, showing excerpts from funerals and temple fairs (complementing Part Two of the text), while a separate section contains a

magnificent 1992 funerary performance of a complete shawm-band suite. As a package, the book and downloadable resources illuminate the whole ceremonial context of music-making in rural China, illustrating the ritual-music experience of villagers, with lay Daoist priests, opera troupes, and beggars also making cameo appearances. While the modern stage repertoires of urban professionals remain our main exposure to Chinese music, this publication is all the more valuable in showing the daily musical experiences of the majority of people in China. It will appeal to ethnomusicologists, anthropologists and all those interested in modern Chinese history and society.

This is a chronological history of the Sufi tradition, divided in to three sections, early,

middle and modern periods. The book comprises 35 independent chapters with easily identifiable themes and/or geographical threads, all written by recognised experts in the field. The volume outlines the origins and early developments of Sufism by assessing the formative thinkers and practitioners and investigating specific pietistic themes. The middle period contains an examination of the emergence of the Sufi Orders and illustrates the diversity of the tradition. This middle period also analyses the fate of Sufism during the time of the Gunpowder Empires. Finally, the end period includes representative surveys of Sufism in several countries, both in the West and in traditional "Islamic" regions. This comprehensive and up-to-date collection of studies provides a guide to the Sufi tradition. The Handbook is a valuable resource for

students and researchers with an interest in religion, Islamic Studies and Middle Eastern Studies.
