WINNER OF THE 2021 YALSA AWARD FOR EXCELLENCE IN NONFICTION FOR YOUNG ADULTS! SIX STARRED REVIEWS! Discover the dark side of Charles Lindbergh--one of America's most celebrated heroes and complicated men--in this

riveting biography from the acclaimed author of The Family Romanov. First human to cross the Atlantic via airplane; one of the first American media sensations; Nazi sympathizer and anti-Semite; loner whose baby was kidnapped and murdered; champion of Eugenics, the science of improving a human population by controlled breeding; tireless environmentalist. Charles Lindbergh was all of the above and more. Here is a rich, multi-faceted, utterly spellbinding biography about an American hero who was also a deeply flawed man. In this time where values Lindbergh held, like white Nationalism and America First, are once again on the rise, The Rise and Fall of Charles Lindbergh is essential reading for teens and history fanatics alike.

The Practical, Comprehensive Guide to Applying Cybersecurity Best Practices and Standards in Real Environments In

Effective Cybersecurity, William Stallings introduces the technology, operational procedures, and management practices needed for successful cybersecurity. Stallings makes extensive use of standards and best practices documents that are often used to guide or mandate cybersecurity implementation. Going beyond these, he offers in-depth tutorials on the “how” of implementation integrated into a unified framework and realistic plan of action. Each chapter contains a clear technical overview, as well as a detailed discussion of action items and appropriate policies. Stallings offers many pedagogical features designed to help readers master the material: clear learning objectives, keyword lists, review questions, and QR codes linking to relevant standards documents and web resources. Effective Cybersecurity aligns with the comprehensive Information Security Forum document “The Standard of Good Practice for Information Security,” extending ISF’s work with extensive insights from ISO, NIST, COBIT, other official standards

and guidelines, and modern professional, academic, and industry literature. • Understand the cybersecurity discipline and the role of standards and best practices • Define security governance, assess risks, and manage strategy and tactics • Safeguard information and privacy, and ensure GDPR compliance • Harden in-systems across the system development life cycle (SDLC) • Protect servers, virtualized systems, and storage • Secure networks and electronic communications, from email to VoIP • Apply the most appropriate methods for user authentication • Mitigate security risks in supply chains and cloud environments This knowledge is indispensable to every cybersecurity professional. Stallings presents it systematically and coherently, making it practical and actionable.

Currency Shift happens: Emerging technologies and globalization have resulted in political, social and cultural changes. These changes have a profound

impact on all aspects of human life, including education. Yet while society has changed and continues to change, schools are slow to keep up. This book explores issues related to transforming and modernizing our educational systems, including the impact of societal shifts on education, the efforts at various levels to bring schools into the 21st century, the identification of 21st century skills, the reformation of the curriculum, the creation of alternative models of schooling, the innovative use of technology in education, and many others. It addresses questions like the following: Should schools systems adapt to better meet the needs of tomorrow’s world and how should this be accomplished? How can society better prepare students for a changing and challenging modern world? What skills do students need to lead successful lives and become productive citizens in the 21st century? How can educators create learning environments that are relevant and meaningful for digital natives? How can the school curriculum be made more rigorous to meet the needs of the 21st century? This book encourages readers to

transcend the limits of their own educational experience, to think beyond familiar notions of schooling, instruction and curriculum, to consider how to best structure learning so that it will benefit future generations. It encourages a deeper analysis of the existing education system and offers practical insights into future directions focused on preparing students with 21st century skills.

In this pathbreaking book, world-renowned Harvard Business School service firm experts James L. Heskett, W. Earl Sasser, Jr. and Leonard A. Schlesinger reveal that leading companies stay on top by managing the service profit chain. Why are a select few service firms better at what they do -- year in and year out -- than their competitors? For most senior managers, the profusion of anecdotal "service excellence" books fails to address this key question. Based on five years of painstaking research, the authors show how managers at American Express, Southwest Airlines, Banc One, Waste Management, USAA, MBNA, Intuit, British Airways, Taco Bell, Fairfield Inns, Ritz-Carlton Hotel, and

the Merry Maids subsidiary of ServiceMaster employ a quantifiable set of relationships that directly links profit and growth to not only customer loyalty and satisfaction, but to employee loyalty, satisfaction, and productivity. The strongest relationships the authors discovered are those between (1) profit and customer loyalty; (2) employee loyalty and customer loyalty; and (3) employee satisfaction and customer satisfaction. Moreover, these relationships are mutually reinforcing; that is, satisfied customers contribute to employee satisfaction and vice versa. Here, finally, is the foundation for a powerful strategic service vision, a model on which any manager can build more focused operations and marketing capabilities. For example, the authors demonstrate how, in Banc One's operating divisions, a direct relationship between customer loyalty measured by the "depth" of a relationship, the number of banking services a customer utilizes, and profitability led the bank to encourage existing customers to further extend the bank services they use. Taco Bell has found that their stores in the top quadrant of customer satisfaction ratings

outperform their other stores on all measures. At American Express Travel Services, offices that ticket quickly and accurately are more profitable than those which don't. With hundreds of examples like these, the authors show how to manage the customer-employee "satisfaction mirror" and the customer value equation to achieve a "customer's eye view" of goods and services. They describe how companies in any service industry can (1) measure service profit chain relationships across operating units; (2) communicate the resulting self-appraisal; (3) develop a "balanced scorecard" of performance; (4) develop a recognitions and rewards system tied to established measures; (5) communicate results company-wide; (6) develop an internal "best practice" information exchange; and (7) improve overall service profit chain performance. What difference can service profit chain management make? A lot. Between 1986 and 1995, the common stock prices of the companies studied by the authors increased 147%, nearly twice as fast as the price of the stocks of their closest competitors. The proven success and high-yielding results from these high-achieving companies

will make The Service Profit Chain required reading for senior, division, and business unit managers in all service companies, as well as for students of service management. *Working Mother* Springer Science & Business Media

In the beginning, the World Wide Web was exciting and open to the point of anarchy, a vast and intimidating repository of unindexed confusion. Into this creative chaos came Google with its dazzling mission—"To organize the world's information and make it universally accessible"—and its much-quoted motto, "Don't be evil." In this provocative book, Siva Vaidhyanathan examines the ways we have used and embraced Google—and the growing resistance to its expansion across the globe. He exposes the dark side of our Google fantasies, raising red flags about issues of intellectual property and the much-touted Google Book Search. He assesses Google's global impact, particularly in China, and explains the insidious effect of Googlization on

the way we think. Finally, Vaidhyanathan proposes the construction of an Internet ecosystem designed to benefit the whole world and keep one brilliant and powerful company from falling into the "evil" it pledged to avoid.

The world of work has changed. People in previous generations tended to pick one professional path and stick to it. Switching companies every few years wasn't the norm, and changing careers was even rarer. Today's career trajectories aren't so scripted and linear. Technology has given rise to new positions that never before existed, which means we are choosing from a much broader set of career options—and have even more opportunities to find work that lights us up. However, we don't discover and apply for jobs the same way anymore, and employers don't find applicants the way they used to. Isn't it about time we had a playbook for navigating it all? Kathryn Minshew and Alexandra Cavoulacos, founders of the popular career website TheMuse, offer the definitive

guide to the modern workplace. Through quick exercises and structured tips, you will learn: - The New Rules for finding the right path: Sift through, and narrow today's ever-growing menu of job and career options, using the simple step-by-step Muse Method. - The New Rules for landing the perfect job: Build your personal brand, and communicate exactly how you can contribute and why your experience is valuable in a way that is sure to get the attention of your dream employer. Then ace every step of the interview process, from getting a foot in the door to negotiating your offer. - The New Rules for growing and advancing in your career: Mastering first impressions, the art of communication, networking, managing up and other "soft" skills – and make it obvious that whatever level you're at, you're ready to get ahead. Whether you are starting out in your career, looking to advance, navigating a mid-career shift, or anywhere in between, this is the book you need to thrive in the New World of Work.

But as mathematician and data scientist Cathy O’Neil reveals, the mathematical models being used today are unregulated and uncontestable, even when they’re wrong. Most troubling, they reinforce discrimination—propping up the lucky, punishing the downtrodden, and undermining our democracy in the process. Welcome to the dark side of Big Data.

Possibly no one on Earth personally knows as many people at the helms of nations, businesses, religions, charitable organizations, and institutes of learning as Henry O. Dormann—founder, chairman, and editor-in-chief of LEADERS magazine, whose circulation is limited to such leading figures. Here, he brings together the first-ever exclusive collection of wisdom and inspiration addressed to young people from the world's most influential people—advice on leadership, goal achievement, public service, and life journeys. Letters from Leaders is a beautifully designed book comprising nearly eighty letters from those who have done so much to shape our world today—from Muhammad Ali to four U.S. Presidents, Mikhail Gorbachev, King Bhumibol Adulyadej of Thailand and King Abdullah II of Jordan, and the Dalai Lama; from Cathie Black to T. Boone Pickens, Muriel Siebert, and Donald Trump. The letters, some as facsimile reproductions of handwritten originals, are each introduced with a biographical note by Dormann. As put so aptly by Dormann in his introduction, "All kings and queens, presidents, Nobel Laureates, chairmen and chairwomen, CEOs, and world leaders have one thing in common: They want what they have achieved to be useful

and to be handed over to a younger generation. . . . The leaders in these pages have 'lived' and now offer their experiences as a treasure to ambitious and open minds—those who want to be something in life."

Technological growth and grander incorporation of economies along with global supply chains have been an advantage for several workers armed with high skills and in growing occupations. However, it is a challenge for workers with low or obsolete skills in diminishing zones of employment. Business models that are digitalized hire workers as self-employed instead of

standard employees. People seem to be working and living longer, but they experience many job changes and the peril of skills desuetude. Inequalities in both quality of job and earnings have increased in several countries. The depth and pace of digital transformation will probably be shocking. Industrial robots have already stepped in and artificial intelligence is making its advance too. Globalization and technological change predict the great potential for additional developments in labor market performance. But people should be ready for change. A progression of creative annihilation is probably under way, where some chores are either offshored or given to robots. A better world of for jobs cannot be warranted – a lot will be contingent on devising the right policies and institutes in place.

What is out there? Do you believe in life outside academia? For researchers who consider a career switch, the open job market often feels as remote and uncertain as dark wood, or as outer space. To be happy at work, you need to find a job that is aligned with your values, gives you a feeling of belonging, purpose, appreciation, and some level of both safety and excitement. There are so many conditions that need to be met to develop a sense of

job satisfaction! For those contemplating a transition from advanced studies in academia, an overriding question looms, with far-reaching practical and emotional consequences: How do I navigate and accomplish the change as smoothly as possible and with a minimum of stress? The purpose of this book is to give you an overview of what you are capable (and might not even think of!) after completing a PhD, and a vista of directions you might consider to develop a happy, fulfilling professional life. It explores not only the scope of high-level employment in which PhDs usually excel, but also provides broad descriptions of the tribes that have formed in the job market and their characteristic behaviors. Do you fit the tribe of corporate denizens committed to the analysis and improvement of operations in accordance with prescribed goals? Or perhaps you are drawn to the tribe of entrepreneurs who create goals of their own? In this book, you will find open questions and self-discovery exercises which will help to clarify your true inclinations and their tribal affinities. You might find something really beautiful in these explorations and their implications for your path into the future! Dr. Natalia Bielczyk is an entrepreneur, researcher, author, and philanthropist. She graduated from the College of Inter-Faculty Individual Studies in Mathematics and Natural Sciences at the University of Warsaw, Poland, with a triple

MS title in Physics, Mathematics, and Psychology. Thereafter, she obtained a PhD in Computational Neuroscience at the Donders Institute for Brain, Cognition, and Behavior in Nijmegen, the Netherlands. In 2018, she launched a public foundation, Stichting Solaris Onderzoek en Ontwikkeling, aiming to help early career researchers find new careers in industry. She also owns Welcome Solutions, a company developing new tools and practices to help professionals in navigating on the job market, and in finding/creating their dream jobs. Even though she chose to work in the open market, she is still a researcher in her free time and has a strong belief in the compatibility of science and entrepreneurship.
