""The report is essential reading for policy makers, government workers, and academics pursuing the goal of equitable, sustainable development across the world."" - N. R. Narayana Murthy, Chairman and Chief Mentor Infosys Technologies Ltd. Information and communication technology (ICT) is rapidly evolving, changing rich and poor societies alike. It has become a

powerful tool for participating in the global economy and for offering new opportunities for development efforts. ICT can and should advance economic growth and reduce poverty in developing countries. It has been 20 years since the first telephone operator was privatized, a little over 10 since the World Wide Web emerged, and 5 since the telecommunications bubble burst. How have the ICT sector and its role in development evolved? What have we learned? How can we move forward? Information and Communications for Development 2006: Global Trends and Policies contains lessons from both developed and developing countries. It examines the roles of the public and private

---

sectors, identifying the challenges and the benefits of adopting and expanding ICT use. The report assesses topics essential to building an information society, including investment, access, diffusion, and country policies and strategies. Assessing what has worked, what hasn't, and why, this report is an invaluable guide for understanding how to capture the benefits of ICT around the world."

An intimate, revealing look at one artist ' s journey from self-censorship to full expression As one of the most celebrated musicians in the world, Alicia Keys has enraptured the globe with her heartfelt lyrics, extraordinary vocal range, and soul-stirring piano compositions. Yet away from the spotlight, Alicia has grappled with private heartache—over the challenging and complex relationship with her father,

---

the people-pleasing nature that characterized her early career, the loss of privacy surrounding her romantic relationships, and the oppressive expectations of female perfection. Since Alicia rose to fame, her public persona has belied a deep personal truth: she has spent years not fully recognizing or honoring her own worth. After withholding parts of herself for so long, she is at last exploring the questions that live at the heart of her story: Who am I, really? And once I discover that truth, how can I become brave enough to embrace it? *More Myself* is part autobiography, part narrative documentary. Alicia's journey is revealed not only through her own candid recounting, but also through vivid recollections from those who have walked alongside her. The result is a 360-degree perspective on Alicia's path, from her girlhood in Hell's Kitchen and Harlem to the process of growth and self-discovery that we all must navigate. In *More Myself*, Alicia shares her quest for truth—about herself, her past, and her shift from sacrificing her spirit to celebrating her worth. With the raw honesty that epitomizes Alicia's artistry, *More Myself* is at once a riveting account and a clarion call to readers: to define themselves in a world that rarely encourages a true and unique identity.

From Tokyo to Helsinki, Manhattan to Manila, Howard Rheingold takes us on a journey around the world for a preview of the next techno-cultural shift—a shift he predicts will be

---

as dramatic as the widespread adoption of the PC in the 1980s and the Internet in the 1990s. The coming wave, says Rheingold, is the result of super-efficient mobile communications—cellular phones, personal digital assistants, and wireless-paging and Internet-access devices that will allow us to connect with anyone, anywhere, anytime. From the amusing ("Lovegetty" devices in Japan that light up when a person with the right date-potential characteristics appears in the vicinity) to the extraordinary (the overthrow of a repressive regime in the Philippines by political activists who mobilized by forwarding text messages via cell phones), Rheingold gives examples of the fundamentally new ways in which people are already engaging in group or collective action. He also considers the dark side of this phenomenon, such as the coordination of terrorist cells, threats to privacy,

and the ability to incite violent behavior. Applying insights from sociology, artificial intelligence, engineering, and anthropology, Rheingold offers a penetrating perspective on the brave new convergence of pop culture, cutting-edge technology, and social activism. At the same time, he reminds us that, as with other technological revolutions, the real impact of mobile communications will come not from the technology itself but from how people use it, resist it, adapt to it, and ultimately use it to transform themselves, their communities, and their institutions.

Rose is a princess, a Cinder, and half-human. She is the last one born of her kind, and on her twenty-first birthday, she must enter the woods and travel to find her Prince, as her sisters did before her. ". . . And we will all dance at the Grand Ball," her sisters

---

would always say. But the Human servants are keeping a secret that could prevent the Cinders from reaching their Happily Ever After....Hidden in Rose's dreams and vision are the answers of the past between Cinders and Humans, and she is quickly running out of time trying to solve their hidden messages. She knows the answer lies in her first clue--identifying an animal she has never seen before--that persistent vision of a furry white animal, holding a gold metal object and exclaiming, "Oh dear! Oh dear! I shall be too late!"

Follow the Geeks Happiness Habit Press Britain, in the mid 21st century. A new prime minister, Lev Solokov is elected. In spite of his Russian surname, he is the charismatic politician who, on the surface, appears to be just what Britain needs. But he's not what

---

Gavin needs. Gavin is a Pustoy, a human who, among countless others, Solokov's researchers has declared a soulless, subhuman race. Solokov joins a dark lineage of genocidal tyrants that have gone before him. In synthesizing his own race to persecute others, perhaps he has succeeded in a horror more insidious than any of his forebears, especially as he appears to have done so with both overwhelming public blessing and encouragement. Or at least he would have, if not for the increasing din of the Pustoy protesting outside his offices. Chosen at random owing to his position as a forefront campaigner for the rights of the Pustoy, Gavin is framed for a crime he didn't commit and is forced to go on the run, and so Solokov in one fell swoop kills any budding sympathy the people may have had for the Pustoy, and would appear to have silenced one of his loudest

protestors. Just who are the Pustoy of this world? The persecutors or the persecuted? Will Gavin remain a hunted scapegoat? Is Solokov acting for the greater good; are the Pustoy really devoid of a soul? More importantly, how far away is this future, really? Phillippe Blenkiron's conceptual poetry collection demands these questions of the reader, whilst offering an unflinching examination of the human psyche, exploring the clouded moral hues between black and white, between right and wrong, that exist inside all of us. For fans of "1984," "Brave New World," and other greats of dystopian fiction, Philippe Blenkiron's debut poetry collection is shocking, unsettling, and closer to real-life than we dare admit...

"Why does every one of my friends have an eating disorder, or, at the very least, a screwed-up approach to food and fitness?" writes journalist Courtney E. Martin. The new world culture of eating disorders and food and body issues affects virtually all -- not just a rare few -- of today's young women. They are your sisters, friends, and colleagues -- a generation told that they could "be anything," who instead heard that they had to "be everything." Driven by a relentless quest for perfection, they are on the verge of a breakdown, exhausted from overexercising, binging, purging, and depriving themselves to attain an unhealthy ideal. An emerging new talent, Courtney E. Martin is the voice of a young generation so obsessed with

---

being thin that their consciousness is always focused inward, to the detriment of their careers and relationships. Health and wellness, joy and love have come to seem ancillary compared to the desire for a perfect body. Even though eating disorders first became generally known about twenty-five years ago, they have burgeoned, worsened, become more difficult to treat and more fatal (50 percent of anorexics who do not respond to treatment die within ten years). Consider these statistics: Ten million Americans suffer from eating disorders. Seventy million people worldwide suffer from eating disorders. More than half of American women between the ages of eighteen and twenty-five would prefer to be run over by a truck or die young than be fat. More than two-thirds would rather be mean or stupid. Eating disorders have the highest mortality rate of any psychological disease. In *Perfect Girls, Starving Daughters*, Martin offers original research from the front lines of the eating disorders battlefield. Drawn from more than a hundred interviews with sufferers, psychologists, nutritionists, sociocultural experts, and others, her exposé reveals a new generation of "perfect girls" who are obsessive-compulsive, overachieving, and self-sacrificing in multiple -- and often dangerous -- new ways. Young women are "told over and over again," Martin notes, "that we can be anything. But in those affirmations, assurances, and assertions was a concealed pressure, an unintended message: You are special. You are worth something. But you need to be perfect to live up to that specialness." With its vivid and often heartbreaking personal stories, *Perfect Girls, Starving Daughters* has the power both to shock and to educate. It is a

true call to action and cannot be missed.

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to

include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs [More Myself](#) Allen & Unwin Academic
