This open access book constitutes the proceedings of the 19th International Conference on Agile Software Development, XP 2018, held in Porto, Portugal, in May 2018. XP is the premier agile software development conference combining research and practice, and XP 2018 provided a playful and informal environment to learn and trigger discussions around its main theme – make, inspect, adapt. The 21 papers presented in this volume were carefully reviewed and selected from 62 submissions. They were organized in topical sections named: agile requirements; agile testing; agile transformation; scaling agile; human-centric agile; and continuous experimentation.

Civil engineers, mechanical engineers, structural engineers, marine engineers, chemical engineers, systems engineers, and engineering support personnel have a lot in common when they want to create a resume, and this book shows resumes and cover letters of individuals who want to work in the field. For those who seek federal employment, there's a special section showing how to create federal resumes and government applications. Since many technical types aren't writers, this comes as a special gift: select a winning format, plug in your background specs, and away you go. It's that easy--with REAL RESUMES in hand. - The Midwest Book Review 1-885288-42-5

The Verizon leadership team stands apart from most leadership teams today in their willingness repeatedly to put the enterprise before the individual. At first blush, this might look like a hopelessly old-fashioned notion in the age of the selfie. Yet, I would argue this is a trait that future leaders and boards of directors across industries would do well to understand and embrace. Seidenberg not once but twice in the service of company shareholders and employees subordinated himself and put off taking sole leadership of the company to advance the enterprise's odds of success. And many others in this story exhibited the same trait to help build this industry-leading enterprise. They understood that the risk of not acting and thereby destroying value during a period of accelerating technological change and industry consolidation—a situation faced by leadership teams around the world today—was much greater than the risk of stepping in as No. 2 or co-CEO. In my 50 years of experience, it is a rare leadership team that will subordinate itself for the benefit of the industry, customers and the company. That principle, that the company comes first, the individual second, is what will define successful leadership teams of the future. Multiple leadership principles, some new, some timeless, emerge from this narrative and will be of great use to the next generation of leaders across industries and around the world. By taking a look at a company that successfully executed exponential transformation, we can take the strategies of Verizon leaders and apply them to our own experiences.—Ram Charan

Thought leaders in business and academia discuss how partnering on STEM education can create a pipeline of talent for the future. Aligning corporate, education, and community partners requires that we rethink and redesign the system that supports Science, Technology, Engineering and Mathematics (STEM) education and workforce preparedness. What's at stake? Nothing less than the sustainability of our schools, the innovative engines of our businesses, the prosperity of communities, and the global competitiveness of our economies. Advancing A Jobs Driven Economy is a call to action that provides the framework for how business, education, and communities can cultivate a sustainable pipeline of STEM talent.

The first wave of the Millennial Generation—born between 1980 and 2001—is entering the work force, and employers are facing some of the biggest management challenges they've ever encountered. They are trying to integrate the most demanding and most coddled

generation in history into a workplace shaped by the driven baby-boom generation. Like them or not, the millennials are America future work force. They are actually a larger group than the boomers—92 million vs. 78 million. The millennials are truly trophy kids, the pride and joy of their parents who remain closely connected even as their children head off to college and enter the work force. Millennials are a complex generation, with some conflicting characteristics. Although they're hard working and achievement oriented, most millennials don't excel at leadership and independent problem solving. They want the freedom and flexibility of a virtual office, but they also want rules and responsibilities to be spelled out explicitly. "It's all about me," might seem to be the mantra of this demanding bunch of young people, yet they also tend to be very civic-minded and philanthropic. This book will let readers meet the millennials and learn how this remarkable generation promises to stir up the workplace and perhaps the world. It provides a rich portrait of the millennials, told through the eyes of millennials themselves and from the perspectives of their parents, educators, psychologists, recruiters, and corporate managers. Clearly, the millennials represent a new breed of student, worker, and global citizen, and this book explores in depth their most salient attributes, particularly as they are playing out in the workplace. It also describes how companies are changing tactics to recruit millennials in the Internet age and looks at some of this generation's dream jobs.

The Trillion Dollar Shift Post Hill Press
Winner of the Gold Axiom Business Book Award 2019 in the Philanthropy / Non Profit / Sustainability category. Over the past 30 years, the world has seen great social improvements. Technology has been developing at an enormous pace and is helping to solve our most pressing social and environmental challenges. Yet, despite this success, our current model of development is still deeply problematic. Natural disasters triggered by climate change have doubled since the 1980s, violence and armed conflict now cost more than 13 percent of GDP, social inequality and youth unemployment is worsening around the world, and climate change threatens the global population with tremendous environmental as well as social problems. Using the United Nations Sustainable Development Goals as a framework, this book sets out how business and capital now have a real opportunity to help resolve these problems. With clear and plentiful examples and cases of how businesses are making a difference, relevant facts and figures to support the cases, and inspiring and instructional information on how businesses can create sustainable value, this highly readable book is a must-read for businesses (large and small) that wish to genuinely support the delivery of the SDGs. The Paris Climate Agreement and the Sustainable Development Goals (SDGs) drive change and offer a narrative and an opportunity to all to speak in one language on sustainability. They provide us with a clear set of targets for 2030. Through following the SDGs, opportunities abound for business and capital to unlock markets which offer endless potential for profit while at the same time working towards the Sustainable Development Goals. This book illustrates for business how to make the much-needed Trillion Dollar Shift.
