### Engineering Technologist (NICET) W. W. Norton & Company

I am often asked the question, "Should I get my PE license or not?"

Unfortunately the answer is, Probably. First let's take a look at the licensing process and understand why it exists, then take a look at extreme situations for an attempt at a yes/no answer, and finally

consider the exams. All 50 have a constitutionally defined responsibility to protect the public. From an engineering point of view, as well as many other professions, this responsibility is met by the process of licensure and in our case the Professional Engineer License. Though there are different experience requirements for different states, the meaning of the license is common. The licensee demonstrates academic competency in the Fundamentals of Engineering by examination (Principles and Practices at PE time). The licensee demonstrates qualifying work experience (at PE time). The licensee ascribes to the Code of Ethics of the NSPE, and to the laws of the state of registration. Having presented these qualities the licensee is certified as an Intern

Engineer, and the state involved has fulfilled its constitutionally defined responsibility to protect the public.

We are two engineers who took and passed the first revision of the updated 2017 PE exam for Mechanical Engineering-Machine Design and Materials, and we wanted to provide a resource to help fellow engineers study more efficiently for the test. This practice exam contains 80 problems we created that we believe are an excellent representation of the test. Looking back, we can see that working problems similar to the exam was the most beneficial thing we did to prepare. They got us familiar with the structure of the PE exam and showed us which topics we needed to study more; unfortunately, most of the materials we used to study had practice problems that were either too complicated, in strange formats, or led us to study unnecessary concepts. In other words, this is the study material that we wish we had while studying for the exam.
