"As [Disconnect] shows, cell phones may actually be doing damage to far more than our attention spans—and could, in fact, be killing us."

-Salon.com. Since the invention of radar, cell phone radiation was assumed to be harmless because it wasn't like X-rays. But a sea change is

now occurring in the way scientists think about it. The latest research ties this kind of radiation to lowered sperm counts, an increased risk of Alzheimer's, and even cancer. In *Disconnect*, National Book Award finalist Devra Davis tells the story of the dangers that the cell phone industry is knowingly exposing us—and our children—to in the pursuit of profit. More than five billion cell phones are currently in use, and that number increases every day. Synthesizing the findings and cautionary advice of leading experts in bioelectrical magnetism and neuroscience, Davis explains simple safety measures that no one can afford to ignore.

defenseless worlds, and destroy all opposition. However, the Imperial Navy underestimated Rebel Alliance fighter pilots, who flew X-wing, Y-wing, A-wing, U-wing and B-wing starfighters, and whatever else they could obtain to fight their Imperial enemies. Decades later, Resistance pilots would fly next-generation versions of Rebel starfighters against the First Order. The Rebel Starfighters Owners' Workshop Manual presents a thorough history of the starfighters that served the Rebel Alliance and the Resistance. The history includes design origins, production, and modifications for each Rebel starfighter, and is fully illustrated with numerous photographs, schematics, exploded diagrams, and computer-generated artwork by Star Wars vehicle experts Chris Reiff and Chris Trevas. Text is by Ryder Windham, author and co-author of more than 70 Star Wars books. This Haynes Manual is the most thorough technical guide to Rebel starfighters available, and is fully authorized and approved by Lucasfilm.

A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and caf  s. When Morris published Last Letters from Hav in 1985, it was short-listed for the Booker Prize. Here it is joined by Hav of the Myrmidons, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris' s only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.
