An award-winning scientist offers his unorthodox approach to childrearing:

"Parentology is brilliant, jaw-droppingly

funny, and full of wisdom...bound to change your thinking about parenting and its conventions” (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

This book is a classic example of how media organizations misuse, violate laws in connivance with crony capitalists, pliant law firms and politicians to amass personal wealth. This is a narrative of how two Promoters of NDTV along with key top management colluded over the years with government functionaries and politicians to break laws, evade taxes and deceive shareholders of a public listed company. All this obviously through political patronage and "wheeling-and-dealing" as part of the Lutyens club and how they created a biased public discourse for a select elite class. In the minds of the Indian citizen, there is a space and respect for media. Using the halo of journalism and under the garb of Freedom of Press, media owners misuse their position and in the end, degrade the values of journalism. On several occasions media became the tool of false propaganda, blackmailing and illegal money making with the blessing of uncouth politicians and corporate icons with hidden agendas. This ought to be exposed and that is the reason for this book.
