This in-depth guide reveals the art of mobile forensics investigation with comprehensive coverage of the entire mobile forensics investigation lifecycle, from evidence collection through advanced data analysis to reporting and presenting findings. Mobile Forensics Investigation: A Guide to Evidence Collection, Analysis, and Presentation leads examiners through the mobile forensics investigation process, from isolation and seizure of devices, to evidence extraction and analysis, and

finally through the process of documenting and presenting findings. This book gives you not only the knowledge of how to use mobile forensics tools but also the understanding of how and what these tools are doing, enabling you to present your findings and your processes in a court of law. This holistic approach to mobile forensics, featuring the technical alongside the legal aspects of the investigation process, sets this book apart from the competition. This timely guide is a much-needed resource in today's mobile computing landscape. Notes offer personal insights from the author's years in law enforcement Tips highlight useful mobile forensics software applications, including open source applications that anyone can use free of charge Case studies document actual cases taken from submissions to the author's podcast series Photographs demonstrate proper legal protocols, including seizure and storage of devices, and screenshots showcase mobile forensics software at work Provides you with a holistic understanding of mobile forensics

The cell phone is the fastest-selling consumer electronic in the world. On a global basis, over 800 million cellular telephones are sold yearly. More camera-equipped cell phones are sold each year than stand alone digital cameras. Rapid development of new technologies is leading to ever more versatile, multipurpose mobile devices, including 3G Internet-enabled cell phones and PDAs. Meanwhile, wireless networking and wireless Internet access are developing and expanding on a global basis at a rapid rate. Booming technologies include such 802.11 standards as Wi-Fi and WiMax, as well as Ultra Wide Band (UWB) and Bluetooth. Telematics, intelligent transportation systems (ITS) and satellite radio will soon create an entertainment, navigation and communications revolution within automobiles and trucks. Meanwhile, RFID (radio frequency identification) will revolutionize wireless tracking, inventory and logistics at all levels, from manufacturing to shipping to retailing. These developments are creating challenges for legacy companies and opportunities for nimble marketers and managers. Plunkett's Wireless, Wi-Fi, RFID & Cellular Industry Almanac 2008 covers such sectors. Our coverage includes business trends analysis and industry statistics. We also include a wireless and cellular business glossary and a listing of industry contacts, such as industry associations and government agencies. Next, we profile hundreds of leading companies. Our 350 company profiles include complete business descriptions and up to 27 executives by name and title.

Unfortunately, many manufacturers of school-related products deserve an "F" for selling items laced with chemicals that are linked to developmental and learning problems, among other ailments. Some of these products also take a toll on the health of our planet, adding to the mountains of trash and waste that strain our resources and releasing toxic chemicals that pollute air, water, and soil. The good news is that parents, public health leaders, and advocacy groups have been calling for safer products--and marketers are listening. So there are more and more options for smart choices that protect your family's health. To help you navigate the sometimes confusing array of backpacks, book bags, lunch boxes, art supplies, and other educational accessories--and separate the truly healthful from the overly hyped--the editors of Rodale Books editors have compiled this unique shopping guide to the healthiest, safest, kid-friendliest options on the market today. Based on extensive research and interviews and advice from child health experts, environmental specialists, and concerned parents, Rodale's Nontoxic Back-to-School Shopping Guide covers more than 150 specific products, provides dozens of creative ideas for materials and sources, and offers important guiding principles for evaluating other items you may find on your own. It's the ultimate handbook for equipping your kids to have a safe, healthy, nontoxic school year!

Like a personal trainer for the digital age, Abby Stokes is the hand-holding, motivating expert that newbies--specifically older newbies--turn to when they want to become digitally literate. And her book, *Is This Thing On?*, is as smart, comprehensive, reassuring, and jargon-free as she is: the epitome of user-friendly. And it is now completely revised and updated to keep pace with the fast-changing digital landscape, covering tablets, apps, video streaming, social media, and much more. With the skill and assurance of a teacher who for over 20 years has personally taught computer skills to thousands of seniors and technophobes, Stokes covers it all: How to choose, buy, and start using the computer or tablet that's just right for you, plus how to set everything up for maximum comfort and safety. How to connect to the Internet, sign up for email, understand and use search engines, and get started with essential skills like word processing and text messaging. How to choose, buy, and start using a smartphone. How to take and share digital photographs and videos. How to discover online communities and participate in social media like Facebook, Instagram, Pinterest, Twitter, YouTube, and blogs. How to explore the world of apps, online music, streaming movies, and ebooks. And, importantly, online security-- including what to do when things go wrong. Appendices include both Apple and PC keyboard shortcuts and 200 recommended websites and 100 apps; there are FAQs at the end of each chapter and tips and tricks throughout. An all-new companion website--AskAbbyStokes.com--will include video tutorials explaining the latest technologies.

The Complete Android Guide 2nd Edition Consumer Reports Books
Launch your career or business in video podcasting. Are you looking for a job in video podcasting? Anyone with a digital video camcorder, microphone, computer and some technical savvy can launch an Internet video podcast show to inform, direct or enlighten. You can offer foresight, insight, or hindsight. Open a business or find a job creating and delivering digital video recordings--usually free--as podcasts. If you want to make money with video podcasting, offer to sell a sponsor's publicity and advertising on your video, or an author's creative works, interviews, or sermons. You can even show people how to fill out tax forms using a video podcast for instruction on most any subject people can learn independently. People who subscribe to video podcasts usually want to view for free. You can charge for a course to train or teach a class by video lecture and/or demonstration, but what if you want an actual paid job in video podcasting? And can you make more money in video than in the older, audio MP3 file 'radio' podcasting? Careers in video podcasting are beginning to bloom as seen by a variety of podcasting associations, news publications, and career information. Even job listings unrelated to podcasting are 'broadcast' by RSS

feeds. Create your own job in podcasting by showing others how to find new trends and applications in their careers. Make informational, how-to, and motivational video podcasts. What if you want to use video podcasting to actually get hired? Are there jobs right now in video podcasting? Or is the field still primarily for trade publication publishers, syndicators, and video entrepreneurs on the Web?
