From 9/11 to Charlie Hebdo along with Sony-pocalypse and DARPA's \$2 million Cyber Grand Challenge, this book examines counterterrorism and cyber security history, strategies and technologies from a thought-provoking approach that encompasses personal experiences, investigative journalism, historical and current events, ideas from thought leaders and the make-believe of Hollywood such as 24, Homeland and The Americans. Return from the Stars Springer

An astronaut returns to Earth after a 10-year mission and finds a society that he barely recognizes in science fiction novel by the Solaris author, whose works "make our weary universe seem pale and undistinguished by comparison" (The Washington Post). Stanislaw Lem's *Return from the Stars* recounts the experiences of Hal Bregg, an astronaut who returns from an exploratory mission that lasted ten years—although because of time dilation, 127 years have passed on Earth. Bregg finds a society that he hardly recognizes, in which danger has been eradicated. Children are "betriated" to remove all aggression and violence—a process that also removes all impulse to take risks and explore. The people of Earth view Bregg and his crew as "resuscitated Neanderthals," and pressure them to undergo betriation. Bregg has serious difficulty in navigating the new social mores. While Lem's depiction of a risk-free society is bleak, he does not portray Bregg and his fellow astronauts as heroes. Indeed, faced with no opposition to his aggression, Bregg behaves abominably. He is faced with a choice: leave Earth again and hope to return to a different society in several

hundred years, or stay on Earth and learn to be content. With *Return from the Stars*, Lem shows the shifting boundaries between utopia and dystopia.

A Jewish prenuptial agreement, formulated by Rabbi Mordechai Willig, and sponsored by The Orthodox Caucus, has been created in an effort to help resolve the problem of the agunah--the woman who has not been issued a get (a bill of divorce) from her husband and thus remains unable to marry someone else. This volume explores this fascinating subject more closely through commentary by several prominent rabbis. When signed by husband and wife, this agreement binds both parties to accept rabbinic arbitration of marital disputes when the husband and wife are not living together, and an additional document details the husband's obligation of support in the event that the couple are living apart from one another. This prenuptial agreement is endorsed by the Rabbinical Council of America.

Disrupting the cycle starts with you. No matter how conscientious we are, we carry implicit bias... which quickly turns into assumptions and then labels. Labels define our interactions with and

expectations of students. Labels contribute to student identity and agency. And labels can have a negative effect beyond the classroom. It's crucial, then, that teachers remove labels and focus on students' strengths—but this takes real work at an individual, classroom, and schoolwide scale. *Removing Labels* urges you to take an active approach toward disrupting the negative effects of labels and assumptions that interfere with student learning. This book offers: 40 practical, replicable teaching techniques—all based in research and best practice—that focus on building relationships, restructuring classroom engagement and management, and understanding the power of social and emotional learning. *Suggestions for actions* on an individual, classroom, and schoolwide level. Ready-to-go tools and student-facing printables to use in planning and instruction. *Removing Labels* is more than a collection of teaching strategies—it's a commitment to providing truly responsive education that serves all children. When you and

your colleagues take action to prevent negative labels from taking hold, the whole community benefits.

the company, Geoffrey Cain offers a penetrating look behind the curtains of the biggest company nobody in America knows. Seen for decades in tech circles as a fast follower rather than an innovation leader, Samsung today has grown to become a market leader in the United States and around the globe. They have captured one quarter of the smartphone market and have been pushing the envelope on every front. Forty years ago, Samsung was a rickety Korean agricultural conglomerate that produced sugar, paper, and fertilizer, located in a backward country with a third-world economy. With the rise of the PC revolution, though, Chairman Lee Byung-chul began a bold experiment: to make Samsung a major supplier of computer chips. The multimillion- dollar plan was incredibly risky. But Lee, wowed by a young Steve Jobs, who sat down with the chairman to offer his advice, became obsessed with creating a tech empire. And in Samsung Rising, we follow Samsung behind the scenes as the company fights its way to the top of tech. It is one of Apple’s chief suppliers of technology critical to the iPhone, and its own Galaxy phone outsells the iPhone. Today, Samsung employs over

300,000 people (compared to Apple’s 80,000 and Google’s 48,000). The company’s revenues have grown more than forty times from that of 1987 and make up more than 20 percent of South Korea’s exports. Yet their disastrous recall of the Galaxy Note 7, with numerous reports of phones spontaneously bursting into flames, reveals the dangers of the company’s headlong attempt to overtake Apple at any cost. A sweeping insider account, Samsung Rising shows how a determined and fearless Asian competitor has become a force to be reckoned with. *IoT and Edge Computing for Architects* Lulu.com This book, written and edited by members of the International Game Developers Association (IGDA) Game Writing Special Interest Group, follows the acclaimed Professional Techniques for Video Game Writing to deliver practical advice from seasoned veterans on the special challenges of writing for first-person shooter games (FPS), role-playing games (R **Amending the Wisconsin Constitution** PC Mag The immunity code presents an immune centric approach to aging and health, and how to slow it dramatically in easy, practical steps. School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. *Overcoming School Refusal* helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include: • types of

school refusers • why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal

In the early nineteenth century China remained almost untouched by British and European powers - but as new technology started to change this balance, foreigners gathered like wolves around the weakening Qing Empire. Would the Chinese suffer the fate of much of the rest of the world, carved into pieces by Europeans? Or could they adapt rapidly enough to maintain their independence? This important and compelling book explains the roots of China's complex relationship with the West by illuminating a dramatic, colourful and sometimes shocking period of the country's history.

A penetrating indictment of how

today's largest tech companies are hijacking our data, our livelihoods, our social fabric, and our minds—from an acclaimed Financial Times columnist and CNN analyst WINNER OF THE PORCHLIGHT BUSINESS BOOK AWARD • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY FOREIGN AFFAIRS AND EVENING STANDARD “Don’t be evil” was enshrined as Google’s original corporate mantra back in its early days, when the company’s cheerful logo still conveyed the utopian vision for a future in which technology would inevitably make the world better, safer, and more prosperous. Unfortunately, it’s been quite a while since Google, or the majority of the Big Tech companies, lived up to this founding philosophy. Today, the utopia they sought to create is looking more dystopian than ever: from digital surveillance and the loss of privacy to the spreading of misinformation and hate speech to predatory algorithms targeting the weak and vulnerable to products that have been engineered to manipulate our

desires. How did we get here? How did these once-scrappy and idealistic enterprises become rapacious monopolies with the power to corrupt our elections, co-opt all our data, and control the largest single chunk of corporate wealth—while evading all semblance of regulation and taxes? In *Don't Be Evil*, Financial Times global business columnist Rana Foroohar tells the story of how Big Tech lost its soul—and ate our lunch. Through her skilled reporting and unparalleled access—won through nearly thirty years covering business and technology—she shows the true extent to which behemoths like Google, Facebook, Apple, and Amazon are monetizing both our data and our attention, without us seeing a penny of those exorbitant profits. Finally, Foroohar lays out a plan for how we can resist, by creating a framework that fosters innovation while also protecting us from the dark side of digital technology. Praise for *Don't Be Evil* “At first sight, *Don't Be Evil* looks like it's doing for Google what muckraking journalist Ida Tarbell did for

Standard Oil over a century ago. But this whip-smart, highly readable book's scope turns out to be much broader. Worried about the monopolistic tendencies of big tech? The addictive apps on your iPhone? The role Facebook played in Donald Trump's election? Foroohar will leave you even more worried, but a lot better informed.”—Niall Ferguson, Milbank Family Senior Fellow at the Hoover Institution, Stanford, and author of *The Square and the Tower*

This book is a legacy to our children and grandchildren..However, since they have not been incarnated on this Earth yet, it is our pleasure to share it with the reader!Dear reader, The journey you are about to embark on is of an abstruse nature. In front of you is a collection of imaginative drawings or comic strips, if you will. These visions have been summoned from the unconscious and subconscious mind of my husband. All of the drawings were drawn in a matter of minutes with both his left and right hand (both brain hemispheres) simultaneously.

The surreal images appear on paper as some sort of auto-drawing, where the subject/theme/dreamscape of the drawing is not premeditated. It is drawing in the moment, while the pen is gliding over the paper..(no pencils, no erasing, no pausing to think.) Pure stream of (un)consciousness; instant mind to paper.The original drawings were created by him in black ink on white paper, to later be scanned into the computer and colored digitally by moi. It has become a collaborative work of two minds working together. The characters hidden in the book are unique, have a life and a world of their own and are inviting you to take a holiday in their realm. Lose your sense of time and urgency getting lost in reverie. Find the hidden riddles and questions each vision postulates. Get lost in a dreamworld, where the surreal and abstract reign whilst all the rules of conventional art and aesthetic are parodied. Let the characters and their environments tickle your own imagination while you watch the them live similar lives to ours: they wander, they wonder, they are confused and pensive, they get angry and fall in love, they have their own dreams within dreams...they are just like us but just a bit strange and silly.

They wear their emotions and thoughts on their visages. Their appearances merge with their thoughts. Inner space and outer space are married on paper. Welcome to our world! the White Bread couple
