One of our "best known and most influential business scholars" (Boston Globe), best-selling author Rosabeth Moss Kanter tackles America's most urgent domestic issue. Americans are stuck. We live with travel delays on congested roads, shipping delays on clogged railways, and delays on repairs, project approvals, and funding due to gridlocked leadership. These delays affect us all, whether you are a daily commuter, a frequent flyer, an entrepreneur, an online shopper, a job-seeker, or a community leader. If people can't move, if goods are delayed, and if information networks can't connect, then economic opportunity deteriorates and social inequity grows. We have been stuck for too long, writes Harvard Business School professor and best-selling author Rosabeth Moss Kanter. In *Move*, Kanter visits cities and states across the country to tackle our challenges—and reveal solutions—on the roads and rails, and in our cities, skies, and the halls of Washington, D.C. We meet a visionary engineer and public servant spearheading an underwater tunnel in Miami to streamline port operations and redirect constant traffic from the city center. We see mayors partnering with large corporations and nimble entrepreneurs to unveil parking apps, bike-sharing programs, and seamless Wi-Fi networks in greener, more vibrant, more connected cities. And we learn about much-needed efforts—such as dynamic tolls on highways and fees based on vehicle miles traveled—to reduce our dependence on the outmoded gasoline tax in our new electric car age. It all adds up to a new vision for American mobility, where local leaders shape initiatives without waiting for Congress to act, and ambitious companies partner with governments to tackle projects that serve the public good, create jobs, and improve quality of life while providing healthy sources of investment. With unique insight and unrivaled expertise, Kanter gives us a sweeping look across America, revealing the innovative projects, vital leaders, and bold solutions that are moving our transportation infrastructure toward a cleaner, faster, and more prosperous future.

A Managerial and Social Networks Perspective John Wiley & Sons

The Verizon leadership team stands apart from most leadership teams today in their willingness repeatedly to put the enterprise before the individual. At first blush, this might look like a hopelessly old-fashioned notion in the age of the selfie. Yet, I would argue this is a trait that future leaders and boards of directors across industries would do well to understand and embrace. Seidenberg not once but twice in the service of company shareholders and employees subordinated himself and put off taking sole leadership of the company to advance the enterprise's odds of success. And many others in this story exhibited the same trait to help build this industry-leading enterprise. They understood that the risk of not acting and thereby destroying value during a period of accelerating technological change and industry consolidation—a situation faced by leadership teams around the world today—was much greater than the risk of stepping in as No. 2 or co-CEO. In my 50 years of experience, it is a rare leadership team that will subordinate itself for the benefit of the industry, customers and the company. That principle, that the company comes first, the individual second, is what will define successful leadership teams of the future. Multiple leadership principles, some new, some timeless, emerge from this narrative and will be of great use to the next generation of leaders across industries and around the world. By taking a look at a company that successfully executed exponential transformation, we can take the strategies of Verizon leaders and apply them to our own experiences.—Ram Charan
