If you're in marketing, advertising, or branding, consider this: While it used to take three television spots for a product to register with its intended audience, it can now take as many as seventy. Are people simply tuning out marketing messages? No. They're simply choosing which messages to tune in. Thanks to wireless technology, customers now have the luxury of responding (or not responding) to advertising when, where, and however they like. Leading companies such as Wal-Mart, McDonald's, Starbucks, Kellogg's, NBC, MTV, Procter & Gamble, DaimlerChrysler, and others are already reaching millions of customers, one at a time, wirelessly. The technology gives these companies an unprecedented view of buying patterns and the ability to identify and market specifically to the most likely customers. In Branding Unbound, author Rick Mathieson reveals how your business can emulate some of the most powerful and successful branding strategies in the world. In addition, Mathieson has conducted exclusive, insightful Q&As with some of the modern legends of cutting-edge marketing and business: * Seth Godin, author of Permission Marketing, Unleashing the Idea Virus, and Purple Cow, discusses permission marketing in a wireless landscape. * Tom Peters, "the father of the postmodern corporation" and author of The Brand You 50 and In Search of Excellence, offers the Peters Principles for the wireless era. * Don Peppers, world-renowned marketing thought leader and author of Enterprise One-to-One, talks about how mobility will alter the brand experience. * Christopher Locke, author of The Cluetrain Manifesto and Gonzo Marketing, presents a "Cluetrain Manifesto" for the Mobile Age. * Chet Huber, President of OnStar, describes how the demand for in-vehicle

services and information will change drivers' relationships with their vehicles. * Gary Hamel, Chairman of Strategos and author of Leading the Revolution and Competing for the Future, discusses the first priority of the wireless age: strategic transformation. * Howard Rheingold, author of Smart Mobs and The Virtual Community, champions the new "self-organized entertainment" of "flash mobs." Branding Unbound also offers a jargon-free look at current and emerging wireless technologies, examines the impact of social networking on mBranding strategy, and reveals the Top Ten Secrets of Successful Mobile Advertising. In the wireless marketing era, your brand can enjoy whole new levels of differentiation and customer recognition, while consumers benefit from on-the-spot convenience and a message individually tailored to their needs. Branding Unbound shows just how to harness the virtually limitless power of this amazing convergence of advanced technology and progressive business strategy to create the truly remarkable experience that will keep customers' attention and win their loyalty.

Americans increasingly rely on wireless phones, with nearly 40% of households now using them primarily or solely. Under federal law, the FCC is responsible for fostering a competitive wireless marketplace while ensuring that consumers are protected from harmful practices. This report discusses changes in the wireless industry since 2000, stakeholders' perceptions of regulatory policies and industry practices, and the strategies FCC uses to monitor competition. To conduct this work, the report conducted case studies in both rural and urban areas of four states; and interviewed stakeholders representing consumers, local and state agencies and officials, and various segments of the industry. Charts and tables. This is a print on demand report.

CompTIA Security + Guide to Network Security Fundamentals New York : Harper & Row

In this timely book, Rob Frieden points out the myriad ways the United States has fallen behind other countries in telecommunications. Despite the appearance of robust competition and entrepreneurship in U.S. telecom markets, there is very little of either. Because of an inattentive Congress and a misguided Federal Communications Commission unwilling to confront real problems, industry incumbents have been able to earn healthy profits while keeping the United States in the backwaters of Internet-based information, communication, and entertainment markets. At every turn regulators have tipped the scales in favor of large established companies, creating an environment that stifles innovation. As a consequence, Americans are stuck with relatively slow connectivity and with equipment that lacks features that have been standard in other countries for years. In telecommunications, the United States is a little like a third world country that is developing under a crushing bureaucracy without recognizing that the rest of the world has passed it by. Frieden shows how failure can intrude on the ability of the United States to compete and suggests how to restore its competitiveness.--Publisher's description.
