Winner of the 2014 Pura Belpré Author Award In Meg Medina's compelling new novel, a Latina teen is targeted by a bully at her new school — and must discover resources she never knew she had. One morning before school, some girl tells Piddy Sanchez that Yaqui Delgado hates her and wants to kick her ass. Piddy doesn't even know who Yaqui is, never mind what she's done to piss her off. Word is that Yaqui thinks Piddy is stuck-up, shakes her stuff when she walks, and isn't Latin enough with her white skin, good grades, and no accent. And Yaqui isn't kidding around, so Piddy better watch her back. At first Piddy is more concerned with trying to find out more about the father she's never met and how to balance honors courses with her weekend job at the neighborhood hair salon. But as the harassment escalates, avoiding Yaqui and her gang starts to take over Piddy's life. Is there any way for Piddy to survive without closing herself off or running away? In an all-too-realistic novel, Meg Medina portrays a sympathetic heroine who is forced to decide who she really is.

Innovation in information and communication technology (ICT) fuels the growth of the global economy. How ICT markets evolve depends on politics and policy, and since the 1950s periodic overhauls of ICT policy have transformed competition and innovation. For example, in the 1980s and the 1990s a revolution in communication policy (the introduction of sweeping competition) also transformed the information market. Today, the diffusion of Internet, wireless, and broadband technology, growing modularity in the design of technologies, distributed computing infrastructures, and rapidly changing business models signal another shift. This pathbreaking examination of ICT from a political economy perspective argues that continued rapid innovation and economic growth require new approaches in global governance that will

reconcile diverse interests and enable competition to flourish. The authors (two of whom were architects of international ICT policy reforms in the 1990s) discuss this crucial turning point in both theoretical and practical terms.
