Mergent Public Utility Manual Apress

A media and advertising CEO explains how his world shapes ours The TV program coming into our living rooms isn't free. It's a simple Faustian bargain consumers have made but one with enormous implications. It means that David Verklin, CEO of one of the world's largest ad-buying companies, and his clients—the world's largest advertisers—control what TV programs get aired, what magazines get published, and how Google and Yahoo stay in (very healthy) business. In Watch This, Listen Up, Click Here, Verklin and Kanner expose the inner workings of the media, marketing, and advertising industries. Readers will learn why their favorite shows get cancelled, why Oprah gives away cars, and how money, people, politics, and new technologies are transforming TV, the Internet, radio, magazines, and other media Americans consume every day. David Verklin (New York, NY) is CEO of Carat Americas, the world's largest independent media buying operation. He frequently speaks to executives in marketing, media, and management. Bernice Kanner (d. 2006) was a marketing expert and author for 13 years of New York magazine's "On Madison Avenue" column.

100+ Practical jQuery Recipes for Solving Your Real-World Web and Mobile Development Challenges! jQuery makes it easier than ever for developers to build exceptionally robust, cross-platform websites and mobile apps. jQuery, jQuery UI, and jQuery Mobile: Recipes and Examples is a practical "cookbook," packed with realistic, easy-to-use solutions for making the most of jQuery Core, jQuery UI, plugins, and jQuery Mobile. This guide brings together more than one hundred self-contained, downloadable examples, each with an in-depth explanation of how the code works and how to adapt it for your own needs. Pioneering web/mobile developers Adriaan de Jonge and Phil Dutson present examples you can apply immediately in virtually any web or mobile app, and with any server-side platform, including PHP, .NET, Java, Ruby, Node.js, or Python. This extremely useful guide will help you Test browser support and provide for graceful degradation Fine-tune DOM element selection and manipulate your site's DOM structure Master the newest techniques for event handling and binding Communicate with web servers: AJAX, page errors, redirects, XML, and more Use advanced UI widgets, from accordions and autocomplete to sliders and tabs Build mobile-optimized sites with the jQuery Mobile library Write and smoothly incorporate new plugins Integrate powerful third-party plugins, such as the Twitter Bootstrap framework The authors' proven "code first, explain later" approach supports developers at all levels who want to start experimenting immediately. Their exceptionally readable examples never take shortcuts or compromise quality, and their detailed walk-throughs are ideal for anyone who wants to

thoroughly understand their code. If you have a working knowledge of HTML, CSS, and basic JavaScript, you'll feel right at home immediately; if not, de Jonge and Dutson's careful explanations and full HTML page layout examples will get you up to speed quickly. Covers jQuery 1.6.4 and 1.7, with Tips for 1.8

Each section includes clearly written step-by-step instructions, illustrated with screenshots and menus just like you'll see on your own Kindle screen.

iPhone 12, iPhone Pro, and iPhone Pro Max User Guide "O'Reilly Media, Inc."

The Reference Manual on Scientific Evidence, Third Edition, assists judges in managing cases involving complex scientific and technical evidence by describing the basic tenets of key scientific fields from which legal evidence is typically derived and by providing examples of cases in which that evidence has been used. First published in 1994 by the Federal Judicial Center, the Reference Manual on Scientific Evidence has been relied upon in the legal and academic communities and is often cited by various courts and others. Judges faced with disputes over the admissibility of scientific and technical evidence refer to the manual to help them better understand and evaluate the relevance, reliability and usefulness of the evidence being proffered. The manual is not intended to tell judges what is good science and what is not. Instead, it serves to help judges identify issues on which experts are likely to differ and to guide the inquiry of the court in seeking an informed resolution of the conflict. The core of the manual consists of a series of chapters (reference guides) on various scientific topics, each authored by an expert in that field. The topics have been chosen by an oversight committee because of their complexity and frequency in litigation. Each chapter is intended to provide a general overview of the topic in lay terms, identifying issues that will be useful to judges and others in the legal profession. They are written for a non-technical audience and are not intended as exhaustive presentations of the topic. Rather, the chapters seek to provide judges with the basic information in an area of science, to allow them to have an informed conversation with the experts and attorneys.
