Life and Times of Frederick Douglass Library of Alexandria
More than 1,000 fresh recipes, tips, and photos for beginning cooks from the Food Network kitchens.

Popular Science Penguin

Marian Forrester is the symbolic flower of the Old American West. She draws her strength from that solid foundation, bringing delight and beauty to her elderly husband, to the small town of Sweet Water where they live, to the prairie land itself, and to the

young narrator of her story, Neil Herbert. All are bewitched by her brilliance and grace, and all are ultimately betrayed. For Marian longs for "life on any terms," and in fulfilling herself, she loses all she loved and all who loved her.--From publisher's description.

The Silver Canvas Getty Publications

"Time travel, UFOs, mysterious planets, stigmata, rock-throwing poltergeists, huge footprints, bizarre rains of fish and frogs--nearly a century after Charles Fort's Book of the Damned was originally published, the strange phenomenon presented in this book remains largely unexplained by modern science. Through painstaking research and a witty, sarcastic style, Fort captures the imagination while exposing the flaws of popular scientific explanations. Virtually

all of his material was compiled and documented from reports published in reputable journals, newspapers and periodicals because he was an avid collector. Charles Fort was somewhat of a recluse who spent most of his spare time researching these strange events and collected these reports from publications sent to him from around the globe. This was the first of a series of books he created on unusual and unexplained events and to this day it remains the most popular. If you agree that truth is often stranger than fiction, then this book is for you"--Taken from Good Reads website.

Quest Verso Books

Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

Wood Heat Safety University of Michigan Press

INTERNATIONAL BESTSELLER • A bestselling dystopian novel that tackles surveillance, privacy and the frightening intrusions of technology in our lives—a “compulsively readable parable for the 21st century” (Vanity Fair). When Mae Holland is hired to work for the Circle, the world’s most powerful internet company, she feels she’s been given the opportunity

of a lifetime. The Circle, run out of a sprawling California campus, links users’ personal emails, social media, banking, and purchasing with their universal operating system, resulting in one online identity and a new age of civility and transparency. As Mae tours the open-plan office spaces, the towering glass dining facilities, the cozy dorms for those who spend nights at work, she is thrilled with the company’s modernity and activity. There are parties that last through the night, there are famous musicians playing on the lawn, there are athletic activities and clubs and brunches, and even an aquarium of rare fish retrieved from the Marianas Trench by the CEO. Mae can’t believe her luck, her great fortune to work for the most influential company in the world—even as life beyond the campus grows distant, even as a strange encounter with a colleague leaves her shaken, even as her role at the Circle becomes increasingly public. What begins as the captivating story of one woman’s ambition and idealism soon becomes a heart-racing novel of suspense, raising questions about memory, history, privacy, democracy, and the limits of human knowledge.

Vermont Life St. Martin's Press
In this monumental book, Chris Harman achieves the impossible—a gripping history of the planet from the

perspective of the struggling people throughout the ages. From earliest human society to the Holy Roman Empire, from the Middle Ages to the Enlightenment, from the Industrial Revolution to the end of the millennium, Chris Harman provides a brilliant and comprehensive history of the planet. Eschewing the standard histories of 'Great Men,' of dates and kings, Harman offers a groundbreaking counter-history, a breathtaking sweep across the centuries in the tradition of 'history from below.' In a fiery narrative, he shows how ordinary men and women were involved in creating and changing society and how conflict between classes was often at the core of these changes. While many pundits see the victory of capitalism as now safely secured, Harman explains the rise and fall of societies and civilizations throughout the ages and demonstrates that history never ends. This magisterial study is essential reading for anyone interested in how society has changed and developed and the possibilities for further radical change.

The Varieties of Religious Experience: A Study in Human Nature, a classical book, has been considered important throughout the human history, and so that this work is never forgotten we at Alpha Editions have made efforts in its preservation by republishing this book in a modern format for present and future generations. This whole book has been reformatted,

retyped and designed. These books are not made of scanned copies of their original work and hence the text is clear and readable.

How to Boil Water

Compliance has become key to our contemporary markets, societies, and modes of governance across a variety of public and private domains. While this has stimulated a rich body of empirical and practical expertise on compliance, thus far, there has been no comprehensive understanding of what compliance is or how it influences various fields and sectors. The academic knowledge of compliance has remained siloed along different disciplinary domains, regulatory and legal spheres, and mechanisms and interventions. This handbook bridges these divides to provide the first one-stop overview of what compliance is, how we can best study it, and the core mechanisms that shape it. Written by leading experts, chapters offer perspectives from across law, regulatory studies, management science, criminology, economics, sociology, and psychology. This volume is the definitive and comprehensive account of compliance.

Argues against educational practices that teach students to be ashamed of American history, offering a history of the United States that highlights the country's virtues while placing its darker periods in political and historical context.

Backpacker

Frederick Douglass recounts early years of abuse, his dramatic escape to the North and eventual freedom, abolitionist

campaigns, and his crusade for full civil rights for former slaves. It is also the only of Douglass's autobiographies to discuss his life during and after the Civil War, including his encounters with American presidents such as Lincoln, Grant, and Garfield.

Blair & Ketchum's Country Journal

"Guns, Democracy, and the Insurrectionist Idea recasts the gun debate by showing its importance to the future of democracy and the modern regulatory state. Until now, gun rights advocates had effectively co-opted the language of liberty and democracy and made it their own. This book is an important first step in demonstrating how reasonable gun control is essential to the survival of democracy and ordered liberty." ---Saul Cornell, Ohio State University

When gun enthusiasts talk about constitutional liberties guaranteed by the Second Amendment, they are referring to freedom in a general sense, but they also have something more specific in mind---freedom from government oppression. They argue that the only way to keep federal authority in check is to arm individual citizens who can, if necessary, defend themselves from an aggressive government. In the past decade, this view of the proper relationship between government and individual rights and the insistence on a role for private violence in a democracy has been co-opted by the conservative movement. As a result, it has spread beyond extreme militia groups to influence state and national policy. In *Guns, Democracy, and the Insurrectionist Idea*, Joshua Horwitz and Casey Anderson set the record straight. They challenge the proposition

that more guns equal more freedom and expose Insurrectionism as a true threat to freedom in the United States today. Joshua Horwitz received a law degree from George Washington University and is currently a visiting scholar at the Johns Hopkins Bloomberg School of Public Health. Casey Anderson holds a law degree from Georgetown University and is currently a lawyer in private practice in Washington, D.C.
