Poignant Song Harper Collins

This book analyzes the social and contextual causes of suicide, the existential and philosophical reasons for committing suicide, and the prevention strategies that modern fictional literature places at our disposal. They

go through the review of Modern fictional literature, in the American and European geographical framework, following the rationales that modern literature based on fiction can serve the purpose of understanding better the phenomenon of suicide, its most inaccessible impulses, and that has the potential to prevent suicide. From the turn of the 20th century to the present, debates over the meaning of suicide became a privileged site for efforts to discover the reasons why people commit suicide and how to prevent this behavior. Since the French sociologist and philosopher Émile Durkheim published his study *Suicide: A Study in Sociology* in 1897, a reframing of suicide took place, giving rise to a flourishing group of

researchers and authors devoting their efforts to understand better the causes of suicide and to the formation of suicide prevention organizations. A century later, we still keep on trying to reach such an understanding of suicide, the nature, and nuances of its modern conceptualization, to prevent suicidal behaviors. The question of what suicide means in and for modernity is not an overcome one. Suicide is an act that touches all of our lives and engages with the incomprehensible and unsayable. Since the turn of the millennium, a fierce debate about the state's role in assisted suicide has been adopted. Beyond the discussion as to whether physicians should assist in the suicide of patients with unbearable and hopeless suffering, the scope

of the suicidal agency is much broader concerning general people wanting to die.

This volume brings together perspectives on social identity and peace psychology to explore the role that categorization plays in both conflict and peace-building. To do so, it draws leading scholars from across the world in a comprehensive exploration of social identity theory and its application to some of the world's most pressing problems, such as intrastate conflict, uprising in the middle east, the refugee crisis, global warming, racism and peace building. A crucial theme of the volume is that social identity theory affects all of us, no matter whether we are currently in a state of conflict or one further along in the peace process. The volume is organized into two sections. Section 1 focuses on the development of social identity theory. Grounded

in the pioneering work of Dr. Henri Tajfel, section 1 provides the reader with a historical background of the theory, as well as its current developments. Then, section 2 brings together a series of country case studies focusing on issues of identity across five continents. This section enables cross-cultural comparisons in terms of methodology and findings, and encourages the reader to identify general applications of identity to the understanding of peace as well as applications that may be more relevant in specific contexts. Taken together, these two sections provide a contemporary and diverse account of the state of social identity research in conflict situations and peace psychology today. It is evident that any account of peace requires an intricate understanding of identity both as a cause and consequence of conflict, as well as a potential resource to be harnessed in the promotion and maintenance of peace. *Understanding Peace and Conflict Through Social Identity Theory: Contemporary Global Perspectives* aims to help achieve

such an understanding and as such is a valuable resource to those studying peace and conflict, psychologists, sociologists, anthropologists, public policy makers, and all those interested in the ways in which social identity impacts our world.
