The Devil and Miss Prym Simon and Schuster

This volume brings together perspectives on social identity and peace psychology to explore the role that categorization plays in both conflict and peace-building. To do so, it draws leading scholars from across the world in a comprehensive exploration of social identity theory and its application to some of the world's most pressing problems, such as intrastate conflict, uprising in the middle east, the refugee crisis, global warming, racism and peace building. A crucial theme of the volume is that social identity theory affects all of us, no matter whether we are currently in a state of conflict or one further along in the peace process. The volume is organized into two sections. Section 1 focuses on the development of social identity theory. Grounded in the pioneering work of Dr. Henri Tajfel, section 1 provides the reader with a historical background of the theory, as well as its current developments. Then, section 2 brings together a series of country case studies focusing on issues of identity across five continents. This section enables cross-cultural comparisons in terms of methodology and findings, and encourages the reader to identify general applications of identity to the understanding of peace as well as applications that may be more relevant in specific contexts. Taken together, these two sections provide a contemporary and diverse account of the state of social identity research in conflict situations and peace psychology today. It is evident that any account of peace requires an intricate understanding of identity both as a cause and consequence of conflict, as well as a potential resource to be harnessed in the promotion and maintenance of peace. *Understanding Peace and Conflict Through Social Identity Theory: Contemporary Global Perspectives* aims to help achieve such an understanding and as such is a valuable resource to those studying peace and conflict, psychologists, sociologists, anthropologists, public policy makers, and all those interested in the ways in which social identity impacts our world.

The Poisoning of an American High School HarperCollins Publishers

"More ambitious than *The Alchemist*. A thought-provoking tale." – TIME magazine In *The Fifth Mountain*, Paulo Coelho takes us back to the ninth century, to the turbulent Middle East, where the prophet Elijah is struggling to keep his faith alive in a world of constant upheaval, tyrannical royalty, and pagan gods. Elijah's story is a lesson in persistence, an exercise in hope, and a journey you will never forget. Inspired by a circumstance that forever altered Coelho's own life, *The Fifth Mountain* is a testament to the truth that tragedy in life should not be considered a punishment, but a challenge of the spirit. Gripping in its narrative and graceful in its prose, *The Fifth Mountain* teaches and inspires like no other novel. This is a timeless story for the ages, a tale of the past that resonates powerfully today.

And on the Seventh Day Harper Collins

"I don't think I've ever read a book that paints such a complex and accurate landscape of what it is like to live with the legacy of trauma as this book does, while offering a comprehensive approach to healing." --from the foreword by Bessel van der Kolk A pioneering researcher gives us a new understanding of stress and trauma, as well as the tools to heal and thrive Stress is our internal response to an experience that our brain perceives as threatening or challenging. Trauma is our response to an experience in which we feel powerless or lacking agency. Until now, researchers have treated these conditions as different, but they actually lie along a continuum. Dr. Elizabeth Stanley explains the significance of this continuum, how it affects our resilience in the face of challenge, and why an event that's stressful for one person can be traumatizing for another. This groundbreaking book examines the cultural norms that impede resilience in America, especially our collective tendency to disconnect stress from its potentially extreme consequences and override our need to recover. It explains the science of how to direct our attention to perform under stress and recover from trauma. With training, we can access agency, even in extreme-stress environments. In fact, any maladaptive behavior or response conditioned through stress or trauma can, with intentionality and understanding, be reconditioned and healed. The key is to use strategies that access not just the thinking brain but also the survival brain. By directing our attention in particular ways, we can widen the window within which our thinking brain and survival brain work together cooperatively. When we use awareness to regulate our biology this way, we can access our best, uniquely human qualities: our compassion, courage, curiosity, creativity, and connection with others. By building our resilience, we can train ourselves to make wise decisions and access choice—even during times of incredible stress, uncertainty, and change. With stories from men and women Dr. Stanley has trained in settings as varied as military bases, healthcare facilities, and Capitol Hill, as well as her own striking experiences with stress and trauma, she gives readers hands-on strategies they can use themselves, whether they want to perform under pressure or heal from traumatic experience, while at the same time pointing our understanding in a new direction.
