Abstract: A study guide for medical field workers provides a systematic approach for building a vocabulary and developing an understanding of thousands of medical terms. This approach is based on and active participation by the reader in identifying word parts, building new words, and pronouncing and practicing them. Following a description

of the system, 10 study units teach the reader to form a constantly expanding medical vocabulary by using new word parts. Each study unit is divided into numbered frames; each frame provides information and asks a question, the answer to which is given at the end of each study unit.

Review sheets for each unit, 2 "final" self-tests, an index of word parts learned, and a table of additional word parts are appended. (wz).

Medical Terminology: A Short Course Cengage Learning

Laboratory Animal Medicine is a compilation of papers that deals with the diseases and biology of major species of animals used in medical research. The book discusses animal medicine, experimental methods and techniques, design and management of animal facilities, and legislation on laboratory animals. Several papers discuss the biology and diseases of mice, hamsters, guinea pigs, and rabbits. Another paper addresses the dog and cat as laboratory

animals, including sourcing of these animals, housing, feeding, and their nutritional needs, as well as breeding and colony management. The book also describes ungulates as laboratory animals, including topics on sourcing, husbandry, preventive medical treatments, and housing facilities. One paper addresses primates as test animals, covering the biology and diseases of old world primates, Cebidae, and ferrets. Some papers pertain to the treatment, diseases, and needed facilities for birds, amphibians, and fish. Other papers then deal with techniques of experimentation, anesthesia, euthanasia, and some factors (spontaneous diseases) that complicate animal

research. The text can prove helpful for scientists, clinical assistants, and researchers whose work involves laboratory animals.
