Sounds similar to the wiring on my 1983 KZ1100 with Vetter fairing: The 12-pin connector you found is just an 18" pigtail that splices into the bike's factory wiring. Only 7 of the 12 wires are actually used (thus explaining the dead-end wires)--3 for the headlight and 2 for each turn signal.

European Headlight Switch Wiring - BMW MOA

On my 1983 R100, I have a headlight switch on the left handle bar (it came to me that way). I was told that this is a European switch and that the PO probably fitted it to the bike. I am in the middle of my swap the Vetter Windjammer III for an RT fairing and am trying to find a wiring spec for this. Since its not stock (at least in the US), Clymer's doesn't mention it.

Vetter instructions from 1977- 80 are works of art. They were illustrated by Bob Clarke, a man of fantastic talent. After I sold Vetter, Bob went to Honda where he became Chief Engineer of Honda Performance Development, Inc. and President of Honda Performance Development. He retired in 2009.

Wiring a GPS to 2004 K1200GT | BMW K1200, K1300, and K1600 ...

Crazy pricing of those FXRT fairings is exactly why I tried a Windjammer for \$ 200! Plus the no-gauges - easy to remove feature. You can still get the wiring plugs from Vetter. I got a few, and after a little studying of the Fsm wiring diagram made a patch cable with the vetter plug on one end and the H-D deutch connector on the other.

Finally, if you do buy a Windjammer make
sure you get the wiring harness with it. It
runs from the headlight back to the left
inside of the fairing. All of the wiring is
done in the wiring bundle inside the
headlight shell. Most of the wires come
with the correct plug on the end.
