Clinician's Manual on Restless Legs Syndrome

Life Remotely
This manual enables individuals working in children's palliative care (CPC) globally to learn through engaging real-world cases. The aim is to provide a clinical case-based resource that is globally relevant and accessible to those working in CPC. Drawing on case histories from around the world that reflect key issues and elements of CPC, it provides a practical approach grounded in experience. It addresses multidisciplinary care in the management of children and their families; discusses cases from an international perspective, and shares examples from a variety of countries, utilising cases across a range of ages and conditions, demonstrating holistic care. It represents the first case-based manual on global CPC and is endorsed and promoted by the International Children's Palliative Care Network (ICPCN). Children's palliative care is a rapidly developing field, both in the UK and internationally. The provision of CPC varies considerably, with provision often being insufficient, and over 65% of countries having no recognised CPC service provision whatsoever. As such, while there are an estimated 21.6 million children who require palliative care, in many areas of the world, CPC is poor or non-existent, and children are treated like little adults without their distinctive needs being recognised or understood. There is also a dearth of literature on CPC, hence this clinical case-based manual fills a gap in the market, and is aimed at a global audience, making it a unique text in the field.

The Videogame Style Guide and Reference Manual Pearson Education
This book is a multidisciplinary study of the translation and localisation of video games. It offers a descriptive analysis of the industry – understood as a global phenomenon in entertainment – and aims to explain the norms governing present industry practices, as well as game localisation processes. Additionally, it discusses particular translation

issues that are unique to the multichannel nature of video games, in which verbal and nonverbal signs must be cohesively combined with interactivity to achieve maximum playability and immerse players in the game's virtual world. Although positioned within the theoretical framework of descriptive translation studies, Bernal-Merino incorporates research from audiovisual translation, software localisation, computer assisted translation, comparative literature, and video game production. Moving beyond this framework, Translation and Localisation in Video Games challenges some of the basic tenets of translation studies and proposes changes to established and unsatisfactory processes in the video game and language services industries.

A truly good look into the religion of Christian Satanism and The Christian Satanist's place within it. Christian Satanism is a worldly gray sided religion worked into the middle area of life, its thoughts, things, and substance. It gives its followers both a soul and a spirit, and a love for earth and our lives within it. After all, the world exists between heaven and hell. It prefers philanthropy and morality over being "sinister" or "diabolical" in some sort of weird way. On the other hand it doesn't strive to judge or condemn through Christianity. This book is for anyone who may find the gray side a more attractive thing.

Thoroughly revised and updated since its initial publication in 2010, the second edition of this gold standard guide for case managers again helps readers enhance their ability to work with complex, multimorbid patients, to apply and document evidence-based assessments, and to advocate for improved quality and safe care for all patients. Much has happened since Integrated Case Management (ICM), now Value-Based Integrated Case Management (VB-ICM), was first introduced in the U.S. in 2010. The Integrated Case Management Manual: Valued-Based Assistance to Complex Medical and Behavioral Health Patients, 2nd Edition emphasizes the field has now moved from "complexity assessments" to "outcome achievement" for individuals/patients with health complexity. It also stresses that the next steps in VB-ICM must be to implement a standardized process, which documents, analyzes, and reports the impact of VB-ICM services in removing patient barriers to health improvement, enhancing quality and care coordination, and lowering the financial impact to patients, providers, and employer groups. Written by two expert case managers who have used VB-ICM in their large fully disseminated VB-ICM program and understand its practical deployment and use, the second edition also includes two authors with backgrounds as physician support personnel to case managers working with complex individuals. This edition builds on the consolidation of biopsychosocial and health system case management activities that were emphasized in the first edition. A must-have resource for anyone in the field, The Integrated Case Management Manual: Value-Based Assistance to Complex Medical and Behavioral Health Patients, 2nd Edition is an essential reference for not only case managers but all clinicians and allied personnel concerned with providing state-of-the-art, value-based integrated case management.

Foundations for Community Health Workers Foundations for Community Health Workers is a training resource for client- and community-centered public health practitioners, with an emphasis on promoting health equality. Based on City College of San Francisco's CHW Certificate Program, it begins with an overview of the historic and political context informing the practice of community health workers. The second section of the book addresses core competencies for working with individual clients, such as behavior change counseling and case management, and practitioner development topics such as ethics, stress management, and conflict resolution. The book's final section covers skills for practice at the group and community levels, such as conducting health outreach and facilitating community organizing and advocacy. Praise for Foundations for Community Health Workers "This book is the first of its kind: a manual of core competencies and curricula for training community health workers. Covering topics from health inequalities to patient-centered counseling, this book is a tremendous resource for both scholars of and practitioners in the field of community-based medicine. It also marks a great step forward in any setting, rich or poor, in which it is imperative to reduce health disparities and promote genuine health and well-being." Paul E. Farmer, MD., PhD, Maude and Lillian Presley Professor of Social Medicine in the Department of Global Health and Social Medicine at Harvard Medical School; founding director, Partners In Health. "This book is based on the contributions of experienced CHWs and advocates of the field. I am confident that it will serve as an inspiration for many CHW training programs." Yvonne Lacey, CHW, former coordinator, Black Infant Health Program, City of Berkeley Health Department; former chair, CHW Special Interest Group for the APHA. "This book masterfully integrates the knowledge, skills, and abilities required of a CHW through storytelling and real life case examples. This simple and elegant approach brings to life the intricacies of the work and espouses the spirit of the role that is so critical to eliminating disparities a true model educational approach to emulate." Gayle Tang, MSN, RN., director, National Linguistic and Cultural Programs, National Diversity, Kaiser Permanente "Finally, we have a competency-based textbook for community health worker education well informed by seasoned CHWs themselves as well as expert contributors." Donald E. Proulx, CHW National Education Collaborative, University of Arizona

Culture is dependent upon intertextuality to fuel the consumption and production of new media. The notion of intertextuality has gone through many iterations, but what remains constant is its stalwart application to bring to light what audiences value through the marriages of disparate ideology and references. Videogames, in particular, have a longstanding tradition of weaving texts together in multimedia formats that interact directly with players.

Contemporary Research on Intertextuality in Video Games brings together game scholars to analyze the impact of video games through the lenses of transmediality, intermediality, hypertextuality, architextuality, and paratextuality. Unique in its endeavor, this publication discusses the vast web of interconnected texts that feed into digital games and their players. This book is essential reading for game theorists, designers, sociologists, and researchers in the fields of communication sciences, literature, and media studies.
