Using Technology to Sell Penguin

H.264 Advanced Video Coding or MPEG-4 Part 10 is fundamental to a growing range of markets such as high definition broadcasting, internet video sharing, mobile video and digital surveillance. This book reflects the growing importance and implementation of H.264 video technology. Offering a detailed overview of the system, it explains the syntax, tools and features of H.264 and equips readers with practical advice on how to get the most out of the standard. Packed with clear examples and illustrations to explain H.264 technology in an accessible and practical way. Covers basic video coding concepts, video formats and visual quality. Explains how to measure and optimise the performance of H.264 and how to balance bitrate, computation and video quality. Analyses recent work on scalable and multi-view versions of H.264, case studies of H.264 codecs and new technological developments such as the popular High Profile extensions. An invaluable companion for developers, broadcasters, system integrators, academics and students who want to master this burgeoning state-of-the-art technology. "[This book] unravels the mysteries behind the latest H.264 standard and delves deeper into each of the operations in the codec. The reader can implement (simulate, design, evaluate, optimize) the codec with all profiles and levels. The book ends with extensions and directions (such as SVC and MVC) for further research." - The most elaborate and up-to-date research on training interpreters in Languages of Lesser Diffusion- Information, expert opinions, and training techniques brought together in a single volume The number of foreign language speakers involved in criminal procedures has quadrupled over the last thirty years. In many of these cases, the person's native language is an LLD (Language of Lesser Diffusion): a language that has relatively few speakers in one specific location or geographical area, in relation to the population as a whole. These people have the right to be addressed in their own language. The need for legal interpreters and translators of LLDs is therefore great, and still rising. Given the particular characteristics of this type of languages, specific methodologies and programs are required for LLD interpreter training. Existing strategies in organizing training were analyzed by the TrailLD consortium in order to test their efficiency, to improve them, and to develop alternative approaches. The result is an evidence-based set of practical recommendations, brought together in one volume.

This is an open access book. The book provides an overview of the state of research in developing countries – Africa, Latin America, and Asia (especially India) and why research and publications are important in these regions. It addresses budding but struggling academics in low and middle-income countries. It is written mainly by senior colleagues who have experienced and recognized the challenges with design, documentation, and publication of health research in the developing world. The book includes short chapters providing insight into planning research at the undergraduate or postgraduate level, issues related to research ethics, and conduct of clinical trials. It also serves as a guide towards establishing a research question and research methodology. It covers important concepts such as writing a paper, the submission process, dealing with rejection and revisions, and covers additional topics such as planning lectures and presentations. The book will be useful for graduates, postgraduates, teachers as well as physicians and practitioners all over the developing world who are interested in academic medicine and wish to do medical research.

"Dazzling... the tone is hopeful, resilient and accepting. Marked by the diversity of experiences shared, the wealth of intimate details, and the total lack of sensationalism, this is an astonishing report on the quest for sexual liberation." —Publishers Weekly, Starred Review "Touching, joyful, defiant -- and honest." —The Economist, a best book of the year Celebrate African women's unique journeys toward sexual pleasure and liberation in this empowering, subversive collection of intimate stories. In these confessional pages, women control their own bodies and desires, work toward healing their painful pasts, and learn to assert their sexual power. Weaving a rich tapestry of experiences with a sex positive outlook, *The Sex Lives of African Women* is an empowering, subversive book that celebrates the liberation, individuality, and joy of African women's multifaceted sexuality. From a queer community in Egypt, to polyamorous life in Senegal, and a reflection on the intersection of religion and pleasure in Cameroon, feminist author Nana Darko Sekyiamah explores the many layers of love and desire, its expression, and how it defines who we are. Sekyiamah has spent decades talking openly and intimately to African women around the world about sex for her blog, "Adventures from the Bedrooms of African Women." For this book she spoke to over 30 African women across the globe while chronicling her own journey toward sexual freedom.

Telepractice in Audiology provides practical information to audiologists to enable the development and delivery of a successful telepractice program. Specifically, the text discusses the technological requirements (e.g., videoconferencing equipment, remote programming software options, Internet connections, etc.), applications and models of service delivery in audiology, policy and regulatory issues, as well as future directions in the field. The use of telepractice technology, specifically the Internet and remote programming software, has the potential to improve equity of access to services and reduce the burden placed on families. Program reports, outcomes, and publications that are emerging demonstrate the ability to offer sophisticated audiological assessments with reliable outcomes. This text provides the knowledge and skills required to implement a telepractice program that could provide a range of audiological services from diagnostics to intervention and habilitation/rehabilitation. Further, different models of service delivery are presented, thus demonstrating the flexibility of a telepractice approach. Telepractice in Audiology is a useful resource for practicing clinicians as well as students training to be audiologists. In addition, teachers of the deaf, speech-language pathologists, IT support persons, and other individuals interested in the application of, or endeavoring to implement, teleaudiology programs will also benefit from this text.

Forty original contributions on games and gaming culture What does Pokémon Go tell us about globalization? What does Tetris teach us about rules? Is feminism boosted or bashed by Kim Kardashian: Hollywood? How does BioShock Infinite help us navigate world-building? From arcades to Atari, and phone apps to virtual reality headsets, video games have been at the epicenter of our ever-evolving technological reality. Unlike other media technologies, video games demand engagement like no other, which begs the question—what is the role that video games play in our lives, from our homes, to our phones, and on global culture writ large? *How to Play Video Games* brings together forty original essays from today's leading scholars on video game culture, writing about the games they know best and what they mean in broader social and cultural contexts. Read about avatars in *Grand Theft Auto V*, or music in *The Legend of Zelda: Ocarina of Time*. See how *Age of Empires* taught a generation about postcolonialism, and how *Borderlands* exposes the seedy underbelly of capitalism. These essays suggest that understanding video games in a critical context provides a new way to engage in contemporary culture. They are a must read for fans and students of the medium.

"Why develop a booklet about helping kids avoid alcohol?" Alcohol is a drug, as surely as cocaine and marijuana are. It's also illegal to drink under the age of 21. And it's dangerous. Kids who drink are more likely to:

- * Be victims of violent crime.
- * Have serious problems in school.
- * Be involved in drinking-related traffic crashes.

As an institutional practice, archival practices often tend to serve to colonization, surveillance and discipline society of the Modern world. In the last ten years, with the digital technology and social movement detecting, recording and accumulating images become a civil activity. Thus, archiving videos and other types of visual images brought also non-institutional practices and as well contemporary discussions related to image, open source, collectivity and forensics. Beside interviews with video activists; this book compiles several writers' articles on their practices and discussions of archives from several angles: forensics, decolonization and commons. The term "archiving" in digital video production and dissemination designates not only open source memory making that is revealing hidden disobedient practices but also an autonomous structure that leads to tactics of montage, uploading, leaking images to re-build a collective memory of political disobedience. This book aims to discuss the notion of "autonomy" in the practice of "archiving", as well as in the perspective of videogram montage in comparative perspectives from different geographically based practitioners.

Statistics show that about nine-in-ten Americans cited love as a very important reason to get married. Whether you are single, dating or in a relationship, the thought of if someone truly loves you or you are in love comes to mind. We all want to fall in love and get married to someone who feels the same way we feel about them. However, people find it hard to say those three big words (I Love You) we want to hear. The reason for their hesitation varies. They are afraid to be perceived as moving too fast if it's a relatively new relationship, so they don't want to push you away. It could be because they don't want to come off too strong if they cannot tell that you have similar feelings. And some people hold off saying it because they feel like the other person should say it first. Regardless if they are professing their love or hiding it, this book will reveal the signs that convey someone truly loves you and if what you are feeling also is true love. Dr. Femi "Gfem" Ogunjinmi is a global relationship new rule expert, TV host of Dr. Femi Show, United Nation Representative, and author of Revelations of Relationship: What You Don't Know About Finding True Love and Sustaining Relationship. "Using Technology to Sell is filled with practical, effective techniques to sell more by leveraging the plethora of tools and information in today's world. By applying these principles, you'll open more doors, increase your productivity, speed up decisions, and close more deals." --Jill Konrath, author of SNAP Selling and Selling to Big Companies Using Technology to Sell: Tactics to Ratchet Up Results shows salespeople and sales managers the most effective ways to leverage a variety of technologies to increase sales and gain more customers. Topics include making the most of cloud-based customer relationship management software, putting social media to the

best use, presenting on three continents simultaneously through advanced video conferencing, using advanced techniques to gain an information edge over competitors, and much more. As this book shows, while the sales process will remain pretty much the same from now until the end of time, technology used properly can increase sales power at every step of the cycle. Technology, in the right hands, is a strategic weapon and a competitive differentiation tool that can dramatically improve close rates, deal size, efficiency, total sales, and much more. Using Technology to Sell will show you how to: Expand your market through the use of technology. Employ software-as-a-service (SaaS) applications to keep track of customers, stay organized, present, and sell more systematically. Use social media to increase sales. Maintain the personal element in a world wired with technology. Use the best sales methodology and integrate each step with technology. Overcome any aversion to using technology to sell. Avoid the trap of overuse or dependency on technology.

PULITZER PRIZE WINNER • A "vivid and devastating" (The New York Times) portrait of an indomitable girl—from acclaimed journalist Andrea Elliott "From its first indelible pages to its rich and startling conclusion, Invisible Child had me, by turns, stricken, inspired, outraged, illuminated, in tears, and hungering for reimmersion in its Dickensian depths."—Ayad Akhtar, author of Homeland Elegies ONE OF THE TEN BEST BOOKS OF THE YEAR: The New York Times • ONE OF THE BEST BOOKS OF THE YEAR: The Atlantic, The New York Times Book Review, Time, NPR, Library Journal In Invisible Child, Pulitzer Prize winner Andrea Elliott follows eight dramatic years in the life of Dasani, a girl whose imagination is as soaring as the skyscrapers near her Brooklyn shelter. In this sweeping narrative, Elliott weaves the story of Dasani's childhood with the history of her ancestors, tracing their passage from slavery to the Great Migration north. As Dasani comes of age, New York City's homeless crisis has exploded, deepening the chasm between rich and poor. She must guide her siblings through a world riddled by hunger, violence, racism, drug addiction, and the threat of foster care. Out on the street, Dasani becomes a fierce fighter "to protect those who I love." When she finally escapes city life to enroll in a boarding school, she faces an impossible question: What if leaving poverty means abandoning your family, and yourself? A work of luminous and riveting prose, Elliott's Invisible Child reads like a page-turning novel. It is an astonishing story about the power of resilience, the importance of family and the cost of inequality—told through the crucible of one remarkable girl. Winner of the J. Anthony Lukas Book Prize • Finalist for the Bernstein Award and the PEN/John Kenneth Galbraith Award
