White Sail Windows 7: The Missing Manual

To predict our future, we must look to the extremes. So argues the economist Richard Davies, who takes readers to the margins of the modern economy and beyond. These extreme economies illustrate the forces that test human resilience, drive societies to failure, and promise to shape our collective future. Reviving a foundational idea from the medical sciences, Extreme Economies

turns the logic of modern economics on its head by arguing that these outlier societies can teach us more about our own than we might imagine. By adapting to circumstances unimaginable to most of us, the people in these societies are pioneering the economic infrastructure of the future.

"Dharma art" refers to creative works that spring from the awakened meditative state, characterized by directness, unselfconsciousness, and nonaggression. Chogyam Trungpa Rinpoche shows that dharma art provides a vehicle to appreciate the nature

of things as they are and express it without any struggle or desire to achieve. A work of dharma art brings out the goodness and dignity of the situation it reflects - dignity that comes from the artist's interest in the details of life and sense of appreciation for experience. At the same time, the author stresses the need for artists to study their craft, develop skill, and absorb knowledge and insight passed down by tradition. And, finally, he extends the principles of dharma art to everyday life, showing how any activity can provide an opportunity to relax and open ourselves to the phenomenal world.

Thinley Norbu presents the Buddhist view in a way meant to clear up misconceptions and awaken the reader's innate wisdom. Thinley Norbu is a distinguished teacher of the Nyingma lineage of Tibetan Buddhism and the author of *The Small Golden Key* and *Magic Dance*.
