A workshop guide to the strip-down, rebuild, maintenance and repair of two-stroke motorcycle engines. Author Dave Boothroyd

covers the principles and practice of two-stroke engine work, examining a wide range of marques and road, racing and trail motorcycles. With over 450 colour photographs, this new book covers: the chronological development of two-stroke engines and workshop procedures for each era; the examination of each major engine component in turn, including cylinder head, piston, piston rings, crankcase, flywheel, bearings, inlet manifold, clutch, gearbox and primary drive, and, finally, racing motorcycles and tuning engines for best performance; diagnosing problems and workshop safety. This practical reference guide is for the two-stroke motorcycle owner or restorer and is illustrated throughout with over 450 colour photographs.

British Café Racers Causey Enterprises, LLC

In twenty-five years, Greeves produced around 25,000-30,000 machines - a number considered relatively modest when compared with some of their contemporaries, such as Triumph. However, Greeves was not small in ambition, or indeed achievement, which is resoundingly illustrated in this new book. From a tentative start in the early 1950s, Greeves expanded through the 1960s,

producing scrambler, trials, road racing and road bikes. Founders Bert Greeves and Derry Preston Cobb produced machines from their factory at Thundersley in Essex, establishing a world-wide reputation in motorcycle sport, particularly off-road competition. Greeves - The Complete Story gives a detailed history from the early 1950s to the 1970s. With production histories and specification details for all the main models, and hundreds of photographs throughout, it is the ideal resource for anyone with an interest in these classic sporting motorcycles. The book covers: Bert Greeves, Derry Preston Cobb and the formative years - from invalid carriages to motorcycle production in 1953; model-by-model specification guides for the main roadsters, scramblers, trials bikes and road racing bikes; world-wide motorcycle sport success, including European Championship wins for Greeves scramblers in 1960 and 1961; the final years - 1972-1979; and advice on owning and restoring a Greeves model today. Superbly illustrated with 299 colour and black & white photographs.

WALNECK'S CLASSIC CYCLE TRADER, MAY 1991 Causey Enterprises, LLC

In the modern era, mass-produced motorcycles tend to be Japanese or Italian, with the 'big four' oriental manufacturers dominating the market. However, this wasn't always the case. Until the 1950s, and even into the '60s, British makers such as Scott, Rudge, BSA, Norton and Vincent ruled the roost. These legendary companies sold their bikes around the world, winning racing championships and setting speed records as they went. They, and many smaller British firms like them, are motorcycling's founding companies. This is the story of those pioneering firms, whose engineers – many self-taught – were fired by racing ambition, commercial rivalry, patriotic duty and, above all, a passion for innovation. Superbly illustrated with over 150 colour pictures, many previously unpublished, *Classic British Motorcycles* is a captivating and highly informative account of the men, machines, race meetings and world events that shaped the development of the motorcycle from its bicycle origins. Illustrations: colour photographs throughout

Popular Mechanics The Book of the Villiers Engine - A Complete and Fully Illustrated Instruction Manual on the Construction, Running, and Repair of Villiers Engines - Pitman's Motor Cyclists Library
For decades the crown jewels of Japan's postwar manufacturing industry, motorcycles remain one of Japan's top exports. Japan's *Motorcycle Wars* assesses the historical development and societal impact of the motorcycle industry, from the influence of motor sports on vehicle sales in the early 1900s to the postwar developments that led to the massive wave of motorization sweeping the Asia-Pacific region today. Jeffrey Alexander brings a wealth of information to light, providing English translations of transcripts, industry publications, and company histories that have until now been available only in Japanese. By exploring the industry as a whole, he reveals that Japan's motorcycle industry was characterized not by communitarian success but by misplaced loyalties, technical disasters, and brutal competition.
