Fullmetal Alchemist, Vol. 7 VIZ Media LLC

The "V í nland Map" first surfaced on the antiquarian market in 1957 and the map's authenticity has been hotly debated ever since in controversies ranging from the anomalous composition of the ink and the map's lack of provenance to a plethora of historical and cartographical riddles. Maps, Myths, and Men is the first work to address the full range of this debate. Focusing closely on what the map in fact shows, the book contains a critique of the 1965 work The Vinland Map and the Tartar Relation; scrutinizes the marketing strategies used in 1957; and covers many aspects of the map that demonstrate it is a modern fake, such as literary evidence and several scientific ink analyses performed between 1967 and 2002. The author explains a number of the riddles and provides evidence for both the identity of the mapmaker and the source of the parchment used, and she applies current knowledge of medieval Norse culture and exploration to counter widespread misinformation about Norse voyages to North America and about the Norse world picture.

JoJo's Bizarre Adventure: Part 4--Diamond Is Unbreakable, Vol. 4 University of Pennsylvania Press

There have been many studies of the Scandinavians in Britain, but this is the first collection of essays to be devoted solely to their engagement with Wessex. New work on the early Middle Ages, not least the excavations of mass graves associated with the Viking Age in Dorset and Oxford, drew attention to the gaps in our understanding of the wider impact of Scandinavians in areas of Britain not traditionally associated with them. Here, a multidisciplinary and interdisciplinary approach to the problems of their study is presented. While there may not have been the same degree of impact, discernible particularly in place-names and archaeology, as in those areas of Britain which had substantial influxes of Scandinavian settlers, Wessex was a major theater of the Viking wars in the reigns of Alfred and Æthelred Unræd. Two major topics, the Viking wars and the Danish landowning elite, figure strongly in this collection but are shown not to be the sole reasons for the presence of Danes, or items associated with them, in Wessex. Multidisciplinary approaches evoke Vikings and Danes not just through the written record, but through their impact on real and imaginary landscapes and via the objects they owned or produced. The papers raise wider questions too, such as when did aggressive Vikings morph into more acceptable Danes, and what issues of identity were there for natives and incomers in a province whose founders were believed to have also come from North Sea areas, if not from parts of Denmark itself? Readers can continue for themselves aspects of these broader debates that will be stimulated by this fascinating and significant series of studies by both established scholars and new researchers.
