Sears and
Craftsman, the
Sears brand of
tools, have been
building tools for
well over 50
years. Among the
power tools they
build are table
saws. These
saws are large
and can saw
everything from a
thin piece of wood
to a piece of large
plywood.

A table saw is a flat-surfaced table with a circular blade protruding from the center of the surface. It can be powered by a belt, a gear, or by direct drive. Most table saws offer movable blades that allow the user to control the angles and depths of the cuts they make.

Think I have the manual and exploded view. Table top is nice and I put a Craftsman table extension on the left side. Made a lot of stuff with it.

I had an issue with the pulley walking off the saw arbor shaft and eventually it pissed me off enough to fix by drilling a dimple in shaft for set screw. The miter fence is great.
