sketch and sciences and
stretch our humanities, Blue

Legalities explores how regulatory frameworks and governmental infrastructures are made, reworked, and contested in the oceans. Its interdisciplinary contributors analyze topics that range from militarization and Maori cosmologies to island building in the South China Sea and underwater robotics. Throughout, *Blue Legalities* illuminates the vast and unusual challenges associated with regulating the turbulent materialities and lives of the sea. Offering much

more than an analysis of legal frameworks, the chapters in this volume show how the more-than-human ocean is central to the construction of terrestrial institutions and modes of governance. By thinking with the more-than-human ocean, *Blue Legalities* questions what we think we know—and what we don't know—about oceans, our earthly planet, and ourselves. Contributors. Stacy Alaimo, Amy Braun, Irus Braverman, Holly Jean Buck, Jennifer L. Gaynor, Stefan Helmreich,

"In today's competitive college admissions environment, even the most successful high school students are looking for an additional edge. Written for high-scoring students who already have ACT fundamentals down pat but want to perfect their scores, *ACT Elite 36* focuses on teaching students to avoid

common "small-but-costly" errors that trip up top-scorers, perfect their advanced strategies, and master the toughest ACT material. In late 2015, the ACT plans to debut an online version of this test and a few minor changes (to the optional portions of the exam), which will be addressed in this revision."

language: their mother tongue. It is a process that seems to take place without any obvious effort. Second language learning, particularly among adults, causes more difficulty. The purpose of this series is to compile a collection of high-quality monographs on language acquisition. The series serves the needs of everyone who wants to know

more about the problem of language acquisition in general and/or about language acquisition in specific contexts. *A Journey with Luke Shambhala* Publications This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer

introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles

Katie's
Cabbage is the
inspirational
true story of
how Katie
Stagliano, a
third grader
from
Summerville,
South
Carolina, grew
a forty-pound
cabbage in her
backyard and
donated it to
help feed 275

people at a
local soup
kitchen. In her
own words,
Katie shares
the story of
the little
cabbage
seedling and
the big ideas
of generosity
and service
that motivated
her to turn
this experience
into Katie's

Books
A collection
of essays on
music and life
by the famed
classical
pianist and
composer
Stephen Hough
is one of the
world's
leading
pianists,
winning global
acclaim and
numerous
awards, both
for his
concerts and
his
recordings. He
is also a
writer,
composer, and

painter, and
has been
described by
The Economist
as one of
"Twenty Living
Polymaths."
Hough writes
informally and
engagingly
about music and
the life of a
musician, from
the broader
aspects of what
it is to walk
out onto a
stage or to
make a
recording, to
specialist tips
from deep
inside the
practice room:
how to trill,
how to pedal,
how to
practice. He
also writes
vividly about
people he's
known, places
he's traveled

to, books he's
read, paintings
he's seen; and
he touches on
more
controversial
subjects, such
as assisted
suicide and
abortion. Even
religion is
there—the
possibility of
the existence
of God,
problems with

Survey of mathematics highlights the power of mathematics as a deductive discipline. The course covers four topics in mathematics. Each topic will build upon the next. The use of deductive arguments, both in formal and natural languages, will be emphasized. Topics include Set Theory,

Cantor's Diagonalization theorem, Argument, countable and uncountable infinite, mathematical induction, cardinal numbers, one to one correspondence, Venn diagrams, sequences, applications in sequences, rational and irrational numbers, geometric proofs involving similar triangles, area, Pythagorean theorem, trigonometry . Algebraic proofs involving the quadratic formula, irrationality of the number Phi, mathematical induction, proofs with sequences, proof by contradiction, fibonacci sequence and the golden ratio, continued fractions, fractals with an emphasis on pattern

building,
sequences,
length and
area.

mind, a handful of simple words that disappear beneath the moment of insight to which it bears witness. Poetry has been an essential aid to Zen Buddhist practice from the dawn of Zen—and Zen has also had a profound influence on the secular poetry of the countries in which it has flourished. Here, two of America's most renowned poets and translators provide an overview of Zen poetry from China and Japan in all its rich variety, from the earliest days to the twentieth century. Included are works by Lao Tzu, Han Shan, Li Po, Dogen Kigen, Saigyo, Basho, Chiao Jan, Yuan Mei, Ryokan, and many others. Hamill and Seaton provide illuminating introduction s to the Chinese and Japanese sections that set the poets and their work in historical and philosophica l context. Short biographies of the poets are also included. *Memphis Noir* Princeton Review "A collection

of stories celebrating the underbelly of the city, its ghosts, and the characters that give Memphis its rich patina of blues." —Memphis Flyer The Home of the Blues knows how darkness can permeate a person's soul—and what it can drive you to do. It's the soundtrack to a city that's made up of equal parts hope and despair, past and present,

death and rebirth. On the streets of Memphis, noir hits the right note. Memphis Noir features stories by city standouts Richard J. Alley, David Wesley Williams, Dwight Fryer, Jamey Hatley, Adam Shaw, Penny Register-Shaw, Kaye George, Arthur Flowers, Suzanne Berube Rorhus, Ehi Ike, Lee Martin, Stephen

Clements, Cary Holladay, John Bensko, Sheree Renée Thomas, and Troy L. Wiggins. "A remarkable picture of contemporary Memphis emerges in this Akashic noir volume . . . Something for everyone." —Publishers Weekly "Covers train cars and Beale Street, hoodoo and segregation, Nathan Bedford Forrest and, of course, Graceland, and even

includes a graphic novella." (Memphis) "The new anthology Memphis Noir is replete with murders, ghosts, gangsters, a sharp-toothed baby, Boss Crump, and high water on the bluff." "Captures the subtlety of the Memphis ethos, where blacks and whites, rich and poor, are intimately entwined. The collection—fifteen stories by some of the city's finest writers—bleeds the blues and calls down the dark powers that permeate this capital of the Delta." —Memphis Magazine **Alone** Walter de Gruyter GmbH & Co KG Natalie Shapero spars with apathy, nihilism, and mortality, while engaging the rich territory of the 30s and new motherhood

—The Commercial Appeal
