Now updated with groundbreaking research, this award-winning classic examines the construction of sexual identity in biology, society, and history. Why do some people prefer heterosexual love while others fancy the same sex? Is sexual identity biologically determined or a product of convention? In this brilliant and provocative book, the acclaimed author of Myths of Gender argues that even the most fundamental knowledge about sex is shaped by the culture in which scientific knowledge is produced. Drawing on astonishing real-life cases and a probing analysis of centuries of scientific research, Fausto-Sterling demonstrates how scientists have historically politicized the body. In lively and impassioned prose, she breaks down three key dualisms -- sex/gender, nature/nurture, and real/constructed -- and asserts that individuals born as mixtures of male and female exist as one of five natural human variants and, as such, should not be forced to compromise their differences to fit a flawed societal definition of normality.

Universal Basic Income (UBI) is one of the most hotly-debated ideas in development and social protection. Drawing from global evidence and experiences, this volume provides a compass to help navigate key issues and trade-offs, as well as offering new data and insights to better inform choices around the appropriateness and feasibility of UBI in different contexts. Structured around seven chapters and based on one of the most comprehensive reviews of the literature available, the book provides a framework to understand the interplay between objectives, design, incentives, micro-simulations, financing, political economy, and implementation of UBI as well as of social assistance more generally.

Young black women symbolise the effects of the inequalities of British society. They do well at school and are good, efficient workers, yet as a group they consistently fail to secure the economic status and occupational prestige of their white counterparts. Heidi Safia Mirza, a black woman sociologist, charts the experience of a group of young black women as they leave school and enter the world of work, and investigates why black women suffer these injustices. She challenges the widely-held myth that young black women underachieve both at school and in the labour market, and provides evidence that goes beyond current notions of black female identity. She reveals the processes of inequality that, despite meritocratic ideals, persist in western society, shifting the emphasis from an analysis of identity towards an examination of the central role of the social and economic disadvantages in the education system. Through a comparative study of research and writing from America, Britain and the Caribbean, Young, Female and Black re-examines our present understanding of what is meant by educational underachievement, the black family and, in particular, black womanhood in Britain. A forceful and positive reappraisal of the experience of black women, it will be essential reading for students of sociology, education, social policy, race relations and feminist thought.

CONCEPTUALISING CHALLENGES AND NEGOTIATIONS FOR WOMEN IN HIGHER EDUCATION 1 2 3 Pamela Cotterill , Sue Jackson and Gayle Letherby 1 2 3 Staffordshire University; Birkeck, University of London; University of Plymouth INTRODUCTION
Despite the historical tradition of academia as a male space (Evans, 1995; Abbott et al, 2005; Stanley, 1997; Letherby, 2003) it is possible to argue that the expansion of higher education in the 1980s and 1990s benefited women more than it did men. By 1995 there were two and a half times more women in the academy than in 1970/1 (Abbott et al 2005), and in the decade to follow the numbers of women undergraduate students had overtaken men with a substantial minority of these being older, non-standard entrants. Furthermore, as Paula J Caplan (1997: 3) argues: Visions of the academic life draw us women toward it, picturing an intellectual community whose members search with passion and integrity for Truth and Knowledge. We imagine that in academia we shall find freedom from bias, freedom from worldly

struggles of power and wealth, freedom to choose what to study and what to say, and an environment characterized by tolerance and openness, where everyone ’ s energy is focused on the open exploration of ideas. However, whilst this may be the vision for some women, it is important not to view this widening of female participation in higher education through ‘ rose tinted glasses ’ .

Secure Recovery is the first text to tackle the challenge of recovery-oriented mental health care in forensic services and prison-based therapeutic communities in the UK. Recovery as an emergent paradigm in the field of mental health presents a challenge to all services to embrace a new clinical philosophy, but nowhere are the implications more profound than in services that are designed to meet the needs of mentally disordered and personality-disordered offenders, both men and women. The chapters collected together in this book represent a cross-section of experiences in high, medium and low secure services and prison-based therapeutic communities in England and Scotland that have begun to implement a recovery orientation to the rehabilitation of offenders with mental health needs. Secure Recovery sets out a road map of guiding principles, practical and evidence-based strategies for promoting service user participation in their care and treatment and further demonstrates the adaption of traditional treatment approaches, and the development of innovations in rehabilitation, as well as tackling training for staff teams, and the evaluation of service delivery. This book provides a valuable resource and an inspiration to practitioners working across forensic mental health settings, increasing understanding of contemporary challenges and suggesting ways of moving forward.

This new edition of Historical Archaeologies of Capitalism shows where the study of capitalism leads archaeologists, scholars and activists. Essays cover a range of geographic, colonial and racist contexts around the Atlantic basin: Latin America and the Caribbean, North America, the North Atlantic, Europe and Africa. Here historical archaeologists use current capitalist theory to show the results of creating social classes, employing racism and beginning and expanding the global processes of resource exploitation. Scholars in this volume also do not avoid the present condition of people, discussing the lasting effects of capitalism ’ s methods, resistance to them, their archaeology and their point to us now. Chapters interpret capitalism in the past, the processes that make capitalist expansion possible, and the worldwide sale and reduction of people. Authors discuss how to record and interpret these. This book continues a global historical archaeology, one that is engaged with other disciplines, peoples and suppressed political and economic histories. Authors in this volume describe how new identities are created, reshaped and made to appear natural. Chapters in this second edition also continue to address why historical archaeologists study capitalism and the relevance of this work, expanding on one of the important contributions of historical archaeologies of capitalism: critical archaeology.

You and Your Gender Identity Basic Books
As seen in military documents, medical journals, novels, films, television shows, and memoirs, soldiers ’ invisible wounds are not innate cracks in individual psyches that break under the stress of war. Instead, the generation of weary warriors is caught up in wider social and political networks and institutions—families, activist groups, government bureaucracies, welfare state programs—mediated through a military hierarchy, psychiatry rooted in mind-body sciences, and various cultural constructs of masculinity. This book offers a history of military psychiatry from the American Civil War to the latest Afghanistan conflict. The authors trace the effects of power and knowledge in relation to the emotional and psychological trauma that shapes soldiers ’ bodies, minds, and souls, developing an extensive account of the emergence, diagnosis, and treatment of soldiers ’ invisible wounds.

'Richly documented and convincingly presented' -- New Society Mods and Rockers, skinheads, video nasties, designer drugs, bogus asylum seeks and hoodies. Every era has its own moral panics. It was Stanley Cohen's classic account, first published in the early 1970s and regularly revised, that brought the term 'moral panic' into widespread discussion. It is an outstanding investigation of the way in which the media and often those in a position of political power define a condition, or group, as a threat to societal values and interests. Fanned by screaming media headlines, Cohen brilliantly demonstrates how this leads to such groups being marginalised and vilified in the popular imagination, inhibiting rational debate about solutions to the social problems such groups represent. Furthermore, he argues that moral panics go even further by identifying the very fault lines of power in society. Full of sharp insight and analysis, Folk Devils and Moral Panics is essential reading for anyone wanting to understand this powerful and enduring phenomenon. Professor Stanley Cohen is Emeritus Professor of Sociology at the London School of Economics. He received the Sellin-Glueck Award of the American Society of Criminology (1985) and is on the Board of the International Council on Human Rights. He is a member of the British Academy.

Emotions work to define who we are as well as shape what we do and this is no more powerfully at play than in the world of politics. Ahmed considers how emotions keep us invested in relationships of power, and also shows how this use of emotion could be crucial to areas such as feminist and queer politics. Debates on international terrorism, asylum and migration, as well as reconciliation and reparation, are explored through topical case studies. In this book the difficult issues are confronted head on. The Cultural Politics of Emotion is in dialogue with recent literature on emotions within gender studies, cultural studies, sociology, psychology and philosophy. Throughout the book, Ahmed develops a theory of how emotions work, and the effects they have on our day-to-day lives. New for this editionA substantial 15,000-word Afterword on 'Emotions and Their Objects' which provides an original contribution to the burgeoning field of affect studiesA revised BibliographyUpdated throughout.
