“The threads of Peter Lovesey’s new Peter Diamond mystery, *Upon a Dark Night*, twist up so neatly they make a perfect hangman’s noose—another triumph of plotting from this master of the classic puzzle form.”—The New York Times Book Review A young woman is dumped, injured and

unconscious, in a private hospital’s parking lot. She is an amnesiac with no memory prior to her discovery by hospital personnel. Detective Inspector Peter Diamond of the Bath homicide squad is unwilling to become involved. He has other, more important cases to solve: A woman has plunged to her death from the roof of a local landmark while half the young people of Bath partied below, and an elderly farmer has shot himself. Are these apparent suicides what they seem, or are there sinister forces at work? And might the amnesiac woman hold the key to both cases?

[The Secret Hangman](#) Harper Collins

This book constitutes the refereed proceedings of the Second International Conference on Data Mining and Big Data, DMBD 2017, held in Fukuoka, Japan, in July/August 2017. The 53 papers presented in this volume were carefully reviewed and selected from 96 submissions. They were organized in topical sections named: association analysis; clustering; prediction; classification; schedule and sequence analysis; big data; data analysis; data mining; text mining; deep learning; high performance computing; knowledge base and its

framework; and fuzzy control.

The Rattle-Rat James Lilliefors

Northern Italy, 1982: Inspector Piero Trotti is enjoying his breakfast at a café when gunmen drive up and shoot the man sitting at the next table. Was Trotti their intended target? He isn't sure. The case falls under the jurisdiction of the local Carabinieri, but Trotti decides to make his own inquiries. The Puppeteer is the follow-up to CWA award-winner Timothy Williams' s dazzling crime fiction debut, *Converging Parallels*. This tautly written novel brings us to the depths of a corrupt, scheming Italian society in which bank officials, clergymen, masons, lawyers, and, of course, politicians are all suspect of resorting to criminal activity for personal gain. Only the police are presumed trustworthy, and even they are sorely divided by departmental rivalries and jealousies.

Property of Blood Soho Press

Delia Williamson, a waitress and mother of two young girls, is reported missing. She is soon found in a public park, hanging from the crossbar of a children's swing set. The postmortem reveals that she has been murdered. Her current partner, ex-husband, and a traveling salesman who frequented her restaurant are all suspects. Before Detective Superintendent Peter Diamond can solve the mystery, more will die. But even as he pursues a killer, he finds himself pursued by a secret admirer. From the Trade Paperback edition.

Douwe Scherjoen was a well-to-do livestock dealer from the remote Dutch province of Friesland. Then his corpse was found, half-charred by flames, floating in a dory in Amsterdam's harbor. No one knows why he was in the nation's capital, far from the bucolic pleasures of his native village of Dingjum. But since Grijpstra is Friesian by birth and can understand the dialect, he and his partner de Gier are dispatched to find the killer—or at least the motive for the crime. And they discover that while no one, not even his wife, liked the victim, the culprit is the unlikeliest suspect of all.

Communication research is evolving and changing in a world of online journals, open-access, and new ways of obtaining data and conducting experiments via the Internet. Although there are generic encyclopedias describing basic social science research methodologies in general, until now there has been no comprehensive A-to-Z reference work exploring methods specific to communication and media studies. Our entries, authored by key figures in the field, focus on special considerations when applied specifically to communication research, accompanied by

engaging examples from the literature of communication, journalism, and media studies. Entries cover every step of the research process, from the creative development of research topics and questions to literature reviews, selection of best methods (whether quantitative, qualitative, or mixed) for analyzing research results and publishing research findings, whether in traditional media or via new media outlets. In addition to expected entries covering the basics of theories and methods traditionally used in communication research, other entries discuss important trends influencing the future of that research, including contemporary practical issues students will face in communication professions, the influences of globalization on research, use of new recording technologies in fieldwork, and the challenges and opportunities related to studying online multi-media environments. Email, texting, cellphone video, and blogging are shown not only as topics of research but also as means of collecting and analyzing data. Still other entries delve into considerations of accountability, copyright, confidentiality, data ownership and security, privacy, and other aspects of conducting an ethical research program. Features: 652 signed entries are contained in an authoritative work spanning four volumes available in choice of electronic or print

formats. Although organized A-to-Z, front matter includes a Reader ' s Guide grouping entries thematically to help students interested in a specific aspect of communication research to more easily locate directly related entries. Back matter includes a Chronology of the development of the field of communication research; a Resource Guide to classic books, journals, and associations; a Glossary introducing the terminology of the field; and a detailed Index. Entries conclude with References/Further Readings and Cross-References to related entries to guide students further in their research journeys. The Index, Reader ' s Guide themes, and Cross-References combine to provide robust search-and-browse in the e-version.

In Italy, a dogged police investigator resists retirement—and plunges into a case that has rocked the city: “ Breathtakingly good ” (London Evening Standard). Northern Italy, 1985: Commissario Piero Trotti is fifty-six years old, and though he is widely respected on the police force for his integrity and work ethic, he is not widely liked. The junior detectives he works with transfer because he ' s too hard on them; his fellow commissioner is trying to force him out. Even his family has walked out of his life: his adult daughter has moved to Bologna, and his wife has left him for New York. All signs are telling Trotti that he needs

to make a change. Instead, he digs in his heels. The city is in an uproar after a young girl is attacked in her bed by an intruder. Aided by the one junior officer who still listens to him—a dogged, unflinching female brigadier named Ciuffi—Trotti sets to work, trying to figure out the truth . . .

“ Trotti is an inspired creation. ” —The Sunday Times

The Third Pandemic Soho Press

In remote parts of the Third World a deadly virus is quietly destroying towns and villages. In West Africa, a journalist is savagely murdered when he learns of an investment consortium poised to invest billions of dollars into the continent. In Washington, a three word message left in a safety deposit box could hold the key to what connects these incidents. Can Charles Mallory, former CIA operative, and his brother Jon, discover the truth before time runs out for the vulnerable people who seem to be target of an international secret war?

There is a dearth of relevant books dealing with both theory and application of time series analysis techniques, particularly in the field of water resources engineering. Therefore, many hydrologists and hydrogeologists face difficulties in adopting time series analysis as one of the tools for their research. This book fills this gap by providing a proper blend of theoretical and practical aspects of time series analysis. It

deals with a comprehensive overview of time series characteristics in hydrology/water resources engineering, various tools and techniques for analyzing time series data, theoretical details of 31 available statistical tests along with detailed procedures for applying them to real-world time series data, theory and methodology of stochastic modelling, and current status of time series analysis in hydrological sciences. In addition, it demonstrates the application of most time series tests through a case study as well as presents a comparative performance evaluation of various time series tests, together with four invited case studies from India and abroad. This book will not only serve as a textbook for the students and teachers in water resources engineering but will also serve as the most comprehensive reference to educate researchers/scientists about the theory and practice of time series analysis in hydrological sciences. This book will be very useful to the students, researchers, teachers and professionals involved in water resources, hydrology, ecology, climate change, earth science, and environmental studies.

In this acclaimed psychological thriller, a man is haunted by a killer who terrorized his rural Southern hometown: "a tour de force" (Michael Connelly). Georgia, 1939. In the small community of Augusta Falls, twelve-year-old Joseph Vaughn is devastated to learn of a female classmate's brutal murder. She had been his friend—someone Joseph loved—and she was far from the killer's last victim. A few years later, Joseph is determined to protect his town, but he is powerless in preventing more murders—and no one is ever caught. Ten years later, a neighbor is found hanging from a rope, surrounded by belongings of the dead girls. The killings cease. The nightmare appears to be over. Plagued by everything he has witnessed, Joseph sets out to forge a new life in New York. But even there the past won't leave him alone—for it seems that the murderer still lives and is killing again, and that the secret to his identity lies in Joseph's own history.

A Frighteningly Plausible, Fast-Paced Thriller about a Russian Cyberattack on America and a Plot to Kill President Putin, Involving Fake News and Anonymous Hackers The CIA has learned that the Kremlin is about to launch a sophisticated propaganda operation aimed at discrediting

and disrupting the United States and ultimately restoring Russia to great nation status. The operation revolves around a plot to implicate the United States in the attempted assassination of Russian President Vladimir Putin. The plan was conceived by a Russian billionaire and former FSB officer named Andrei Turov. For years Turov has been developing the infrastructure for a new kind of warfare that exploits weaknesses in western democracies and manipulates public opinion. His organization offers the Kremlin plausible deniability. But the United States has its own secret weapon: Christopher Niles, a former CIA intelligence officer, who understands Turov's ambitions and capabilities. It falls to him and his small team--composed of his journalist half-brother Jon, a special forces operative he would trust with his life, and Anna Carpenter, a resourceful US senator with deep roots in the intelligence community--to unravel Turov's plot and restore truth to a world spiraling into chaos. The Plot to Kill Putin is a chillingly realistic, timely thriller that delves into the secret corners of Vladimir Putin's Russia, exploring the

shifting world order and the murky realm of US-Russia relations. Previously published in the hardcover as *The Children's Game*.

Northern Italy, 1993: After what seems like several lifetimes as a policeman in the Questura, Commissario Trotti is ready for retirement. Soon, he 'll be able to fulfill his dream of moving to the countryside villa he co-owns with his cousin, where his daily business will be tending to goats and chickens. But despite Trotti 's stubbornly old-fashioned investigative methods and his disregard for social niceties, there are several people trying to talk him out of retirement. Trotti 's boss offers him a golden opportunity as head of the Questura 's new child abuse division.

Meanwhile, Fabrizio Bassi, a reckless, womanizing private detective who worked under Trotti years ago before being kicked off the force, approaches him for help. Bassi has been investigating the death of a murdered doctor, and he has a conspiracy theory that extends to the highest reaches of government. Trotti declines, annoyed by the request. But when Bassi is found in a ditch with a bullet in his head, Trotti decides to take on one last murder case after all.

brothers race to stop a political mastermind's massive bioterrorist plot in this terrifying espionage thriller. In remote pockets of the Third World, a deadly virus is quietly sweeping through impoverished farming villages and shanty towns with frightening speed and potency. Meanwhile, in Washington, a three-word message left in a safe-deposit box may be the key to stopping the crisis—if, that is, Charles Mallory, a private intelligence contractor and former CIA operative, can decipher the puzzle before time runs out. What Mallory begins to discover are the traces of a secret war, with a bold objective—to create a new, technologically advanced society. With the help of his brother Jon, an investigative reporter, can he break the story to the world before it is too late—before a planned “humane depopulation” takes place? As the stakes and strategies of this secret war become more evident, the Mallory brothers find themselves in a complex game of wits with an enemy they can 't see: a new sort of superpower led by a brilliant, elusive tactician who believes that ends justify means.

Chad McKenna wants to live a quiet life of playing games and watching YouTube. But when a private video of himself ‘enjoying some alone time’ goes viral, he is suddenly thrust into the media spotlight. Chad quickly becomes a reluctant internet celebrity. As the video begins to spread across the internet, it becomes clear that this isn't your ordinary meme. It's a virus, and one that will do anything to survive — including murder. If there's anything worse than a video of yourself masturbating going viral, it's a rogue robotic army of soldiers that all look like a naked version of yourself, who are willing to go to war with the entire world. And Chad is the only one with the power to stop it.
