market competitors with ad budgets several times their size. Like the "Moneyball" movie, Moneyball Marketing is all about redefining your metrics - to find higher-impact, under-valued approaches. Instead of measuring GRPs, reach and frequency, successful marketers today need to focus on conversion rates, retention rates and revenue per customer. Moneyball Marketing combines these new metrics with low-cost, iterative testing of alternative marketing tactics. It utilizes techniques from the best approaches in Online Marketing, Direct Response, and MMA/MMM models. Changes in consumer behavior have reduced the impact of many traditional marketing tools like TV, print and radio. To maximize marketing ROI, companies must dramatically reinvent their marketing programs.

Manufacturing Databases and Computer Integrated Systems is the first book to probe the problems and solutions presented by the diversity of databases within the manufacturing industry. The author examines these heterogeneous databases at both the macro (national/international) level and micro (intracompany and intercompany) level. This book is the result of an extensive international research project that involved 87 leading organizations. Manufacturing Databases and Computer Integrated Systems presents the compelling argument for using computers as database integrators, a concept beyond the obvious applications of number crunching and data storage. The book addresses several different areas of manufacturing technology, including product policies in manufacturing, fuzzy controls in plant operations, concurrent engineering, practical applications for

expert systems, organizational prerequisites in manufacturing, heterogenous database environments, the benefits of object-oriented databases, and the requirements for virtual database integration. Manufacturing Databases and Computer Integrated Systems also presents case studies, including the TRW solution applied in Operation Desert Storm, Project CRONUS by BBN, the Intelligent Database Assistant (IDA) by GTE, General Motor's DATAPLEX solution, and Project Carnot by the Microelectronics and Computer Development Corporation (MCC). The book is a "must" for computer and database technologists, engineers, and senior management at most companies worldwide.
