Joomla! es el Gestor de Contenidos líder del mercado y le permitirá crear sitios web de forma sencilla, sin programación y gratuitamente. Siguiendo su panel de control gráfico podrá añadir y organizar artículos de contenido (como un periódico on line) pero, además, con sus extensiones llevará su sitio web mucho más allá, incorporando la funcionalidad que necesite: un foro, una tienda virtual, encuestas, etc., todo bajo una apariencia gráfica atractiva que usted definirá: con diferentes menús de acceso, animaciones, vídeos o galerías de imágenes.

En este libro se explicará cómo crear un sitio web completo con Joomla! sin necesidad de conocimientos técnicos previos, desde cero, paso a paso y con capturas de pantalla de cada una de las tareas a realizar, desde la instalación inicial hasta los últimos ajustes finales. Es, por tanto, un manual idóneo para el autoaprendizaje. El manual se basará en la construcción del sitio web de una clínica veterinaria, con noticias e información relevante. Una tienda virtual con los productos a la venta, una agenda en la que los clientes pedirán citas para consulta, un foro de dudas y comentarios, formularios de contacto, etc. Le asignaremos un aspecto acorde al negocio y definiremos distintos niveles de permisos, para que haya información pública y, a la vez, otra a la que solo puedan acceder ciertos usuarios. Podrá aplicar esta guía de desarrollo para cualquier tipo de web de cualquier sector, ya que la metodología es la misma, independientemente de la temática del sitio.

Clickandbuy Joomla 2.5 / VM 2.0.xxx is for already existing Joomla 1.5 / VM 1. / Clickandbuy Clients who are ready to upgrade and need a proper solution to be able to continue working with Clickanbuy. It is the perfect solution for all already existing Clickandbuy Customers. Latest spring 2014 we will release a Clickandbuy Plugin Joomla 2.5 for all NEW Clickandbuy customers. In the meanwhile enjoy happy customers with this solution! Demo included documentation: How to install ClickandBuy Plugin? Nothing more easy than this: **MAIN IMPORTANT BEFORE YOU START:** Make sure you have saved your premium url and merchant id from Clickandbuy. Without both the plugin will not work!

Step 1: Log into your administrator surface and go to "Extension / Erweiterungen"

Step 2: Search for ClickandBuy Plugin and

click on the button "install now"

Step 3: Go to "Extensions" / "Erweiterungen" and click on "Plugin". There search for "VM - Payment, Clickandbuy". The plugin is deactivated on default. Activate this plugin in this sector manually.

Step 4: Now go to "Components" and search for "Virtuemart". Click at "Virtuemart". Inside Virtuemart click at "Shop". Inside "Shop" click at "Payment methods" or "Zahlungsarten". When open click at the right top at the yellow button "+" = NEU.

Step 5: A new payment method opens. Type as "Payment method title" (= "Zahlungsart Bezeichnung": Clickandbuy. Click at the arrow next to "Payment method" / "Zahlungsart" and search for "VM - Payment, Clickandbuy". Choose as "Clients" / "K ä ufergruppe" all except "test shoppers".

IMPORTANT: You **MUST FIRST** activate the Plugin VM - Payment, Clickandbuy in the Joomla core sector on the very top "Plugins" under "Extensions" / "Erweiterungen", else you will not be able to activate it in the Virtuemart sector.

Step 6: Now you are able to make the configuration. Therefore you need your merchant

premium id you got from Clickandbuy and you saved in your Joomla 1.5 Store AND you need your fitting merchant id. Save your configuration. **ATTENTION!** This plugin **ONLY** works with upgrading customers who are already Clickanbuy clients. It will **NOT** work with new Clickandbuy Clients. For them we release latest end of this year the perfect plugin.

Step 7: Test your configuration. Make a test order. It is recommended to make this test order as USER and not as administrator or super user. Simply to be sure to get the correct results. When you have done everything fine, it should now look like this demo view. If not, you maybe have to upload the clickandbuy logo manually in following folder of your root folder: /images/stories/virtuemart/payment/. Take care, the pic is called: clickbuy.jpg

Step 8: Choose Clickandbuy as payment method and place your order.

Step 9: If you made all settings correctly you should now get transferred to the official Clickandbuy Website. Included the correct price of the ordered product and your merchant name at the top of

this site. Congratulations! Your set-up is done :-)

Latest spring 2014 we will release a Clickandbuy Plugin Joomla 2.5 for all NEW Clickandbuy customers. In the meanwhile enjoy happy customers with this solution!

Mit VirtueMart 2 steht eine neue, leistungsfähige Version des beliebten Shop-Systems für das Joomla!-CMS zur Verfügung. Dieses Buch zeigt, wie Sie mit VirtueMart in wenigen Schritten einen Onlineshop aufsetzen und ihn erfolgreich betreiben. Sie lernen, wie Sie die

Produktinformationen ansprechend präsentieren, Ihre Kundendaten effektiv verwalten und Bestellungen schnell ausführen. Sie erfahren, wie Sie verschiedene Zahlungsarten integrieren und sogar, wie Sie Ihren Shop mit einem Warenwirtschaftssystem verbinden, um Ihre Effizienz noch zu steigern. So wird aus Ihrer Joomla!-Website ein professioneller Onlineshop!

Den Shop aufsetzen: Da VirtueMart kostenlos im Netz verfügbar ist, können Sie sofort einsteigen und starten. Der Webserver und die Datenbank sind schnell eingerichtet, der Shop ist rasch installiert. Dann geht es ans Einräumen: Produktkategorien erstellen, den Shop mit Artikeldaten befüllen, Produktfotos hochladen - der E-Commerce-Experte Götz Nemeth demonstriert, wie Sie die vielen Optionen von VirtueMart richtig nutzen. Das Kleingedruckte nicht vergessen: Als Shopbetreiber müssen Sie viele Dinge im Blick behalten: Bieten Sie Ihren Kunden verschiedene Zahlungsmodalitäten an, informieren Sie sie über Bestellstatus und Versandkosten, weisen Sie die Umsatzsteuer korrekt aus, stellen Sie sicher, dass die Käufer die Allgemeinen

Geschäftsbedingungen gelesen und verstanden haben usw. Der Autor zeigt, wie Sie VirtueMart so einstellen, dass Ihr Shop all diesen Anforderungen genügt, wo potenzielle Fallen lauern und wie Sie diese umgehen. Bauen Sie Ihren Erfolg aus: Wenn Sie die Effizienz Ihres Shops noch weiter steigern wollen, verbinden Sie den Shop mit dem kostenlosen Warenwirtschaftssystem JTL-Wawi. Dieses Buch demonstriert, wie Sie die Verknüpfung von VirtueMart und JTL-Wawi herstellen, den Datenaustausch zwischen beiden Systemen managen und den Bestellprozess optimieren.

Kenya Internet and E-Commerce Investment and Business Guide Volume 1 Strategic Information and Opportunities Packt Publishing Ltd JEmbedAll is a Joomla component and plugin the you can purchase from <http://www.goldengravel.eu>, something you can add to your website and start embedding videos, images and more other features to your site. The role of the component is mainly to configure the data you are embedding using the plugin, but it also offer support for downloading files and generating ebooks. The package it's easy to configure and to work with. Some features have to be configured (there is a configuration section just for that in the backend) in order to be embedded and used properly in the frontend, other features are

integrated and you just used them as they are. Even so, you may set some details right using the CSS attached to the predefined or user-defined strings used for embed code on your Joomla site. Purchase it and download the package for your Joomla version, then install it in order to have a powerful tool to embed videos (from YouTube, Google, Vimeo, Metacafe, Veoh, Dailymotion, RedTube and others), documents, images and Google forms used for quiz. You can also embed Facebook pages, plugins, images and videos, Community Builder advanced searches, Prezi and Scribd documents. Starting with the 1.3 version you can configure and embed any number of conditional forms and you can configure the Open Graph protocol and Twitter cards data, with all the data and thumbnails ready for Facebook and all the sites. The online manual and the generated ebook based on it are very detailed about each feature, but you can always ask questions when you don't understand something or they are not clear enough. The only condition to embed the videos and files is that they have to be online: upload your videos on YouTube or Vimeo (for example) and upload your files (the documents can be Portable Document Format - PDFs, Word docs, Power Point, SpreadSheets and any other documents recognized by Google Docs) on your server or Google servers and embed them into your sites. The path of the document does not have to be some on docs.google.com (but that works fine), it works as well they are on any other website but you have to enter the full path of the file. You can define, configure and embed any number of jQuery images

sliders into your site. You can define and use any number of Popups on your Joomla site. You can embed Google maps and direction into your site. You can define and configure file packages (they can contain any number of files) the visitors can download for free or for money (Paypal payment included!). You can define, configure and embed Community Builder advanced searches (this component works with any CB version!). Since JEmbedAll version 1.3 the search results can open in the same window, in a different window or in a modal window. Beyond that, you can give every user several powerful tools: they can save the search forms and search results, they can embed that saved search results as users lists, they can use CB privacy - a tool that restricts access to some fields, or even the users, on searches. You can embed Facebook pages, posts, videos and images (depending on the Facebook privacy - in many cases all this have to be public for everyone to see), but you can also embed some plugins (Facebook activity, comments, facepile, likebox and recommendations). Starting with the 1.5 version you can generate and download e-books based on your website content. The Paypal payment was modified and extended: you can create shopping carts for files you want sell and the generated e-books. **Programming Joomla Plugins "O'Reilly Media, Inc."**

This book recapitulates the major developments in Decision Support Systems (DSS) over the last 30 years in order to evaluate the research areas of decision making and in which direction the field should proceed. As it attempts to find a consensus about the next steps for the future of DSS research, the book also enforces the trends and new technologies currently in use. The book examines topics such as decision analysis for enterprise systems and non-hierarchical networks, integrated solutions for decision support and knowledge management in distributed environments, decision support system evaluation and analysis through social networks, and e-learning and its application to real environments. It clearly presents the evidence to support their cases and attempts to promote an extensive and objective discussion. In addition, the book also reflects on approaches to dead-end ideas and failures in DSS to better understand the lessons learned. The contributions for this book have been written by

thought leaders and influential researchers from the EURO Working Group of Decision Support Systems (EWG-DSS).

Negli ultimi due anni le applicazioni di e-commerce supportate dalla piattaforma Joomla! si sono notevolmente evolute, adeguandosi alle nuove e potenti funzioni incluse nel CMS a partire dal rilascio delle versioni stabili 2.5 e 3.5. Questo libro ha come obiettivo quello di spiegare passo passo tutte le fasi che portano alla creazione di siti e-commerce tramite l'impiego di tre diversi componenti gratuiti, tutti disponibili in lingua italiana: Virtuemart, Joomshopping e J2Store, presentati in ordine di importanza, in modo che il lettore possa comprenderne le differenze e operare una scelta oculata del miglior software da utilizzare in base alle proprie esigenze. Anche se Virtuemart è quello più utilizzato, ognuno di questi componenti occupa una sezione a parte nella quale l'autore descrive i comandi e le modalità di impiego, iniziando dalla semplice installazione per arrivare alla creazione di un negozio elettronico completo in ogni sua parte. L'intento è dunque quello di andare oltre al solito manuale su

Virtuemart, in modo da consentire al lettore un confronto critico con altri prodotti concorrenti, come appunto Joomshopping e J2Store, che potrebbero essere preferiti per la maggiore fruibilità, semplicità di utilizzo e per le caratteristiche peculiari di cui ogni componente è dotato.

Identify, exploit, and test web application security with ease Key Features Get up to speed with Metasploit and discover how to use it for pentesting Understand how to exploit and protect your web environment effectively Learn how an

exploit works and what causes vulnerabilities Book Description Metasploit has been a crucial security tool for many years. However, there are only a few modules that Metasploit has made available to the public for pentesting web applications. In this book, you'll explore another aspect of the framework — web applications — which is not commonly used. You'll also discover how Metasploit, when used with its inbuilt GUI, simplifies web application penetration testing. The book starts by focusing on the Metasploit setup, along with covering the life cycle of the penetration testing process. Then, you will explore Metasploit terminology and the web GUI, which is available in the Metasploit Community Edition. Next, the book will take you through pentesting popular content management systems such as Drupal, WordPress, and Joomla, which will also include studying the latest CVEs and understanding the root cause of vulnerability in detail. Later, you'll gain insights into the vulnerability assessment and exploitation of technological platforms such as JBoss, Jenkins, and Tomcat. Finally, you'll learn how to fuzz web applications to find logical security vulnerabilities using third-party tools. By the end of this book, you'll have a solid understanding of how to exploit and validate vulnerabilities by working with various tools and techniques. What you will learn Get up to speed with setting up and installing the Metasploit framework Gain first-hand experience of the Metasploit web interface Use Metasploit for web-application reconnaissance Understand how to pentest various content management systems Pentest platforms such as JBoss, Tomcat, and Jenkins Become

well-versed with fuzzing web applications Write and automate penetration testing reports Who this book is for This book is for web security analysts, bug bounty hunters, security professionals, or any stakeholder in the security sector who wants to delve into web application security testing. Professionals who are not experts with command line tools or Kali Linux and prefer Metasploit ' s graphical user interface (GUI) will also find this book useful. No experience with Metasploit is required, but basic knowledge of Linux and web application pentesting will be helpful.
