Clickandbuy Joomla 2.5 / VM 2.0.xxx is for already existing Joomla 1.5 / VM 1. / Clickandbuy Clients who are ready to upgrade and need a proper solution to be able to continue working with Clickandbuy. It is the perfect solution for all already existing Clickandbuy Customers. Latest spring 2014 we will release a Clickandbuy Plugin Joomla 2.5 for all NEW Clickandbuy customers. In the meanwhile enjoy happy customers with this solution! Demo included documentation: How to install ClickandBuy Plugin? Nothing more easy than this: **MAIN IMPORTANT BEFORE YOU START:** Make sure you have saved your premium url and merchant id from Clickandbuy. Without both the plugin will not work! **Step 1:** Log into your administrator surface and go to "Extension / Erweiterungen" **Step 2:** Search for ClickandBuy Plugin and click on the button "install now" **Step 3:** Go to "Extensions" / "Erweiterungen" and click on "Plugin". There search for "VM - Payment, Clickandbuy". The plugin is deactivated on default. Activate this plugin in this sector manually. **Step 4:** Now go to "Components" and search for "Virtuemart". Click at "Virtuemart". Inside Virtuemart click at "Shop". Inside "Shop" click at "Payment methods" or "Zahlungsarten". When open click at the right top at the yellow button "+" = NEU. **Step 5:** A new payment method opens. Type as "Payment method title" (= "Zahlungsart Bezeichnung": Clickandbuy. Click at the arrow next to "Payment method" / "Zahlungsart" and search for "VM - Payment, Clickandbuy". Choose as "Clients" / "Käufergruppe" all except "test shoppers". **IMPORTANT:** You MUST FIRST activate the Plugin VM - Payment, Clickandbuy in the Joomla core sector on the very top "Plugins" under "Extensions" / "Erweiterungen", else you will not be able to activate it in the Virtuemart sector. **Step 6:** Now you are able to make the configuration. Therefore you need your merchant premium id you got from Clickandbuy and you saved in your Joomla 1.5 Store AND you need your fitting merchant id. Save your configuration. **ATTENTION!** This plugin ONLY works with upgrading customers who are already Clickandbuy clients. It will NOT work with new Clickandbuy Clients. For them we release latest end of this year the perfect plugin. **Step 7:**

Test your configuration. Make a test order. It is recommended to make this test order as USER and not as administrator or super user. Simply to be sure to get the correct results. When you have done everything fine, it should now look like this demo view. If not, you may have to upload the clickandbuy logo manually in following folder of your root folder:

/images/stories/virtuemart/payment/. Take care, the pic is called: clickbuy.jpg
Step 8: Choose Clickandbuy as payment method and place your order.
Step 9: If you made all settings correctly you should now get transferred to the official Clickandbuy Website. Included the correct price of the ordered product and your merchant name at the top of this site. Congratulations! Your set-up is done :-)
Latest spring 2014 we will release a Clickandbuy Plugin Joomla 2.5 for all NEW Clickandbuy customers. In the meanwhile enjoy happy customers with this solution!

There are many powerful open source CMSs available to take the pain away from managing a web site. These systems are feature rich, often easy to use, and free. Unfortunately, there are so many choices it's tough to be sure you're choosing the right one. How can you be sure that you are selecting and working with the right tool? This book will guide you through choosing the right CMS for your needs. You can be confident in your choice of CMS for the needs of your project. It will also help you make a start using the CMS, and give you a feel for what it's like to use it - even before you install it yourself. Are you bewildered by the many open source CMSs available online? Open source CMSs are the best way to create and manage sophisticated web sites. You can create a site that precisely meets your business goals, and keep the site up to date easily because these systems give you full control over every aspect of your site. Because open source CMSs are free to download, you have a huge amount of choice between the various systems. Yet there are many open source CMSs to choose from, each with unique strengths - and occasionally limitations too. Choosing between the bewildering number of options can be tough. Making the wrong choice early on may lead to a lot of wasted work, because you'll have a half-finished site that doesn't meet your initial requirements - and needs to be restarted from scratch. This book will show you how to avoid choosing the wrong CMS. It will guide you through assessing your site requirements, and then using that assessment to identify the CMS that will best fit your needs. It contains discussions of the major CMSs, and the issues that you should consider when choosing: their complexity to use, their features and the power they offer. It discusses technical considerations such as programming languages and compliance with best practice standards in a clear,

friendly way that non-technical readers can understand. The book also contains quick-start guides and examples for the most popular CMSs such as WordPress, Joomla!, and Drupal, so that you can experiment with these CMSs, get a feel for how they work, and start using them to build your site. After reading this book, you can be confident that your CMS choice will support your web site's needs because you have carefully assessed your requirements and explored the available options.

JEmbedAll is a Joomla component and plugin the you can purchase from <http://www.goldengravel.eu>, something you can add to your website and start embedding videos, images and more other features to your site. The role of the

component is mainly to configure the data you are embedding using the plugin, but it also offer support for downloading files and generating ebooks. The package it's easy to configure and to work with. Some features have to be configured (there is a configuration section just for that in the backend) in order to be embedded and used properly in the frontend, other features are integrated and you just used them as they are. Even so, you may set some details right using the CSS attached to the predefined or user-defined strings used for embed code on your Joomla site. Purchase it and download the package for your Joomla version, then install it in order to have a powerful tool to embed videos (from YouTube, Google, Vimeo, Metacafe, Veoh, Dailymotion, RedTube and others), documents, images and Google forms used for quiz. You can also embed Facebook pages, plugins, images and videos, Community Builder advanced searches, Prezi and Scribd documents. Starting with the 1.3 version you can configure and embed any number of conditional forms and you can configure the Open Graph protocol and Twitter cards data, with all the data and thumbnails ready for Facebook and all the sites. The online manual and the generated ebook based on it are very detailed about each feature, but you can always ask questions when you don't understand something or they are not clear enough. The only condition to embed the videos and files is that they have to be online: upload your videos on YouTube or Vimeo (for example) and upload your files (the documents can be Portable Document Format - PDFs, Word docs, Power Point, SpreadSheets and any other documents recognized by Google Docs) on your server or Google servers and embed them into your sites. The path of the document does not have to be some on docs.google.com (but that works fine), it works as well they are on any other website but you have to enter the full path of the file. You can define, configure and embed any number of jQuery images sliders into your site. You can define and use any number of Popups on your Joomla site. You can embed Google maps and direction into your site. You can define and configure file packages (they can contain any number of files) the visitors can download for free or for money (Paypal payment included!). You can define, configure and embed Community Builder advanced searches (this component works with any CB version!). Since JEmbedAll version 1.3 the search results can open in the same window, in a different window or in a modal window. Beyond that, you can give every user several powerful tools: they can save the search forms and search results, they can embed that saved search results as users lists, they can use CB privacy - a tool that restricts access to some fields, or even the users, on searches. You can embed Facebook pages, posts, videos and images (depending on the Facebook privacy - in many cases all this have to be public for everyone to see), but you can also embed some plugins (Facebook activity, comments, facepile, likebox and recommendations). Starting with the 1.5 version you can generate and download e-books based on your website content. The Paypal payment was modified and extended: you can create shopping carts for files you want sell and the generated e-books.
