JEmbedAll is a Joomla component and plugin the you can purchase from

<http://www.goldengravel.eu>, something you can add to your website and start embedding videos, images and more other features to your site. The role of the component is mainly to configure the data you are embedding using the plugin, but it also offer support for downloading files and generating ebooks. The package it's easy to configure and to work with. Some features have to be configured (there is a configuration section just for that in the backend) in order to be embedded and used properly in the frontend, other features are integrated and you just used them as they are. Even so, you may set some details right using the CSS attached to the predefined or user-defined strings used for embed code on your Joomla site. Purchase it and download the package for your Joomla version, then install it in order to have a powerful tool to embed videos (from YouTube, Google, Vimeo, Metacafe, Veoh, Dailymotion, RedTube and others), documents, images and Google forms used for quiz. You can also embed Facebook pages, plugins, images and videos, Community Builder advanced searches, Prezi and Scribd documents. Starting with the 1.3 version you can configure and embed any number of conditional forms and you can configure the Open Graph protocol and Twitter cards data, with all the data and thumbnails ready for Facebook and all the sites. The online manual and the generated ebook based on it are very detailed about each feature, but you can always ask questions when you don't understand something or they are not clear enough. The only condition to embed the videos and files is that they have to be online: upload your videos on YouTube or Vimeo (for example) and upload your files (the documents can be Portable Document Format - PDFs, Word docs, Power Point, SpreadSheets and any other documents recognized

---

by Google Docs) on your server or Google servers and embed them into your sites. The path of the document does not have to be some on docs.google.com (but that works fine), it works as well they are on any other website but you have to enter the full path of the file. You can define, configure and embed any number of jQuery images sliders into your site. You can define and use any number of Popups on your Joomla site. You can embed Google maps and direction into your site. You can define and configure file packages (they can contain any number of files) the visitors can download for free or for money (Paypal payment included!). You can define, configure and embed Community Builder advanced searches (this component works with any CB version!). Since JEmbedAll version 1.3 the search results can open in the same window, in a different window or in a modal window. Beyond that, you can give every user several powerful tools: they can save the search forms and search results, they can embed that saved search results as users lists, they can use CB privacy - a tool that restricts access to some fields, or even the users, on searches. You can embed Facebook pages, posts, videos and images (depending on the Facebook privacy - in many cases all this have to be public for everyone to see), but you can also embed some plugins (Facebook activity, comments, facepile, likebox and recommendations). Starting with the 1.5 version you can generate and download e-books based on your website content. The Paypal payment was modified and extended: you can create shopping carts for files you want sell and the generated e-books.

Clickandbuy Joomla 2.5 / VM 2.0.xxx is for already existing Joomla 1.5 / VM 1. / Clickandbuy Clients who are ready to upgrade and need a proper solution to be able to continue working with Clickanbuy. It is the perfect solution for all already existing Clickandbuy Customers. Latest spring 2014 we will release a Clickandbuy Plugin Joomla 2.5 for all NEW Clickandbuy customers. In the meanwhile enjoy happy customers with this solution!Demo included documentation:How to install ClickandBuy Plugin? Nothing more easy than this:MAIN IMPORTANT BEFORE YOU START: Make sure you have saved your premium url and merchant id from Clickandbuy. Without both the plugin will not work!Step 1: Log into your administrator surface and go to "Extension / Erweiterungen"Step

---

2: Search for ClickandBuy Plugin and click on the button "install now". Step 3: Go to "Extensions" / "Erweiterungen" and click on "Plugin". There search for "VM - Payment, Clickandbuy". The plugin is deactivated on default. Activate this plugin in this sector manually. Step 4: Now go to "Components" and search for "Virtuemart". Click at "Virtuemart". Inside Virtuemart click at "Shop". Inside "Shop" click at "Payment methods" or "Zahlungsarten". When open click at the right top at the yellow button "+" = NEU. Step 5: A new payment method opens. Type as "Payment method title" (= "Zahlungsart Bezeichnung": Clickandbuy. Click at the arrow next to "Payment method" / "Zahlungsart" and search for "VM - Payment, Clickandbuy". Choose as "Clients" / "K ä ufergruppe" all except "test shoppers". **IMPORTANT:** You MUST FIRST activate the Plugin VM - Payment, Clickandbuy in the Joomla core sector on the very top "Plugins" under "Extensions" / "Erweiterungen", else you will not be able to activate it in the Virtuemart sector. Step 6: Now you are able to make the configuration. Therefore you need your merchant premium id you got from Clickandbuy and you saved in your Joomla 1.5 Store AND you need your fitting merchant id. Save your configuration. **ATTENTION!** This plugin **ONLY** works with upgrading customers who are already Clickandbuy clients. It will **NOT** work with new Clickandbuy Clients. For them we release latest end of this year the perfect plugin. Step 7: Test your configuration. Make a test order. It is recommended to make this test order as USER and not as administrator or super user. Simply to be sure to get the correct results. When you have done everything fine, it should now look like this demo view. It not, you

maybe have to upload the clickandbuy logo manually in following folder of your root folder: /images/stories/virtuemart/payment/. Take care, the pic is called: clickbuy.jpg Step 8: Choose Clickandbuy as payment method and place your order. Step 9: If you made all settings correctly you should now get transferred to the official Clickandbuy Website. Included the correct price of the ordered product and your merchant name at the top of this site. Congratulations! Your set-up is done :) Latest spring 2014 we will release a Clickandbuy Plugin Joomla 2.5 for all NEW Clickandbuy customers. In the meanwhile enjoy happy customers with this solution!

network Discover various aspects of mining Bitcoin and how to set up your own mining rig Dive deeper into Bitcoin and write scripts and multi-signature transactions on the network Explore the various alt-coins and get to know how to compare them and their value In Detail The financial crisis of 2008 raised attention to the need for transparency and accountability in the financial world. As banks and governments were scrambling to stay solvent while seeking a sustainable plan, a powerfully new and resilient technology emerged. Bitcoin, built on a fundamentally new technology called “ The Blockchain, ” offered the promise of a new financial system where transactions are sent directly between two parties without the need for central control. Bitcoin exists as an open and transparent financial system without banks, governments, or corporate support. Simply put, Bitcoin is “ programmable money ” that has the potential to change the world on the same scale as the Internet itself. This book arms you with immense knowledge of Bitcoin and helps you implement the technology in your money matters, enabling secure transactions. We first walk through the fundamentals of Bitcoin, illustrate how the technology works, and exemplify how to interact with this powerful and new financial technology. You will learn how to set up your online Bitcoin wallet, indulge in buying and selling of bitcoins, and manage their storage. We then get to grips with the most powerful algorithm of all times: the Blockchain, and learn how crypto-currencies can reduce the risk of fraud for e-commerce merchants and consumers. Negli ultimi due anni le applicazioni di e-commerce supportate dalla piattaforma Joomla! si sono notevolmente evolute, adeguandosi alle nuove e potenti funzioni incluse nel CMS a partire dal rilascio delle versioni stabili 2.5 e 3.5. Questo libro ha come obiettivo quello di spiegare passo passo tutte le fasi che portano alla creazione di siti e-commerce tramite l'impiego di tre diversi componenti gratuiti, tutti disponibili in lingua italiana: Virtuemart, Joomshopping e J2Store, presentati in ordine di importanza, in modo che il lettore possa comprenderne le differenze e operare una scelta oculata del miglior software da utilizzare in base alle proprie esigenze. Anche se Virtuemart è quello più utilizzato, ognuno di questi componenti occupa una sezione a parte nella quale l'autore descrive i comandi e le modalità di impiego, iniziando dalla semplice installazione per arrivare alla creazione di un negozio elettronico completo in ogni sua parte. L'intento è dunque quello di andare oltre al solito manuale su Virtuemart, in modo da consentire al lettore un confronto critico con altri prodotti concorrenti, come appunto Joomshopping e J2Store, che potrebbero essere preferiti per la maggiore fruibilità, semplicità di utilizzo e per le caratteristiche peculiari di cui ogni componente è dotato.
