During the last two decades Europe has experienced a rise in

transnational contention. Citizens are crossing borders to advance alternative visions of Europe. They spread protest concepts and tactics and explore new ways of organizing dissent. Far from being a recent phenomenon, transnational protest is obviously more salient in a world of international corporations and global political interaction, compounded by electronic communication and cheap travel. The transnational condition permeates all aspects of protest organization and dynamics—from individual biographies to activist networks to cycles of contention. The contributors offer insight into this multi-faceted condition by combining rich empirical evidence with reflections on the problems of

transnational research.

Northern Italy, *The Night Battles* recounts the story of a peasant fertility cult centered on the *benandanti*, literally, "good walkers." These men and women described fighting extraordinary ritual battles against witches and wizards in order to protect their harvests. While their bodies slept, the souls of the *benandanti* were able to fly into the night sky to engage in epic spiritual combat for the good of the village. Carlo Ginzburg looks at how the Inquisition's officers interpreted these tales to support their world view that the peasants were in fact practicing sorcery. The result of this cultural clash, which lasted for more than a century, was the slow metamorphosis of the *benandanti* into the Inquisition's mortal enemies—witches. Relying upon this exceptionally well-documented case study, Ginzburg argues that a similar transformation of attitudes—perceiving folk beliefs as diabolical witchcraft—took place all over Europe and spread to the New World. In his new preface, Ginzburg reflects on the interplay of chance and discovery, as well as on the

relationship between anomalous cases and historical generalizations.
