He was known simply as the Blind Traveler -- a solitary, sightless adventurer who, astonishingly, fought the slave trade in Af-rica, survived a frozen captivity in Siberia, hunted rogue elephants in Ceylon, and helped chart the Australian outback. James Holman (1786-1857) became "one of the greatest wonders of the world he so sagaciously explored," triumphing not only over blindness but crippling pain, poverty, and the interference of well-meaning authorities (his greatest feat, a circumnavigation of the globe, had to be launched in secret). Once a celebrity, a bestselling author, and an inspiration to Charles Darwin and Sir Richard Francis Burton, the charismatic, witty Holman outlived his fame, dying in an obscurity that has endured -- until now. A Sense of the World is a spellbinding and moving rediscovery of one of history's most epic lives. Drawing on meticulous research, Jason Roberts ushers us into the Blind Traveler's uniquely vivid sensory realm, then sweeps us away on an extraordinary journey across the known world during the Age of Exploration. Rich with suspense, humor, international intrigue, and unforgettable characters, this is a story to awaken our own senses of awe and wonder.

Mobile communications and ubiquitous computing generate large volumes of data. Mining this data can produce useful knowledge, yet individual privacy is at risk. This book investigates the various scientific and technological issues of mobility data, open problems, and roadmap. The editors manage a research project called GeoPKDD, Geographic Privacy-Aware Knowledge Discovery and Delivery, and this book relates their findings in 13 chapters covering all related subjects.
The Life of James Clerk Maxwell Prentice Hall
An irreverent and charming collection of deeply personal essays about the joys of low pop culture and bad taste, exploring coming of age in the 2000s in the age of Hot Topic, Creed, and frosted lip gloss—from the James Beard Award-nominated writer of the Catapult column "Store-Bought Is Fine" Tacky is about the power of pop culture—like any art—to imprint itself on our lives and shape our experiences, no matter one's commitment to "good" taste. These fourteen essays are a nostalgia-soaked antidote to the millennial generation's obsession with irony, putting the aesthetics we hate to love—snakeskin pants, Sex and the City, Cheesecake Factory's gargantuan menu—into kinder and sharper perspective. Each essay revolves around a different maligned (and yet, Rax would argue, vital) cultural artifact, providing thoughtful, even romantic meditations on desire, love, and

the power of nostalgia. An essay about the gym-tan-laundry exuberance of Jersey Shore morphs into an excavation of grief over the death of her father; in "You Wanna Be On Top," Rax writes about friendship and early aughts girlhood; in another, Guy Fieri helps her heal from an abusive relationship. The result is a collection that captures the personal and generational experience of finding joy in caring just a little too much with clarity, heartfelt honesty, and Rax King's trademark humor. The purpose of this book is to contribute to our understanding of Developmental O and M, independent movement and travel in blind children. Unlike many books and articles on orientation and mobility (O&M) for blind children, this one is not about the effect of blindness on movement. Such an inquiry is self-defeating from the start, as it often begins with misconceptions and deficit-thinking about blindness and the blind child's early motor development. Instead, this book is about the effect of movement on development and the importance of movement experiences for the development of independent movement and travel in blind children. It has a clear premise: blind children must become "active movers" if they are to become independent "travelers."

The incredible bestselling book from the author of No Barriers and The Adversity Advantage Erik Weihenmayer was born with retinoscheses, a degenerative eye disorder that would leave him blind by the age of thirteen. But Erik was determined to rise above this devastating disability and lead a fulfilling and exciting life. In this poignant and inspiring memoir, he shares his struggle to push past the limits imposed on him by his visual impairment-and by a seeing world. He speaks movingly of the role his family played in his battle to break through the barriers of blindness: the mother who prayed for the miracle that would restore her son's sight and the father who encouraged him to strive for that distant mountaintop. And he tells the story of his dream to climb the world's Seven Summits, and how he is turning that dream into astonishing reality (something fewer than a hundred mountaineers have done). From the snow-capped summit of McKinley to the towering peaks of Aconcagua and Kilimanjaro to the ultimate challenge, Mount Everest, this is a story about daring to dream in the face of impossible odds. It is about finding the courage to reach for that ultimate summit, and transforming your life into something truly miraculous. "Staff from smaller airports typically lack specialized expertise in the negotiation and development of airport property or the resources to hire consultants. ACRP Research Report 213 provides airport management, policymakers, and staff a resource for developing and leasing airport land and improvements, methodologies for determining market value and appropriate rents, and best practices for negotiating and re-evaluating current lease agreements. There are many factors that can go into the analysis, and this report reviews best practices in property development."--Foreword.

Jacques Lusseyran, blind hero of the French Resistance, lost his sight at the age of eight. In his best-selling autobiography And There was Light (Floris Books, 1999), he tells how he discovered the 'inner light' which allowed him to see the world in all its richness and depth, a light which sustained him through the terrors of internment at Buchenwald.In this collection of writings, Lusseyran tells of experiencing 'light in myself' as a spiritual gift of love. He examines the value of 'seeing' for both blind and sighted people, and explores the nature of the inner space that we call 'I'. In two short memoirs, he recalls encounters in the death-camps which inspired and strengthened him to find an inner response to an outer hell.

Filmalized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US,on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.
