Every spring, the University of Massachusetts - Amherst welcomes all "Soils Conference" Scientific Advisory Board members with open arms as we begin the planning process responsible for bringing you quality conferences year after year. With this "homecoming" of sorts comes the promise of reaching across the table and interacting with a wide spectrum of stakeholders, each of them bringing their unique perspective in support of a successful Conference in the fall. This year

marks the 20th anniversary of what started as a couple of thoughtful scientists interested in developing partnerships that together could fuel the environmental cleanup dialogue. Since the passage of the Superfund Law, regulators, academia and industry have come to realize that models that depend exclusively on "command and control" mandates as the operative underpinning limit our collective ability to bring hazardous waste sites to productive re-use. It is with this concern in mind that the Massachusetts Department of Environmental Protection privatized its cleanup program in 1993, spurring the close-out of over 20,000 sites and spills across the Commonwealth to date, in a manner that is both protective of human health and the environment while also flexible and responsive to varied site uses and redevelopment goals. So we gather together again, this year, to hear our collective stories and share success and challenges just as we share stories at a family gathering. Take a read through the stories contained in these proceedings. Intelligent technical systems are networked, embedded systems

incorporating real-time capacities that are able to interact with and adapt to their environments. These systems need innovative approaches in order to meet requirements like cost, size, power and memory consumption, as well as real-time compliance and security. Intelligent Technical Systems covers different levels like multimedia systems, embedded programming, middleware platforms, sensor networks and autonomous systems and applications for intelligent engineering. Each level is discussed by a set of original articles summarizing the state of the art and presenting a concrete application; they include a deep discussion of their model and explain all design decisions relevant to obtain a mature solution.

This book examines how in navigating Hong Kong 's colonial history alongside its ever-present Chinese identity, the city has come to manifest a conflicting socio-cultural plurality. Drawing together scholars, critics, commentators, and creators on the vanguard of the emerging field of Hong Kong Studies, the essay volume

presents a gyroscopic perspective that discerns what is made in from what is made into Hong Kong while weaving a patchwork of the territory 's contested local imaginary. This collection celebrates as it critiques the current state of Hong Kong society on the 20th anniversary of its handover to China. The gyroscopic outlook of the volume makes it a true area studies book-length treatment of Hong Kong, and a key and interdisciplinary read for students and scholars wishing to explore the territory 's complexities. "This book provides practical strategies for developing the mental skills which help speed you to your full potential."---Dave Winfield What does it mean to play heads-up baseball? A heads-up player has confidence in his ability, keeps control in pressure situations, and focuses on one pitch at a time. His mental skills enable him to play consistently at or near his best despite the adversity baseball presents each day. "My ability to fully focus on what I had to do on a daily basis was what made me the successful player I was. Sure I had some natural ability, but that only gets you so far. I think I learned how to focus; it wasn't something that I was necessarily born with." -- Hank Aaron "Developing and refining my mental game has played a critical role in my success in baseball. For years players have had to develop these skills on their own. This book

-provides practical strategies for developing the mental skills that will help speed you toward your full potential." -- Dave Winfield Cisco Certified Network Associate Study Guide John Wiley & Sons Looks at southern Chinese martial arts traditions and how they have become important to local identity and narratives of resistance. This book explores the social history of southern Chinese martial arts and their contemporary importance to local identity and narratives of resistance. Hong Kong ' s Bruce Lee ushered the Chinese martial arts onto an international stage in the 1970s. Lee ' s teacher, Ip Man, master of Wing Chun Kung Fu, has recently emerged as a highly visible symbol of southern Chinese identity and pride. Benjamin N. Judkins and Jon Nielson examine the emergence of Wing Chun to reveal how this body of social practices developed and why individuals continue to turn to the martial arts as they navigate the

challenges of a rapidly evolving environment. After surveying the development of hand combat traditions in Guangdong Province from roughly the start of the nineteenth century until 1949, the authors turn to Wing Chun, noting its development, the changing social attitudes towards this practice over time, and its ultimate emergence as a global art form.

Beginning in 1990, thousands of Spanish speakers emigrated to Japan. A Cultural History of Spanish Speakers in Japan focuses on the intellectuals, literature, translations, festivals, cultural associations, music (bolero, tropical music, and pop, including reggaeton), dance (flamenco, tango and salsa), radio, newspapers, magazines, libraries, and blogs produced in Spanish, in Japan, by Latin Americans and Spaniards who have

lived in that country over the last three decades. Based on in-depth research in archives throughout the country as well as field work including several interviews, Japanese-speaking Mexican scholar Araceli Tinajero uncovers a transnational, contemporary cultural history that is not only important for today but for future generations. Araceli Tinajero is professor of Hispanic literatures at The City College of New York and at the Graduate Center. She is the author of *Orientalismo en el modernismo hispanoamericano*, *El Lector: A History of the Cigar Factory*, and *Kokoro: A Mexican Woman in Japan*. Tinajero is the editor or co-editor of various volumes including *Exilio y cosmopolitismo en el arte y la literatura hispanica*, *Orientalisms of the Hispanic and Luso-Brazilian World*, *Technology and Culture in Twentieth Century Mexico*, and *Handbook on Cuban History, Literature, and the Arts*. She is the Book Review Editor of the journal *Asia / America Latina*.
