The trick to add a file as a link is not in the menu options in Visual Studio itself, that's also where I started searching. You have to first add an existing item to your desired folder, as shown below. After selecting the file, don't click Add, but click the dropdown next to

the Add button. There you can select Add As Link.

Visual Studio and support tools provide a huge variety of ways to create new items in projects, but most are rather key intensive. Visual Studio really is in need of a very quick and keyboard (or single mouseclick of the context menu) centric approach to getting new files into a project.
