Historical perspective. Non-classical actions of vitamin D were first recognized thirty years ago when receptors for active 1,25-dihydroxyvitamin D 3 (1,25(OH) 2 D 3) were detected in various neoplastic cells lines 23, 59. Other studies immediately following this showed that binding of 1,25(OH) 2 D 3 to the vitamin D receptor (VDR) promoted antiproliferative and prodifferentiation responses in ...

Vitamin D2: New

Perspectives in Drawing by
Matt Price

Vitamin D offers a fresh and pioneering overview of the current state and underlying significance of drawing as an artistic medium. It highlights the originality and innovation with which contemporary artists in the genre - from across the world and in a vast variety of contexts - experiment with a diversity of styles and statements.

While Vitamin D: New Perspectives in Drawing doesn't suffer from the same over-defensiveness of Vitamin P, it also doesn't quite have its diversity of forms. Many contemporary artists have taken the directness of drawing as permission to adopt the faux-naive drawing style, an overly-cartoony form of hipster drawing I find boring even when it's done at it's best.
