Psychology of the Image outlines a theoretical framework bringing together the semiotic concepts developed by Charles Peirce, the sociological insights of Ervin Goffman and the psychoanalytic ideas of Jacques Lacan. Image studies in fashion, advertising, photography, film studies and psychology have been influenced by these theorists in significant ways. The framework presented helps the reader understand how these ideas relate to the study of different domains of the image: the internal imagery of dreams, external images such as the photograph and image processes which span both contexts, e.g., images we have about ourselves. The topics discussed are organised into three themes. The first considers mental imagery, including sound and dreams. The second addresses the interdependent nature of internal and external images, e.g., the gendered self and social identity. In the third theme, attention turns to external images including television, film, photography, the computer and the internet. Psychology of the Image will be of interest to undergraduates, postgraduates, lecturers and researchers in the fields of psychology, media studies and sociology.

This book supplies both empirical evidence and scholarly analysis that exemplify successful innovation in South America in the field of sustainability education. Examining the issues from a three-fold perspective, of national policy, regional planning and grassroots projects in schools and communities, the volume offers a comprehensive overview of the contemporary situation in Brazil, Chile, Bolivia, Argentina and Venezuela. It provides case studies as detailed illustrations of the recipe for success as well as to inform researchers and practitioners of the kinds of obstacles and challenges they might face in seeking to manifest sustainability. A good deal of the research and scholarly studies in the field of education for sustainability and sustainable development is underpinned by 'Western' norms and culture. This book draws on that literature, yet also teases out features in the case studies that are particular to the region. South America itself encompasses a rich variety of natural and cultural environments—within individual nations as much as continent-wide. This diversity is a recurring theme in the book. The volume's three sections provide first a general survey, enriched with material from studies conducted in a number of different polities. The second section covers developments in Brazil, South America's largest nation and one that exhibits many of the features of education for sustainability found across the continent. Part three sets out and explores future trends. As with other books in the Schooling for Sustainable Development series, this volume will add impetus to scholarly exchange as well as contributing insights on education policy and curriculum changes across South American communities that exist in an increasingly globalized world.

Treats linear regression diagnostics as a tool for application of linear regression models to real-life data. Presentation makes extensive use of examples to illustrate theory. Assesses the effect of measurement errors on the estimated coefficients, which is not accounted for in a standard least squares estimate but is important where regression coefficients are used to apportion effects due to different variables. Also assesses qualitatively and numerically the robustness of the regression fit.

In Vergil's Empire, Eve Adler offers an exciting new interpretation of the political thought of Vergil's Aeneid. Adler argues that in this epic poem, Vergil presents the theoretical foundations of a new political order, one that resolves the conflict between scientific enlightenment and ancestral religion that permeated the ancient world. The work concentrates on Vergil's response to the physics, psychology, and political implications of Lucretius' Epicurean doctrine expressed in De Rerum Natura. Proceeding by a close analysis of the Aeneid, Adler examines Vergil's critique of Carthage as a model of universal enlightenment, his positive doctrine of Rome as a model of universal religion, and his criticism of the heroism of Achilles, Odysseus, and Epicurus in favor of the heroism of Aeneas. Beautifully written and clearly argued, Vergil's Empire will be of great value to all interested in the classical world.

It is 1958 and the Phelan clan has gathered to hear Peter Phelan's will, read by the living Peter himself, an artist whose paintings about members of the family have given him belated critical recognition. The paintings illuminate the lives of his brother Francis (the exiled hero of Ironweed), and a family ancestor, Malachi McIlhenny, a true madman beset by demons, and determined to send them back to hell. Orson Purcell, bastard son of Peter, and half-mad himself, encounters his first true solace through this obsessive and close-knit family he has never quite entered; most especially through his Aunt Molly, whose intense love affair holds secrets that only another love can resurrect. It is through Orson's modern eye that we see the tragedies, obsessions, and clandestine joys of this singular family. This is climatic work in William Kennedy's Albany Cycle, riding on the melody of its language and the power of its story, which is full of surprise, comedy, terror, and earthly delight.
