Once upon a time, he was everything to her, except for one thing: her future Christmas sparkles from every bough and window at the cozy Four Winds Ski Resort, where single mother Eden Kendall and her eight-year-old son are spending the holiday. A surprise marriage proposal from her boss's son wasn't on her Christmas list, but it's the perfect excuse to get away and weigh her options. She never imagined her son's ski instructor/Santa impersonator would be the gorgeous, charismatic dreamer she left behind years ago, the one who still owns a piece of her heart. Cole Hagan has never

stopped loving Eden and he's spent the last eight years proving her wrong on every count about his potential. While he fights to save the resort that he helped to build by organizing a holiday concert, he decides it's about time that Eden puts aside her list-making pragmatism so that she and her skeptical son can experience the true magic of Christmas. Can a not-so-perfect angel help this unlikely pair get a second chance at happily ever after?

In this volume, a distinguished set of international scholars examine the nature of

collaboration between life partners in the sciences, with particular attention to the ways in which personal and professional dynamics can foster or inhibit scientific practice. Breaking from traditional gender analyses which focus on divisions of labor and the assignment of credit, the studies scrutinize collaboration as a variable process between partners living in the nineteenth and twentieth centuries who were married and divorced, heterosexual and homosexual, aristocratic and working-class and politically right and left. The contributors analyze cases shaped by their particular geographical locations, ranging from retreat settings like the English countryside and Woods Hole, Massachusetts, to university laboratories and urban centers in Berlin, Stockholm, Geneva and London. The

volume demonstrates how the terms and meanings of collaboration, variably shaped by disciplinary imperatives, cultural mores, and the agency of the collaborators themselves, illuminate critical intellectual and institutional developments in the modern sciences.

It has been reported in various business websites, news stations, newspapers and social media that the US unemployment rate went down to 5.5% as of February 2015. Is this good news? Yes, because that means 94.5% of the working population is employed. The bad news is you might be, or might know someone, who is still a part of the remaining 5.5%. Now, with the competition that includes knowledge, experience, personality and determination as the main criteria for judging, you have to prove yourself worthy of a position in that 94.5%. It does not matter if you have

been laid off, you resigned or a fresh graduate; what is important is that you want the bosses to know what you are capable of. If you have been looking around and trying for quite some time now but is still not getting that offer, you might want to revamp your plans. This book is one out of 8 IAEG XII Congress volumes, and deals with the processes occurring on the coastal zone, which represents a critical interface between land and sea, as the contribution of the ocean to the provision of energy and mineral resources will likely increase in the coming decades. Several related topics fit

into this volume, such as: coastal developments and infrastructures; dredging and beach re-nourishment; sediment erosion, transport and accumulation; geohazard assessment; seafloor uses; seabed mapping; exploration and exploitation of the seafloor, of the sub-seafloor, and of marine clean energies and climatic and anthropogenic impacts on coastal and marine environments.

Examples of specific themes are coastal management and shore protection, taking into account storm-related events and natural and anthropogenic changes in the relative sea level, planning of waste disposal, remedial works for coastal pollution, seafloor pipeline engineering, slope stability analysis, or tsunami propagation and flooding. The Engineering

Geology for Society and Territory volumes of the IAEG XII Congress held in Torino from September 15-19, 2014, analyze the dynamic role of engineering geology in our changing world and build on the four main themes of the congress: environment, processes, issues and approaches. The congress topics and subject areas of the 8 IAEG XII Congress volumes are: 1. Climate Change and Engineering Geology 2. Landslide Processes River Basins 3. Reservoir Sedimentation and Water Resources 4. Marine and Coastal Processes Urban Geology 5. Sustainable Planning and Landscape Exploitation 6. Applied Geology for Major Engineering Projects 7. Education, Professional Ethics and Public Recognition of Engineering Geology 8. Preservation of Cultural

Heritage.

Another hilarious offering from bestselling author Cate Kendall. From the backwaters of Tasmania to the sophisticated streets of Sydney, sisters Bellarene and Serandipity have come a long way. As international flight attendants the world is their oyster – until Sera fell in love and settled for family life. Obsessed with keeping up appearances, Sera goes to extreme lengths to maintain the illusion of perfection, while Bella just wants to fly away from the responsibility of mothering her little sister, from the sadness of her broken marriage, and from memories of the past. Gathering her friends at Stitch 'n' Bitch is like therapy. There's a lot of talk, and not much knitting - and they wouldn't have it any other way. Ditzzy Mallory has her own shocks in store, and single mum Chantrea agonises over work and childcare. Widowed single dad, Sam,

is terrified of the dating scene, and Sera's uptight neighbour, Jacqueline, has a little secret, one that could destroy her neatly ordered world. Meanwhile Joan, Sera's mother-in-law, watches them all and sniffs with disdain at their trivial worries. Sera wants to be perfect. Bella just wants to be free. Will the sisters get what they want?
