Eleventh Congress, second session, June 16, 2010.Lazy Checkpoint questions of our time.

Coordination for Bounding Rollback PropagationIndependent checkpointing allows maximum process autonomy but suffers from potential domino effects. Coordinated checkpointing eliminates the domino effect by sacrificing a certain degree of process autonomy. In this paper, we propose the technique of lazy checkpoint coordination which preserves process autonomy while employing communication-induced checkpoint coordination for bounding rollback propagation. The introduction of the notion of laziness allows a flexible trade-off between the cost for checkpoint coordination and the average rollback distance. Worst-case overhead analysis provides a means for estimating the extra checkpoint overhead. Communication trace-driven simulation for several parallel programs is used to evaluate the benefits of the proposed scheme for real applications. Wang, Yi-Min and Fuchs, W. Comprehensive and well-written." - David Oswell, Goldsmiths College This timely volume provides a framework for understanding the cultural turn in terms of the classical legacy, contemporary cultural theory and cultural analysis. It reveals the significance of Marxist humanism, Georg Simmel, the Frankfurt School, Stuart Hall and the Birmingham School, Giddens, Bauman, Foucault, Bourdieu and Baudrillard. Readers receive a dazzling, critical survey of some of the primary figures in the field. However, the book is much more than a Rough Guide tour through the 'great figures' in the field. Through an analysis of specific problems, such as transculturalism, transnationalism, feminism, popular music and cultural citizenship, it demonstrates the relevance of cultural sociology in elucidating some of the key

Poems Original and Translated Pearson Higher Ed This volume approaches the issue of ambient sound through the ethnographic exploration of different cultural contexts including Italy, India, Egypt, France, Ethiopia, Scotland, Spain, Portugal, and Japan. It examines social, religious, and aesthetic conceptions of sound environments, what types of action or agency are attributed to them, and what bodies of knowledge exist concerning them. Contributors shed new light on these sensory environments by focusing not only on their form and internal dynamics, but also on their wider social and cultural environment. "From Karaoke to the Platters" is the inspirational tale of how Paul B Allen III went from singing in karaoke establishments, to become the lead singer of one of the greatest vocal groups of all time, The Platters (Only You; Smoke Gets In Your Eyes; The Great Pretender, etc.). Paul was not allowed entry into his elementary school chorus because of his "tin ear," so the trip from "reject" to lead vocalist was an incredible journey. Paul shares that journey, as well as all the things he did, step by step, that led him to performing at venues like the world-famous Kennedy Center, backed by the National Symphony Orchestra, and his singing for the rich and famous all around the world, including performing for the Royal Family in London, Prince Albert in Monaco, and being invited to the White House to perform for the President of the United States of America. This book is made up of two parts that are linked together by Paul's real-life experiences in the music industry, as an internationally published songwriter and as the lead vocalist of The Platters. Part One tells step by step how he did it (and how you can too), and Part Two tells what happened once he "arrived." It is a truly fascinating account that can only be told by someone who has lived the life. And as you read, you'll feel like you're living it right alongside of him.

Cultural Theory Hmh Books for Young Readers Thinking and Reasoning in Autism provides fresh insights into the cognitive processes that underlie some of the typical characteristics of autism. Autism has long been considered an enigma, and no single theory so far has been able to explain, or even fully describe, the key characteristics of the autistic mind. From the interdisciplinary perspective of new research in cognitive psychology, linguistics, philosophy, and neuroscience, this book explores

thinking, reasoning and decision making in autism. The new cognitive approaches challenge some of the existing assumptions of the nature of thought in autism, including presumed areas of impairments. Instead, this book focuses on the nuanced array of cognitive signatures that characterize the autistic mind, and in many cases it reveals the possibility of intact performance alongside instances of remarkably enhanced thinking. The book considers the implications of these characteristics, providing in-depth analyses of specific areas of cognitive functioning, and their everyday manifestations. Featuring contributions from world-leading researchers from the fields of cognitive science and autism research, this volume will be essential reading for advanced students and researchers, as well as those working with individuals with autism spectrum disorders.

The Pharisees piled up a mountain of human made rules in their attempt to keep the law. But their fixation on the legal code ended up pushing them further away from the righteousness they sought to attain. In contrast, some modern Christians have abandoned the law in their pursuit of righteousness, declaring themselves liberated from outdated, unessential rules. So what role should Gods law have in the Christians life? What part does it play in the work of salvation? How does it relate to grace? In Laying Down the Law Keith Augustus Burton explores the law of God through the perspective of Jesus Christ. With each chapter he reveals the role of the law, clarifies common misunderstandings, and challenges traditional assumptions about the function of the law. Through Bible verses, personal stories, and insights into the culture and worldview of biblical times, you'll discover what the law reveals about God's character and His loving plan for us. Since the fall of the Iron Curtain, formerly socialist countries have gone through manifold transformations, whilst remnants of socialism remain ubiquitous. The volume explores various spaces of the postsocialist landscape, presenting a mixture of real and imaginary spaces, of memory and nostalgia, of aesthetic and political symbolism, of the global East and the global South, of academic and essayistic writing. It casts a glance at the heterogeneous relics of socialism and their transformation in very different parts of the world. From the description of (post-)socialist interiors, façades, neighborhoods, parks, monuments, and objects towards the imaginary spaces of literature, the contributors describe the concreteness and intimacy of some of the places that span across and even beyond of what is left of the »second world« today.

This volume offers a historical and critical analysis of the emerging field of the learning sciences, which takes an interdisciplinary approach to understanding and improving how children and adults learn. It features a wide range of authors, including established scholars who founded and guided the learning sciences through the initial turbulence of forming a new line of academic inquiry, as well as newcomers who are continuing to shape the field. This diversity allows for a broad yet selective perspective on what the learning sciences are, why they came to be, and how contributors conduct their work. Reflections on the Learning Sciences serves both as a starting point for discussion among scholars familiar with the discipline and as an introduction for those interested in learning more. It will benefit graduate students and researchers in computer science, educational psychology, instructional technology, science, engineering, and mathematics.

This book fills a gap in the existing medical literature by providing a best-practice approach to the evaluation and acute treatment of patients presenting for emergency care with identifiable substance use and/or co-occurring psychiatric disorders. As the first interdisciplinary book to integrate psychiatric and emergency care, the text uniquely covers a myriad of serious medical conditions, acute mental status and dangerous

behavioral abnormalities. The book focuses on guidelines that support emergency room physicians with little formal medical training in addiction medicine. The first section focuses on the diagnosis and management of substance-specific intoxication and withdrawal states, as well as common medical comorbidities and disposition considerations. The book lends particular attention to the identification and stabilization of high risk medical conditions associated with each substance of abuse. The second section is psychiatrically focused, addressing the most common psychiatric symptoms and syndromes, their association with SUDs, an approach to differential diagnosis, and discussion of crucial treatment considerations for both safe ED management and post-ED disposition. A final section includes other pertinent topics, for example, the assessment of patient safety, responding to the medication-seeking patient, assessment and treatment of pregnant patients and working with adolescents and their families around substance use. Substance Use and The Acute Patient is a unique and valuable contribution to the literature for both consulting psychiatrists, emergency medicine specialists, addiction medicine specialists, and all other medical professionals who provide care for these most complex and underserved patients.

Reflections on the Learning Sciences

Curriculum and Teaching Dialogue is the journal of the American Association of Teaching and Curriculum (AATC). An important historical event in the development of

organizations dealing with the scholarly field of teaching and curriculum was the founding of the AATC on October 1, 1993. The members of the AATC believed that the time was long overdue to recognize teaching and curriculum as a basic field of scholarly study, to constitute a national learned society for the scholarly field of teaching and curriculum (teaching is the more inclusive concept; curriculum is an integral part of teaching-the "what to teach" aspect). Since its founding AATC has produced scholarship in teaching and curriculum and serves the general public through its conferences, journals, and the interaction of its members.

The purpose of the organization was originally defined in Article 1, Section 2 of the AATC Constitution: "To promote the scholarly study of teaching and curriculum; all analytical and interpretive approaches that are appropriate for the scholarly study of teaching and curriculum shall be encouraged." Curriculum and Teaching Dialogue seeks to fulfill that mission.
