This edition is not just a rehash of old, albeit classic and still important, stuff. Instead, it provides a fresh perspective on a topic of perennial interest for those working in the field that has been variously called training and development, human resource development, performance technology, and workplace learning and performance. The fresh perspective takes into consideration two additional instructor settings to the traditional face-to-face environments that most instructors and trainers know -- that is, online and blended settings. These settings are, of course, becoming more critical as instruction moves beyond classroom settings to include virtual and combinations of classroom and other media delivery methods. The ibstpi instructor competencies match up well to Mapping the Future (Bernthal, Colteryahn, Davis, Naughton, Rothwell, & Wellins 2004), the current ASTD competency study of the field now known as Workplace Learning and Performance (WLP) and previously known as Training and Development (T&D). WLP is more than a new name for an old subject and represents a fundamental paradigm shift in what it means to be a professional in the field formerly known as training. WLP is all

about getting improved performance -- and therefore improved results -- in organizational settings through planned and unplanned learning interventions. Instruction is thus a means to an end and not an end in itself. The ibstpi instructor competencies dovetail well with that philosophy.

The Crossover Carson-Dellosa Publishing

Nominated as one of America's best-loved novels by PBS's The Great American Read "It is universally read, from the cabinet council to the nursery," remarked Alexander Pope when Gulliver's Travels was published in 1726. One of the unique books of world literature, Swift's masterful satire describes the astonishing voyages of one Lemuel Gulliver, a ship's surgeon, to surreal kingdoms inhabited by miniature people and giants, quack philosophers and scientists, horses endowed with reason and men who behave like beasts. Written with great wit and invention, Gulliver's Travels is a savage parody on man and his institutions that has captivated readers for nearly three centuries. As bestselling author and critic Allan Bloom observed:

"Gulliver's Travels is an amazing rhetorical achievement. Swift had not only the judgment with which to arrive at a reasoned view of the world but the fancy by means of which he could re-create that world in a form which teaches where argument fails and which satisfies all while misleading none." This representative collection of Swift's major writings includes the complete Gulliver's Travels as well as A Tale of a Tub, "The Battle of the Books," "A Modest Proposal," "An Argument Against Abolishing Christianity," "The Bickerstaff Papers," and many more of his brilliantly satirical works. Here too are selections from Swift's poetry and portions of his Journal to Stella. Swift's savage ridicule, corrosive wit, and sparkling humor are fully displayed in this comprehensive collection.

"Traditionally, scientists have emphasized what they call the first and second natures of personality--genes and culture, respectively. But today the field of personality science has moved well beyond the nature vs. nurture debate. In Who Are You, Really? Dr. Brian Little presents a distinctive view of how personality shapes our lives--and why this matters. Little makes the case for a third nature to the human condition--the pursuit of personal projects, idealistic dreams, and creative ventures that shape both people's lives and their personalities. Little uncovers what personality science has been discovering about the role of personal projects, revealing how this new concept can help people better understand themselves and shape their lives"--Provided by publisher.

In this instant New York Times bestseller, Angela Duckworth shows anyone striving to succeed that the secret to outstanding achievement is not talent, but a special blend of passion and persistence she calls "grit." "Inspiration for non-geniuses everywhere" (People). The daughter of a scientist who frequently noted her lack of "genius," Angela Duckworth is now a celebrated researcher and professor. It was her early eye-opening stints in teaching, business consulting, and neuroscience that led to her hypothesis about what really drives success: not genius, but a unique combination of passion and long-term perseverance. In Grit, she takes us into the field to visit cadets struggling through their first days at West Point, teachers working in some of the toughest schools, and young finalists in the National Spelling Bee. She also mines fascinating insights from history and shows what can be gleaned from modern experiments in peak performance. Finally, she shares what she's learned from interviewing dozens of high achievers—from JP Morgan CEO Jamie Dimon to New Yorker cartoon editor Bob Mankoff to Seattle Seahawks Coach Pete Carroll. "Duckworth's ideas about the cultivation of tenacity have clearly changed some lives for the better" (The New York Times Book Review). Among Grit's most valuable insights: any effort you make ultimately counts twice toward your goal; grit can be learned, regardless of IQ or circumstances; when it comes to child-rearing, neither a warm embrace nor high standards will work by themselves; how to trigger lifelong interest; the magic of the Hard Thing Rule; and so much more. Winningly personal, insightful, and even life-changing, Grit is a book about what goes through your head when you fall down, and how that—not talent or luck—makes all the difference. This is "a fascinating tour of the psychological research on success" (The Wall Street Journal).
