This edition is not just a rehash of old, albeit classic and still important, stuff. Instead, it provides a fresh perspective on a topic of perennial interest for those working in the field that has been variously called training and development, human resource development, performance technology, and workplace learning and performance. The fresh perspective takes into consideration two additional instructor settings to the traditional face-to-face environments that most instructors and trainers know -- that is, online and blended settings. These settings are, of course, becoming more critical as instruction moves beyond classroom settings to include virtual and combinations of classroom and other media delivery methods. The ibstpi instructor competencies match up well to Mapping the Future (Bernthal, Colteryahn, Davis, Naughton, Rothwell, & Wellins 2004), the current ASTD competency study of the field now known as Workplace Learning and Performance (WLP) and previously known as Training and Development (T&D). WLP is more than a new name for an old subject and represents a fundamental paradigm shift in what it means to be a professional in the field formerly known as training. WLP is all about getting improved performance -- and therefore improved results -- in organizational settings through planned and unplanned learning interventions. Instruction is thus a means to an end and not an end in itself. The ibstpi instructor competencies dovetail well with that philosophy.

Spanish Sentence Builders is a workbook aimed at beginner to pre-intermediate students co-

authored by two modern languages educators with over 40 years of extensive classroom

experience between the two, both in the UK and internationally. This 'no-frills' book contains

19 units of work on very popular themes, jam-packed with graded vocabulary-building,

reading, translation, retrieval practice and writing activities. Key vocabulary, lexical patterns

and structures are recycled and interleaved throughout. Each unit includes: 1) a sentence

builder modelling the target constructions; 2) a set of vocabulary building activities; 3) a set

of narrow reading texts exploited through a range of tasks focusing on both the meaning and

structural levels of the text; - a set of retrieval-practice translation tasks; 4) a set of writing

tasks targeting essential micro-skills such as spelling, lexical retrieval, syntax, editing and

communication of meaning. Based on the Extensive Processing Instruction (E.P.I.) principle

that learners learn best from comprehensible and highly patterned input flooded with the

target linguistic features, the authors have carefully designed each and every text and

activity to enable the student to process and produce each item many times over. This

occurs throughout each unit of work as well as in smaller grammar, vocabulary and question-skills micro-units located at regular intervals in the book, which aim at reinforcing the understanding and retention of the target grammar, vocabulary and question patterns.
