In this small English village, when one door closes, another opens for its favorite schoolteacher.

“You’ll relish a visit to Fairacre” (Jan Karon, #1 New York Times – bestselling author). Gradually worsening health forces Miss Read to consider an early retirement from her job as the village school’s headmistress. John Jenkins, a handsome newcomer, competes for her affections with the newly widowed

Henry Mawne.

However, Miss Read has more on her mind than men. Orphans living in her former house have bolstered the village school’s roll, but these new students seem to be having problems with their adoptive family. In the midst of all this turmoil, readers can rest assured that *Farewell to Fairacre* boasts all the elements they have come to love: eccentric villagers, gentle humor, and a verdant rural landscape teeming with lambs, larks, and blackthorn bushes. “As soothing and warm as a cup of Earl Grey tea, this book will delight fans and newcomers to the series alike.”

—Library Journal

“Sensible, well read and acutely observant, the delightfully prim Miss

Read continues to be very good company indeed. ” —Publishers Weekly

"A great American tale told with a deft historical eye, painstaking analysis, and a supple clarity of writing. " —Jean Baker " My husband considered you a dear friend," Mary Todd Lincoln wrote to Frederick Douglass in the weeks after Lincoln ' s assassination. The frontier lawyer and the former slave, the cautious politician and the fiery reformer, the President and the most famous black man in

America—their lives traced different paths that finally met in the bloody landscape of secession, Civil War, and emancipation. Opponents at first, they gradually became allies, each influenced by and attracted to the other. Their three meetings in the White House signaled a profound shift in the direction of the Civil War, and in the fate of the United States. James Oakes has written a masterful narrative history, bringing two iconic figures to life and shedding new light on the central issues of slavery, race, and equality in Civil War America.

Poster Girl Hachette UK

Beccy Cole's inspirational memoir from the heart of Australian country music. Beccy Cole has country music in her blood.

Daughter of a country music star, Carole Sturtzel, she is one of the most popular country singer-songwriters in Australia today. This is

the story of her life - in her own words. At fourteen, Beccy was performing in her mother's group, Wild Oats. By her late teens, Beccy had teamed up with the Dead Ringer Band - Kasey Chambers' family band - and had attracted the attention of the country music world by winning the Star Maker quest: the same award that started the careers of Keith Urban, Lee Kernaghan, James Blundell and Gina Jeffreys. It was just the first of many awards and accolades for this multitalented woman with a big heart. With refreshing candour, Beccy shares her story: leaving everything she knew to pursue her dream, making a name for herself with her own band; her marriage and motherhood; her subsequent divorce, becoming a single mother and maintaining the nurturing love of family. Performing for the Australian troops in Afghanistan. Coming out, and what it has meant for her and her fans. Taking control of her own life - and finding love. Heartfelt and honest, Poster Girl is the inspirational memoir of a strong woman who epitomises the authentic spirit of country music, and of Australia.

The Radical and the Republican: Frederick Douglass, Abraham Lincoln, and the Triumph of Antislavery Politics
The dream of capturing and organizing knowledge is as old as history. From the archives of ancient Sumeria and the Library of Alexandria

to the Library of Congress and Wikipedia, humanity has wrestled with the problem of harnessing its intellectual output. The timeless quest for wisdom has been as much about information storage and retrieval as creative genius. In *Cataloging the World*, Alex Wright introduces us to a figure who stands out in the long line of thinkers and idealists who devoted themselves to the task. Beginning in the late nineteenth century, Paul Otlet, a librarian by training, worked at expanding the potential of the catalog card, the world's first information chip. From there followed universal libraries and museums, connecting his native Belgium to the world by means of a vast intellectual enterprise that attempted to organize and code everything ever published. Forty years before the first personal computer and fifty years before the first browser, Otlet envisioned a network of "electric telescopes" that would allow people everywhere to search through books, newspapers, photographs, and recordings, all linked together in what he

termed, in 1934, a *réseau mondial*--essentially, a worldwide web. Otlet's life achievement was the construction of the *Mundaneum*--a mechanical collective brain that would house and disseminate everything ever committed to paper. Filled with analog machines such as telegraphs and sorters, the *Mundaneum*--what some have called a "Steampunk version of hypertext"--was the embodiment of Otlet's ambitions. It was also short-lived. By the time the Nazis, who were pilfering libraries across Europe to collect information they thought useful, carted away Otlet's collection in 1940, the dream had ended. Broken, Otlet died in 1944. Wright's engaging intellectual history gives Otlet his due, restoring him to his proper place in the long continuum of visionaries and pioneers who have struggled to classify knowledge, from H.G. Wells and Melvil Dewey to Vannevar Bush, Ted Nelson, Tim Berners-Lee, and Steve Jobs. Wright shows that in the years since Otlet's death the world has witnessed the emergence of a global network

that has proved him right about the possibilities--and the perils--of networked information, and his legacy persists in our digital world today, captured for all time. Information security: risk assessment, management systems, the ISO/IEC 27001 standard
