Begin your watercolor paintings the right way - with a sketch! Planning ahead is the key to avoiding mistakes and confusion while painting in watercolor. By using preliminary sketches, you can establish the composition, design and color scheme you want in a finished painting, saving time, energy and materials. David R. Becker helps you start sketching immediately with easy and fast exercises. You'll discover what works and what doesn't, plus unexpected ideas for using sketches during the painting process. You can turn even fifteen minutes into a valuable opportunity to experiment and learn with his methods for sketching anywhere, any time. Sketching in watercolor is more than just practice. It's a fun, easy-to-use tool that develops your skills and improves each painting. Start sketching today!

Welcome to Personalisation Nation. Your new NAMED 2020 week/month view planner features: A great feeling matte soft touch cover with a simplistic, yet durable design, made to withstand day to day use and storage in handbags etc. Versatile uses: simply use this diary as a personal planner or use it as an appointment book or whatever you can think of. Convenient design interior. Each page gives 7 days with space to write appointments. 6x9 size, similar to an A5 size book allows for easy carrying and the paperback makes it easy to fit into small spaces like small handbags, gloveboxes etc. 12 month view pages from January to December 2020 with extra spaces for notes, 53 week view pages from January 1st to December 31st. MAKES A GREAT GIFT FOR YOURSELF OR ANYONE NAMED AS SUCH. Makes a great birthday or christmas gift, as you come into the new year. We hope you enjoy your diary. For more information, click on the author name 'PERSONALISATION NATION' at the top of the page.

Since its invention in Italy in the fourteenth century, marine insurance has provided merchants with capital protection in times of crisis, thus oiling the gears of trade and commerce. With a focus on customs, laws, and organisational structures, this book reveals the Italian origins of marine insurance, and tracks the spread of underwriting practices and institutions in Europe and America through the early modern era. With contributions from eleven leading researchers from seven countries, the book examines key institutional developments in the history of marine insurance. The authors discuss its invention in Italy, and its evolution from private to corporate structures, assessing the causes and impacts of various state interventions. Amsterdam and Antwerp are analysed as one-time key centres of underwriting, as is the emergence and maturity of marine insurance in London. The book evaluates an experiment in corporate underwriting in Cadiz, and the development of insurance institutions in the United States, before applying the metrics of underwriting to discuss commerce raiding in the Atlantic up to the nineteenth century.

"Solidifies Jackson's status as the queen of the modern-day suspense thriller." --The Providence Journal Kristi Bentz wants to write true crime. All she needs is that one case that will take her to the top. She finds it when she enrolls at All Saints College after learning that four girls have disappeared in less than two years. "Expect the unexpected." --The Clarion Ledger All four girls were "lost souls"--troubled, vulnerable girls with no one to care about them, no one to come looking for them if they disappeared. The only person that believes Kristi is her ex-lover, Jay McKnight, a professor on campus. The police think they're runaways, but Kristi senses there's something that links them--something terrifying. . . "Jackson creates relentless suspense. . .builds the tension to an unbearable and satisfying pitch." --Booklist As Kristi gets deeper into her investigation, she

gets the feeling she's being watched and followed--studied, even. Then the bodies start turning up, and Kristi realizes she is playing a game with a killer who has selected her for membership in a special club from which there will be no escaping death. . . "Dark and disturbing." --The Roanoke Times

It's no secret that in today's complex world, students face unparalleled demands as they prepare for college, careers, and active citizenship. However, those demands won't be met without a fundamental shift from traditional, teacher-centered instruction toward innovative, student-centered teaching and learning. For schools ready to make such a shift, project-based learning (PBL) offers a proven framework to help students be better equipped to tackle future challenges. Project Based Teachers encourage active questioning, curiosity, and peer learning; create learning environments in which every student has a voice; and have a mastery of content but are also comfortable responding to students' questions by saying, "I don't know. Let's find out together." In this book, Suzie Boss and John Larmer build on the framework for Gold Standard PBL originally presented in Setting the Standard for Project Based Learning and explore the seven practices integral to Project Based Teaching: Build the Culture Design and Plan Align to Standards Manage Activities Assess Student Learning Scaffold Student Learning Engage and Coach For each practice, the authors present a wide range of practical strategies and include teachers' reflections about and suggestions from their classroom experiences. This book and a related series of free videos provide a detailed look at what's happening in PBL classrooms from the perspective of the Project Based Teacher. Let's find out together. A copublication of ASCD and Buck Institute for Education (BIE).

Widespread use of parallel processing will become a reality only if the process of porting applications to parallel computers can be largely automated. Usually it is straightforward for a user to determine how an application can be mapped onto a parallel machine; however, the actual development of parallel code, if done by hand, is typically difficult and time consuming. Parallelizing compilers, which can generate parallel code automatically, are therefore a key technology for parallel processing. In this book, Ping-Sheng Tseng describes a parallelizing compiler for systolic arrays, called AL. Although parallelizing compilers are quite common for shared-memory parallel machines, the AL compiler is one of the first working parallelizing compilers for distributed memory machines, of which systolic arrays are a special case. The AL compiler takes advantage of the fine grain and high bandwidth interprocessor communication capabilities in a systolic architecture to generate efficient parallel code. xii Foreword While capable of handling an important class of applications, AL is not intended to be a general-purpose parallelizing compiler.

Magnetized plasmas in the universe exhibit complex dynamical behavior over a huge range of scales. The fundamental mechanisms of energy transport, redistribution and conversion occur at multiple scales. The driving mechanisms often include energy accumulation, free-energy-excited relaxation processes, dissipation and self-organization. The plasma processes associated with energy conversion, transport and self-organization, such as magnetic reconnection, instabilities, linear and nonlinear waves, wave-particle interactions, dynamo processes, turbulence, heating, diffusion and convection represent fundamental physical effects. They demonstrate similar dynamical behavior in near-Earth space, on the Sun, in the heliosphere and in astrophysical environments. 'Multi-scale Dynamical Processes in Space and Astrophysical Plasmas' presents the proceedings of the International Astrophysics Forum Alpbach 2011. The contributions discuss the latest advances in the exploration of dynamical behavior in space plasmas environments, including comprehensive approaches to theoretical, experimental and numerical aspects. The book will appeal to researchers and students in the fields of physics, space and astrophysics, solar physics, geophysics and planetary science.

[Reminiscences and Table-talk of Samuel Rogers](#)

"Hollywood Eden brings the lost humanity of the record business vividly back to life ... [Selvin's] style is blunt, unpretentious and brisk; he knows how to move things along entertainingly ... Songs about surfboards and convertibles had turned quaint, but in this book, their coolness is restored." — New York Times From surf music to hot-rod records to the sunny pop of the Beach Boys, Jan & Dean, the Byrds, and the Mama's & the Papa's, Hollywood Eden captures the fresh blossom of a young generation who came together in the epic spring of the 1960s to invent the myth of the California Paradise. Central to the story is a group of sun-kissed teens from the University High School class of 1959 — a class that included Jan & Dean, Nancy Sinatra, and future members of the Beach Boys — who came of age in Los Angeles at the dawn of a new golden era when anything seemed possible. These were the people who invented the idea of modern California for the rest of the world. But their own private struggles belied the paradise portrayed in their music. What began as a light-hearted frolic under sunny skies ended up crashing down to earth just a few short but action-packed years later as, one by one, each met their destinies head-on. A rock 'n' roll opera loaded with violence, deceit, intrigue, low comedy, and high drama, Hollywood Eden tells the story of a group of young artists and musicians who bumped heads, crashed cars, and ultimately flew too close to the sun.
