It takes you from the inspiration and inception of the Kindle family line and how this branched out into the Kindle line: the Kindle Touch, the Kindle DX, and finally to the Kindle Fire family which is the subject of this book. The original Kindle fire model was launched in September 2011 and became the first generation of this model.

This evolved into three models: the Fire tablet, Fire HD, and Fire HDX. The Fire HD evolved into eight generations, changing in sizes and adding on features with each generation. You will be able to get to know your Kindle Fire with the description of its design, software, and reception. The latest generation of Fire HD 8 and 10 captures the market with its hands-free Alexa and Echo Show features. You may have these features from the same devices of other brands, but what beats the competition is Amazon's offer of affordable price. Once again, Amazon heads the market with the introduction of the Echo Show Mode. The Show Mode is designed to give you a rich visual experience, even when you glance on it from across the room. Another wonder added to the Fire HD tablets is Alexa - Amazon's digital assistant which interacts through voice commands. Alexa came with the Echo, but the two are distinct. The book briefly explains the relationship between Alexa and Echo and breaks down Alexa to give you a picture of how Alexa works. With Alexa on Fire HD 8 and 10, tasks become easy. You can create a hub with your Alexa on Fire Tablet, connecting other smart home devices using your voice as control. Home tasks become fast and convenient for you. If you read technology news, you'll notice it's not just a story of amazing new product introductions, or even that plus copycat product introductions. All the usual aspects of business are there: fierce competition, new contenders, old survivors, great ideas but business failures, mediocre ideas that somehow seem to succeed and prosper. As a reporter, commentator and blogger on mobile technology, I've collected what happened in the industry in 2013 and make predictions on what will and won't happen in 2014. You can read what did happen in the mobile technology in 2013. Often I deliver a comment with the news item

and usually there is a link to the web page of the original announcement. This way you can dive into any detail level you desire, read my news feed for the overview or follow the related web link to the longer article. History is moving so fast now that it is all recorded electronically, but I'm surprised no one else has collected it and presented it for consideration. Here is 2013 from the mobile technology industry for your consideration along with my own observations and opinions about where things are headed. It's often overlooked that the technology industry is an industry. By that I mean its main concerns are profit and growth. As consumers we love the new products and unique abilities we are gaining from technology, but it is a business akin to any other, trying to seduce us to pry money out of our wallets. So I cover the horse race aspect of the business, who's up, who's down. Is that changing? Is that likely to change? The longer implications of what the technology industry is doing are vast and social. We are moving to an always on, always connected society where we can communicate with someone instantly and find an answer to any question

quickly. The entire database of human knowledge is now available in the palm of your hand whenever you desire it. Everything is there, the good, the bad, right and wrong, hate and love, music and noise. We are obsessed with technology, not in and of itself, but as a means to an end. Technology is the means to satisfy our curiosity or even our desire for self-expression. We are taking photos machine gun-style with our smartphones and choose the few to share. As humans we are gathering ever more data about ourselves and sharing more about ourselves than we probably thought possible. Bill Gates was once asked why the computer industry had generated so much improvement in its products over a relatively few years. He gave some boring answer about Moore ' s Law, but the real answer is that computers are in their teenage years. They are growing and growing. They will not always do so. So too the technology industry is in a state of rapid change. I see the shift to smaller devices as a new paradigm, smashing some businesses and growing others into giants. Their stories are here in the news. In short here are predictions for what won ' t and will happen in 2014 for the mobile

technology industry, breakdowns of marketshare figures on the horse race aspect of the business, chapters on Apple, Samsung, Google, Microsoft, Nokia, Blackberry, Amazon, Yahoo, news about social media giants Facebook, Twitter, Google+, LinkedIn, Foursquare, SnapChat and the carriers themselves Verizon, AT&T, Sprint and T-Mobile. You can also review my 2013 mobile predictions and see my track record on predictions. Finally there are some essays on how all this mobile tech is figuring into our lives. I ' ve divided the news into the subjects it covers, but also put in the appendix all the news as it came out in chronological ordering. You can read the firehose of events in the appendix, or just read about one topic at a time in the earlier chapters. Table of Contents Preface Introduction Chapter 1: 2014 Predictions Chapter 2: Mobile Marketshare Chapter 3: Apple Chapter 4: Samsung Chapter 5: Google Chapter 6: Microsoft Chapter 7: Nokia Chapter 8: Blackberry Chapter 9: Amazon Chapter 10: Social Media Chapter 11: Yahoo Chapter 12: Carriers Chapter 13: 2013 Predictions Chapter 14: Essays Appendix Kindle Fire HD 10 Tablet 2018 Manual In Easy Steps
