This book unites research in philosophy and cognitive science with cultural history to re-examine memory in early modern religious practices. Offering an ecological approach to memory and culture, it argues that models derived from Extended Mind and Distributed Cognition can bridge the gap between individual and social models of memory.

This instructive book takes you step by step through ways to track, merge, and manage both open source and commercial software projects with Mercurial, using Windows, Mac OS X, Linux, Solaris, and other systems. Mercurial is the easiest system to learn when it comes to distributed revision control. And it's a very flexible tool that's ideal whether you're a lone programmer working on a small project, or part of a huge team dealing with thousands of files. Mercurial permits a countless variety of

development and collaboration methods, and this book offers several concrete suggestions to get you started. This guide will help you: Learn the basics of working with a repository, changesets, and revisions Merge changes from separate repositories Set up Mercurial to work with files on a daily basis, including which ones to track Get examples and tools for setting up various workflow models Manage a project that's making progress on multiple fronts at once Find and fix mistakes by isolating problem sources Use hooks to perform actions automatically in response to repository events Customize the output of Mercurial Mercurial: The Definitive Guide maintains a strong focus on simplicity to help you learn Mercurial quickly and thoroughly.

Tavistock Press was established as a co-operative

venture between the Tavistock Institute and Routledge & Kegan Paul (RKP) in the 1950s to produce a series of major contributions across the social sciences. This volume is part of a 2001 reissue of a selection of those important works which have since gone out of print, or are difficult to locate. Published by Routledge, 112 volumes in total are being brought together under the name The International Behavioural and Social Sciences Library: Classics from the Tavistock Press. Reproduced here in facsimile, this volume was originally published in 1967 and is available individually. The collection is also available in a number of themed mini-sets of between 5 and 13 volumes, or as a complete collection.

PHP & MySQL: The Missing Manual Kendall Hunt

Looking after someone ill, elderly or disabled can be physically and emotionally challenging, especially if you are new to caring. However, you are not alone. Offering practical advice and drawing on the latest research in the field of caring, this book helps you begin your journey as a carer. Simply written, without unnecessary jargon, this supportive guide will show you how to help the person in your care, in a manner that fosters their independence, dignity and self respect. Caring strategies are included for the

physically disabled, people with sensory impairments, dementia patients and the mentally ill, as well as the elderly. You will also discover where to find financial help, how to take good care of yourself, and whom to turn to if you are a young carer. This book gives you the knowledge you need to turn caring into a satisfying and rewarding experience, enabling you to make a real difference to the life of the person in your care.

Cognitive Ecologies and the History of Remembering "O'Reilly Media, Inc."

Mirzal provides software you need to implement your own search engine. Python, a popular multiplatform scripting language with simple syntax and comprehensive libraries, was chosen for the search engine, and step-by-step instructions for installation in Windows and Linux environments are given.

based, each title provides students with succinct information and engaging activities to stimulate their natural curiosity, and help them master the basic concepts and develop an interest in learning science.

Dublin ABC-CLIO

Concepts from Tensor Analysis and Differential Geometry discusses coordinate manifolds, scalars, vectors, and tensors. The book explains some interesting formal properties of a skew-symmetric tensor and the curl of a vector in a coordinate manifold of three dimensions. It also explains Riemann spaces, affinely connected spaces, normal coordinates, and the general theory of extension. The book explores differential invariants, transformation groups, Euclidean metric space, and the Frenet formulae. The text describes curves in space, surfaces in space, mixed surfaces, space tensors, including

the formulae of Gaus and Weingarten. It presents the equations of two scalars K and Q which can be defined over a regular surface S in a three dimensional Riemannian space R . In the equation, the scalar K , which is an intrinsic differential invariant of the surface S , is known as the total or Gaussian curvature and the scalar U is the mean curvature of the surface. The book also tackles families of parallel surfaces, developable surfaces, asymptotic lines, and orthogonal ennuples. The text is intended for a one-semester course for graduate students of pure mathematics, of applied mathematics covering subjects such as the theory of relativity, fluid mechanics, elasticity, and plasticity theory.

Reflections on the Nude Simon and Schuster

Haynes manuals are written specifically for the do-it-yourselfer, yet are complete enough to be used by professional mechanics. Since 1960 Haynes has produced manuals written from hands-on experience

based on a vehicle teardown with hundreds of photos and illustrations, making Haynes the world leader in automotive repair information.
