The V W Golf was planned to be a worthy successor to the venerable Beetle, a move that required dynamic thinking and a clean drawing board if Volkswagen was to continue to hold its position as one of the top automobile manufacturers. Where the Golf differed from the crowd was its distinctive body design. For here was the world's first hatchback. When Volkswagen launched the Golf GTI, over thirty years ago, it could hardly have known the impact its compact and sporty model would have on the car-buying public. Through an uncertain birth to its class-topping iconic status of today, rarely does a new model of car make a whole new market segment for itself but the Golf was the original hot hatch, a car that others would copy but seldom equal.

"The automotive maven and former Member of Parliament might be the most trusted man in Canada, an inverse relationship to the people he writes about." – The Globe and Mail Lemon-Aid shows car and truck buyers how to pick the cheapest and most reliable vehicles from the past 30 years of auto production. This brand-new edition of the bestselling guide contains updated information on secret service bulletins that can save you money. Phil describes sales and service scams, lists which vehicles are factory goofs, and sets out the prices you should pay. As Canada's automotive "Dr. Phil" for over 40 years, Edmonston pulls no punches. His Lemon-Aid is more potent and provocative than ever.

Twenty years ago, the Mazda MX-5 Roadster was born – the result of five years' research and development by two project teams split across Japan and the USA. When launched, it was the sports car the world was waiting for. Over the past 20 years, the MX-5 has evolved and changed, but has managed to stay true to the original philosophy of 'horse and rider as one,' a car to truly engage with the driver and provide the ultimate top-down driving experience with its perfect 50/50 weight distribution and neutral handling – it is easy to control, nimble and light, and inexpensive to buy, own and maintain. The MX-5 is a true testament to itself as the 'world's best-selling sports car,' and with the earlier MkI and MkII available for modest prices, it is the perfect choice as a fun and enjoyable daily driver, a weekend track car, or a project base for a kit car. This book will help you get the MX-5 of your dreams.

Why do consumers pay a premium price for a brand? Is it better quality, the look and feel, or is it the brand's social standing? Author Nigel Hollis believes the answer to all those questions is "yes." Yet the vast majority of brands today trade on past equity and transient buzz. And marketers focus on plan execution rather than creating meaningful differentiation rooted in the brand experience. This lack of meaning is creating a market full of commodities rather than products that instill loyalty. But loyalty (i.e., repeat business) is the key to long term success, and that requires focusing on meaningful differentiation: functional, emotional, or societal. Here, brand expert Nigel Hollis focuses on the four components of a meaningfully different brand: purpose, delivery, resonance, and difference. This unique model will be applied to two very different brand models: premium priced and value priced. The models will show readers how to amplify what their brand stands for across all the brand touch points including: findability, affordability, credibility, vitality, and extendibility. The book will include cases of global brands such as Dyson, Johnnie Walker, Geico, Volkswagen, and more.
