Many different methods can be used in each approach, but generally speaking fundamental analysis is concerned with the question of why something in the market will happen, and technical analysis attempts to answer the question of when something will happen. [Volume Spread Analysis](#), however, is a third approach to analyzing a market. It combines the best of both fundamental and technical

analysis into a singular approach that answers both questions of 'why' and 'when' simultaneously. [Volume Spread Analysis](#) or VSA as we call is a Technical Analysis stream where we analyse the price and volume relationship to determine the movements of smart money. Richard Wyckoff introduced & invented this methodology of interpreting the price volume relationship & tape reading to understand and trade the different phases of markets.
