I think it's interesting though. I think it's interesting that in some sense that that's all happiness is, for surely if everyone were the freckle in the tar then there would be no tar-then we would all wish to be the tar bit in the freckles. If everyone were psycho-drunk-cut-all-their-fingers-off-with-a-steak-knife-f\*cked-up at the bar, then who in the f\*ck would really think it interesting to put such a story in the news? If everyone wore a smile and you never saw even one cloud in the wink of all your days then who in the f\*ck would be relieved by another? And it's fun to twist and spit on the plot-fun to run the f\*cking lawn mower through the fence and see how far it goes-fun to take your mattress outside and jump on it naked in the middle of the street-but oh my oh my if we didn't make each other feel like a night cry in the murmur then we would have no reason to murder each other and

oh my oh my what a pleasure it is to murder each other-what a pleasure it is for me to come home and cry-to stop crying and stop being such a pussy-to not stop stopping being such a pussy and fill-up a red-container with Mario's juice and burn Uber to my feet-make them feel like me-make them lose the one-moment that feels to be the one that lasts-make them unmake them.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share:

The future is going to be better, and science and technology are the driving forces that will help make it better.

The Lock and Key Library: Classic Mystery and Detective Stories: Modern English Dundurn  
As the field of tribology has evolved, the lubrication industry is also progressing at an extraordinary rate. Updating the author's bestselling publication, Synthetic Lubricants and High-Performance Functional Fluids, this book features the contributions of over 60 specialists, ten new chapters, and a new title to reflect the evolving nature of the Popular Mechanics CreateSpace

This practical and engaging book provides a coherent approach to global business responsibility and ethics based on the latest research, theory, and practice. The authors incorporate numerous interesting and current real world examples to support the argument that corporations need to - and can - identify and implement processes that foster ethical conduct, ensure basic human rights, protect the natural environment, and enhance social justice wherever businesses operate around the globe.

"Global Business Citizenship" combines elements of political theory, stakeholder relationships, business ethics, corporate social performance, accountability and measurement, and organizational change. Its practical approach encompasses "best practices" in stakeholder management, experiments in applying corporate values to local conditions, and social environmental auditing and reporting. Focusing on the strategic alignment and change management process for implementing business citizenship principles and practices, it is an essential supplement for any course concerned with ethics and social responsibility in today's global business climate.

Encyclopedia of Human Rights CRC Press  
The engineering enterprise is a pillar of U.S. national and homeland security, economic vitality, and innovation. But

many engineering tasks can now be performed anywhere in the world. The emergence of "offshoring"- the transfer of work from the United States to affiliated and unaffiliated entities abroad - has raised concerns about the impacts of globalization. The Offshoring of Engineering helps to answer many questions about the scope, composition, and motivation for offshoring and considers the implications for the future of U.S. engineering practice, labor markets, education, and research. This book examines trends and impacts from a broad perspective and in six specific industries - software, semiconductors, personal computer manufacturing, construction engineering and services, automobiles, and pharmaceuticals. The Offshoring of Engineering will be of great interest to engineers, engineering professors and deans, and policy makers, as well as people outside the engineering community who are concerned with sustaining and strengthening U.S. engineering capabilities in support of homeland security, economic vitality, and innovation.

Road & Track

This reference book is a complete guide to the trends and leading companies in the engineering, research, design, innovation and development business fields: those firms that are dominant in engineering-based design and development, as well leaders in technology-based research and development. We have included companies that are making significant investments in research and development via as many disciplines as possible, whether that research is being funded by internal investment, by fees received from clients or by fees collected from government agencies. In this carefully-researched volume, you'll get all of the data you need on the American Engineering & Research Industry, including: engineering market analysis, complete industry basics, trends, research trends, patents, intellectual property, funding, research and development data, growth companies, investments, emerging technologies, CAD, CAE, CAM, and more. The book also contains major statistical tables covering everything from total U.S. R&D expenditures to the total number of scientists working in various disciplines, to amount of U.S. government grants for research. In addition, you'll get expertly written profiles of nearly 400 top Engineering and Research firms - the largest, most successful corporations in all facets of Engineering and Research, all cross-indexed by location, size and type of business. These corporate profiles include contact names, addresses, Internet addresses, fax numbers, toll-free numbers, plus growth and hiring plans, finances, research, marketing, technology, acquisitions and much more. This book will put the entire Engineering and Research industry in your hands. Purchasers of either the book or PDF version can receive a free copy of the company profiles database on CD-ROM, enabling key word search and export of key information, addresses, phone numbers and executive names with titles for every company profiled.
