*Inboard Diesel Engine. Inboard Boat Motors. | Volvo Penta*  
The solution is to check the stored fault code through a diagnostic scanner, identify the cause of the problem and repair the engine as soon as possible. Volvo engines are high-performance, robust and durable. On average they are reputed to have a life of 300,000 miles without the need for overhaul or a Volvo engine replacement, provided the engine is regularly maintained. Many Volvo owners seek the advice of Experts in engine maintenance and in effecting minor engine repair.  
*Volvo D4/D6: Everything you need to know about these new ...*  
One possible contaminant is air. If air enters the injector pipes, the engine will stop because the air will act as a shock absorber, preventing the fuel pressure from rising high or quickly enough to be sprayed into the cylinder. This is a common problem that is easily solved by bleeding the fuel system of air.

Volvo Penta has revamped its entire range of D4 and D6 diesel engines in a bid to deliver more power, increased reliability, improved efficiency and lower running costs. It has also launched a new Duoprop sterndrive leg as well as a new engine management system and redesigned throttles.  
*Volvo Penta Forum for engine problem solving and answers*  
Boat Engine is Sputtering and Losing Power Your boat feels like it's running out of strength (and you've ruled out the No. 1 breakdown reason — running out of fuel). You most likely have a filter problem or fouled plugs. That could be why your boat motor is losing power.  
Highly Efficient Saildrive Engine | Volvo Penta  
The broad range of Volvo Penta inboard diesel engines means that you can always find an engine that fits the size of the boat. The engines deliver rapid acceleration, reliable performance and the ability to maintain a high cruising speed, regardless of the load or sea. These, however, are but a few of the many benefits.
